SPIE

Volume 7705

Proceedings of SPIE, 0277-786X, v. 7705

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Modeling and Simulation for Defense Systems and Applications V*, edited by Eric J. Kelmelis, Proceedings of SPIE Vol. 7705 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SESSION 1 PHYSICS-BASED SIMULATIONS

- 7705 02 **CULA: hybrid GPU accelerated linear algebra routines** [7705-01]
J. R. Humphrey, D. K. Price, K. E. Spagnoli, A. L. Paolini, E. J. Kelmelis, EM Photonics, Inc. (United States)
- 7705 04 **Novel high-fidelity realistic explosion damage simulation for urban environments** [7705-04]
X. Liu, J. Yadegar, Y. Zhu, C. Raju, J. Bhagavathula, UtopiaCompression Corp. (United States)

SESSION 2 SENSORS AND SENSOR-BASED SYSTEMS I

- 7705 05 **Depth estimation, spatially variant image registration, and super-resolution using a multi-lenslet camera** [7705-05]
Q. Zhang, Wake Forest Univ. Health Sciences (United States); M. Mirotznik, Univ. of Delaware (United States); S. Saldana, Wake Forest Univ. Health Sciences (United States); J. Smith, Univ. of Delaware (United States); R. Barnard, Wake Forest Univ. Health Sciences (United States)

SESSION 3 SENSORS AND SENSOR-BASED SYSTEMS II

- 7705 07 **Multispectral tactical integrated scene generation capability using satellite imagery** [7705-07]
C. Coker, C. Willis, T. Van, Air Force Research Lab. (United States); B. Smith, GSES/L-3 Services, Inc. (United States); P. Destin, DCS Corp. (United States)
- 7705 08 **PerSEval phase I: development of a 3D urban terrain model for evaluation of persistent surveillance sensors and video-based tracking algorithms** [7705-08]
D. M. Deaver, U.S. Army, RDECOM, CERDEC, NVESD (United States); R. Kang, V. Tran, Alion Science and Technology (United States); D. Oxford, Defence Science and Technology Lab. (United Kingdom)

SESSION 4 OPTICAL COMPONENTS AND SYSTEMS

- 7705 0A **Modeling multi-channel optical links using OptiSPICE for WDM systems** [7705-10]
P. Gunupudi, T. Smy, Carleton Univ. Ottawa (Canada); J. Klein, J. Jakubczyk, Optiwave Systems Inc. (Canada)
- 7705 0B **Multi-transceiver simulation modules for free-space optical mobile ad hoc networks** [7705-11]
M. Bilgi, M. Yuksel, Univ. of Nevada, Reno (United States)

- 7705 0C **The effects of electron temperature in terahertz quantum cascade laser predictions** [7705-12]
P. Slingerland, C. Baird, B. Crompton, R. Giles, Univ. of Massachusetts Lowell (United States);
W. E. Nixon, U.S. Army National Ground Intelligence Ctr. (United States)

SESSION 5 TOOLS, TECHNIQUES, AND VV&A

- 7705 0D **Analyzing the impact of data movement on GPU computations** [7705-13]
D. K. Price, J. R. Humphrey, K. E. Spagnoli, A. L. Paolini, EM Photonics, Inc. (United States)
- 7705 0E **Risk-based verification, validation, and accreditation process** [7705-14]
J. N. Elele, J. Smith, Naval Air Systems Command (United States)
- 7705 0F **Using simulation and virtual machines to identify information assurance requirements** [7705-15]
S. B. Banks, M. R. Stytz, Calculated Insight (United States)

SESSION 6 DEFECT SIMULATION AND DETECTION

- 7705 0H **On development of a VLSI circuit for impact source identification in ceramic plates** [7705-17]
A. M. Dixit, H. Singh, Wayne State Univ. (United States); T. Meitzler, U.S. Army
RDECOM-TARDEC (United States)
- 7705 0I **Realistic and efficient 2D crack simulation** [7705-18]
J. Yadegar, X. Liu, A. Singh, UtopiaCompression Corp. (United States)

