Volume 11553

Proceedings of SPIE 0277-786X, V. 11553

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optics in Health Care and Biomedical Optics X, edited by Qingming Luo, Xingde Li, Ying Gu, Dan Zhu, Proc. of SPIE Vol. 11553, 1155301 • © 2020 SPIE • CCC code: 0277-786X/20/\$21 • doi: 10.1117/12.2585933

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optics in Health Care and Biomedical Optics X*, edited by Qingming Luo, Xingde Li, Ying Gu, Dan Zhu, Proceedings of SPIE Vol. 11553 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NOVEL MICROSCOPY

- 11553 04 **A micron precision fiber bundle coupler for confocal endomicroscope [11553-3]**
- 11553 06 **Super-resolution acoustic-resolution photoacoustic microscopy by a novel algorithm [11553-5]**
- 11553 07 **Real-time calcium imaging by the interaction of adenosine receptors in living HEK293T cells [11553-6]**
- 11553 0A **Assessing structural features of tuberculosis using Mueller matrix derived parameters: a quantitative method to distinguish between Crohn's disease and gastrointestinal luminal tuberculosis [11553-9]**

OCT AND APPLICATIONS

- 11553 0F **Study of imaging performance of mouse eyes based on optical coherence tomography and ray tracing techniques [11553-14]**
- 11553 0G **In vivo characterization of human disease models based on adult zebrafish with optical coherence tomography [11553-15]**

TRANSLATIONAL OPTICAL TECHNIQUES FOR CLINICAL MEDICINE

- 11553 0T **Heptamethine cyanine-based small molecular cancer theranostic agents [11553-28]**
- 11553 0V **Quantitative detection of protoporphyrin IX (PpIX) fluorescence in tissues [11553-30]**
- 11553 0X **Dual-tracer PET image direct reconstruction and separation based on three-dimensional encoder-decoder network [11553-34]**

NANOBIOPHOTONICS

- 11553 16 **Atto-level nanobiophotonic sensing approach using silicon technology [11553-44]**

BIOMEDICAL SPECTROSCOPY

- 11553 1A **Spatially resolved diffuse reflectance and autofluorescence photon depth distribution in human skin spectroscopy: a modeling study** [11553-49]
- 11553 1C **Parallel acquisition of 2D multifocal Raman spectroscopy using compressive sensing** [11553-51]
- 11553 1D **Rapid Stokes polarimetry for studying the process of optical tissue clearing** [11553-52]
- 11553 1G **Machine learning applications for spectral analysis of human exhaled breath for early diagnosis of diseases** [11553-110]

POSTER SESSION

- 11553 1H **Rapid identification of two types of tissue necrosis in breast tumor using multiphoton microscopy** [11553-48]
- 11553 1I **Computed extended depth of field optical-resolution photoacoustic microscope using wavelet transform fusion** [11553-55]
- 11553 1J **Simulation investigation of photoacoustic signal generation in the prostate tissue** [11553-56]
- 11553 1L **Simulation of the measurement error of independent emission-spectral unmixing FRET** [11553-58]
- 11553 1M **Light absorption distribution for photoacoustic imaging of bladder by use of endoscopic light illumination** [11553-59]
- 11553 1O **Methods on optimizing OPSI** [11553-61]
- 11553 1P **Merits of vision in presence of light scattering using Tiffen ProMist filters** [11553-62]
- 11553 1Q **Surface-enhanced Raman scattering of secretory proteins from LO2 and HepG2** [11553-63]
- 11553 1R **Detection of cancerous esophageal tissue by Raman spectroscopy and multivariate analysis of extracellular fluid** [11553-64]
- 11553 1S **A Deep ADMM-net for iterative low-count PET reconstruction** [11553-65]
- 11553 1T **A serum albumin analysis technique combining hydroxyapatite (HAp) and surface-enhanced Raman scattering for noninvasive breast cancer screening** [11553-66]
- 11553 1U **Development and performance evaluation of portable 405 nm laser-induced fluorescence detector** [11553-67]
- 11553 1V **Dual-channel wide-field microscopic detection for mast cells degranulation using nanomaterial-based FRET biosensor** [11553-68]

- 11553 1W **Effects of multiple factors on photoacoustic detection of glucose based on back propagation neural network combined with intelligent optimization algorithms [11553-69]**
- 11553 1Y **Classification of skin cancer based on fluorescence lifetime imaging and machine learning [11553-71]**
- 11553 20 **Label-free multiphoton imaging to identify two types of tumor-infiltrating lymphocytes in breast tumor microenvironment [11553-73]**
- 11553 21 **Monitoring collagen changes in tumor microenvironment using multiphoton microscopy [11553-74]**
- 11553 22 **Photothermal therapy method based on photoacoustic/ultrasonic dual-mode temperature measurement and regulation [11553-75]**
- 11553 23 **Identification of blood vessel invasion in breast tumor microenvironment by multiphoton microscopy [11553-76]**
- 11553 28 **Optimization method of diffuse optical tomography reconstruction based on neural network [11553-81]**
- 11553 29 **Spectrum analysis of acousto-optic signal modulated by ultrasound at different frequency in scattering medium [11553-82]**
- 11553 2B **Assessing pharmacokinetics of indocyanine green in liver injury mice using dynamic diffuse fluorescence tomography system [11553-84]**
- 11553 2C **Differentiation of submicron particles with two-dimensional light scattering technology [11553-85]**
- 11553 2D **SERS signal of serum proteins purified with cellulose acetate membrane [11553-86]**
- 11553 2E **Photothermal response of skin by OCT and infrared thermal imager [11553-87]**
- 11553 2J **High-content 2D light scattering flow cytometry for label-free classification of cervical carcinoma cells with deep learning [11553-92]**
- 11553 2K **Negativity artifacts analysis in back-projection based photoacoustic tomography [11553-93]**
- 11553 2L **Simultaneous algebraic reconstruction technique based on total variation for photoacoustic image [11553-94]**
- 11553 2M **Highly sensitive detection of DNA fragments by fluorescence correlation spectroscopy [11553-95]**
- 11553 2N **Quantitatively distinguishing typical pathological features between different breast tissues using polarimetry feature parameters [11553-96]**
- 11553 2O **High-speed wide-field optical-sectioning fluorescence microscopy based on one-shot structured illumination [11553-97]**

- 11553 2P **Analysis of image features for the characterization of skin optical clearing kinetics performed on in vivo and ex vivo human skin using Linefield-Confocal Optical Coherence Tomography (LC-OCT) [11553-98]**
- 11553 2R **Variation of optical attenuation coefficient during ischemia-reperfusion process of rabbit kidney measured by optical coherence tomography [11553-100]**
- 11553 2T **Evaluation of different denoising algorithms for OCT image denoising [11553-102]**
- 11553 2U **Skin melanoma detection based on hyperspectral imaging and deep-learning techniques [11553-103]**
- 11553 2W **Application of convolutional neural network in signal classification for in vivo photoacoustic flow cytometry [11553-105]**
- 11553 2X **Volume scanning-based light scattering microscopy for fast 3D localization of single particles [11553-106]**
- 11553 2Z **Estimation of the advanced glycation end products accumulated by sclera using autofluorescence [11553-108]**
- 11553 30 **Diminution of melanin influence on the level of skin autofluorescence utilized for the estimation of advanced glycation end products level using green LED [11553-109]**