SESSION 7 DISTRIBUTED SYSTEMS

- 7705 0J **Integrating botnet simulations with network centric warfare simulations** [7705-21]
M. R. Stytz, Institute for Defense Analyses (United States); S. B. Banks, Calculated Insight
(United States)
- 7705 0K **Streaming video for distributed simulation** [7705-22]
S. G. Webster, Kinex Inc. (United States); D. J. Paul, U.S. Army, RDECOM, CERDEC, Night Vision
& Electronic Sensors Directorate (United States)

SESSION 8 WARFIGHTER AND OPERATIONS

- 7705 0L **Warfighter decision making performance analysis as an investment priority driver** [7705-23]
D. J. Thornley, Imperial College London (United Kingdom); D. F. Dean, Defence Science and
Technology Lab. (United Kingdom); J. C. Kirk, Honeywell Technology (United States)
- 7705 0M **Individual warfighter effectiveness and survivability in a CBRN threat environment** [7705-24]
R. Schleper, U.S. Army Soldier Systems Ctr. (United States); C. Gaughan, SFC Paul Ray Smith
Simulation & Training Technology Ctr. (United States); M. O. Kierzewski, U.S. Army Edgewood
Chemical Biological Ctr. (United States); C. Dunmire, L. Salvi, U.S. Army Research Lab.
(United States); J. Fann, ITT Advanced Engineering & Sciences (United States); B. Kellihan,
DCS Corp. (United States)

- 7705 0N **Simulating effectiveness of helicopter evasive manoeuvres to RPG attack** [7705-25]
D. Anderson, D. G. Thomson, Univ. of Glasgow (United Kingdom)
- 7705 0O **SOA approach to battle command: simulation interoperability** [7705-26]
G. Mayott, U.S. Army Night Vision & Electronic Sensors Directorate (United States); M. Self, CACI Technologies, Inc. (United States); G. J. Miller, Oakwood Controls Corp. (United States); J. S. McDonnell, Dynamic Animation Systems, Inc. (United States)
- 7705 0P **A simulation approach to a virtual base defense operating center** [7705-27]
K. Athmer, MANSCEN (United States); C. Gaughan, U.S. Army RDECOM RDST-CTM (United States)

POSTER SESSION

- 7705 0Q **A prioritization scheme of detector in intrusion detection model based on GA** [7705-28]
P. Qiao, S. Yuan, J. Su, Harbin Univ. of Science and Technology (China)

Author Index

Conference Committee

Symposium Chair

Michael T. Eismann, Air Force Research Laboratory (United States)

Symposium Cochair

William Jeffrey, HRL Laboratories, LLC (United States)

Conference Chair

Eric J. Kelmelis, EM Photonics, Inc. (United States)

Program Committee

James N. Elele, Naval Air Systems Command (United States)

Susan Harkrider, U.S. Army Night Vision & Electronic Sensors Directorate
(United States)

Alex F. Sisti, Air Force Research Laboratory (United States)

David J. Thornley, Imperial College London (United Kingdom)

Dawn A. Trevisani, Air Force Research Laboratory (United States)

Session Chairs

- 1 Physics-Based Simulations
Carla B. Willis, Air Force Research Laboratory (United States)
- 2 Sensors and Sensor-Based Systems I
Fernando E. Ortiz, EM Photonics, Inc. (United States)
- 3 Sensors and Sensor-Based Systems II
Fernando E. Ortiz, EM Photonics, Inc. (United States)
- 4 Optical Components and Systems
Peter Qiang Zhang, Wake Forest University (United States)
- 5 Tools, Techniques, and VV&A
Chris Gaughan, U.S. Army Simulation & Training Technology Center
(United States)
- 6 Defect Simulation and Detection
Mehmet Bilgi, University of Nevada, Reno (United States)

- 7 Distributed Systems
Chris Gaughan, U.S. Army Simulation & Training Technology Center
(United States)
- 8 Warfighter and Operations
Brian Miller, Naval Air Systems Command (United States)
