Eighth International Conference on Digital Image Processing (ICDIP 2016)

Charles M. Falco
Xudong Jiang
Editors

20–23 May, 2016
Chengdu, China

Sponsored by
Sichuan Province Computer Federation (China)
International Association of Computer Science and Information Technology (Singapore)
Chengdu University of Information Technology (China)
Chinese Academy of Sciences Chengdu Institute of Computer Applications (China)

Assisted by
Sichuan University (China)
Southwest Jiaotong University (China)
University of Electronics Science and Technology of China (China)
Chengdu Young Electrician Consulting Company Ltd. (China)

Published by
SPIE

Volume 10033
Part One of Two Parts
## Table of Contents

### Part One

#### SESSION 1 FEATURE DETECTION AND MATCHING

- 10033 02 An algorithm of LiDAR building outline extraction by Delaunay triangle [10033-239]
- 10033 03 Deployment of vehicular edge clouds: lessons and challenges [10033-240]
- 10033 04 An elastic image registration model based on FEM [10033-104]
- 10033 05 Sub-pixel hard shadows anti-aliasing [10033-23]
- 10033 06 A local space rotation invariant feature extraction method for facial interest points detection [10033-37]
- 10033 07 A fusion algorithm of template matching based on infrared simulation image [10033-203]
- 10033 08 Edge grouping based on Gestalt principles and spectral clustering [10033-111]
- 10033 09 Paralleled Laplacian of Gaussian (LoG) edge detection algorithm by using GPU [10033-105]
- 10033 0A Extraction scenes point features on noisy digital images [10033-196]
- 10033 0B An evaluation method of ATR algorithm based on decision tree [10033-233]
- 10033 0C Two-step matching strategy combining global-local descriptor [10033-75]
- 10033 0D Research of methods for target extraction from ISAR image [10033-34]
- 10033 0E Feature extraction and image retrieval based on AlexNet [10033-33]

#### SESSION 2 TARGET TRACKING AND DETECTION

- 10033 0F Detection of range-distributed targets in compound Gaussian clutter without secondary data [10033-266]
- 10033 0G A robust object tracking algorithm in complex environment [10033-77]

A new image segmentation method based on partial adaptive thresholds

Local kernel mapping based piecewise constant model for medical image segmentation

Image segmentation using Voronoi diagram

SESSION 5 IMAGE DENOISING AND FUSION

Global denoising for 3D MRI

An effective algorithm for noise variance estimation in shearlet domain

Improved nonlocal means method based on adaptive pre-classification for image denoising

Improved de-noising method based on sparse representation for remote sensing image

Two-dimensional noise reduction in optical coherence tomography based on the shearlet transform

An image-noise estimation approach using singular value decomposition

An efficient adaptive total variation regularization for image denoising for mobile communication in 5G

Multi-angle SAR non-coherent image fusion algorithm based on HIS statistic characteristics

NSCT domain and regional texture smoothness of Infrared and visible light image fusion

Image fusion based on group sparse representation

Effects of image fusion on the information capacity of ZY-3 imagery

Color image fusion based on simplified pulse coupled neural network and HSV color space

Image fusion quality evaluation based on quantized DCT coefficients

SESSION 6 IMAGE ENHANCEMENT AND RESTORATION

Fractional differential algorithm for texture and contrast enhancement

PSF estimation for blind motion deblurring with image edge prior
### SESSION 7  IMAGE ANALYSIS AND CLASSIFICATION

| 10033 25 | A variational approach to restore targets of range-gated imaging in scattering environments [10033-130] |
| 10033 26 | A novel enhancement method for fog-degraded images based on DBLA [10033-152] |
| 10033 27 | 1-D integral image for enhancing efficiency and effectiveness of probabilistic occupancy map-based people localization approach [10033-185] |
| 10033 28 | Single image blind motion deblurring [10033-141] |
| 10033 29 | Fast single image defogging method based on physical model [10033-30] |
| 10033 2A | An improved unsharp masking sharpening algorithm for image enhancement [10033-35] |
| 10033 2B | Semi-supervised classification of hyperspectral imagery based on stacked autoencoders [10033-188] |
| 10033 2C | Hyperspectral imagery classification based on probabilistic classification vector machines [10033-189] |
| 10033 2D | Very high resolution images classification by fine tuning deep convolutional neural networks [10033-91] |
| 10033 2E | Fast image clustering based on convolutional neural network and binary K-means [10033-78] |
| 10033 2F | SOFM-type artificial neural network for the non-parametric quality-based classification of potatoes [10033-42] |
| 10033 2G | Determination of dry matter content in composted material based on digital images of compost taken under mixed visible and UV-A light [10033-54] |
| 10033 2H | Maturity classification for sewage sludge composted with rapeseed straw using neural image analysis [10033-56] |
| 10033 2I | Image analysis techniques in the study of slug behaviour [10033-99] |
| 10033 2J | IT system for the identification and classification of soil valuation classes [10033-69] |
| 10033 2K | SURF and KPCA based image perceptual hashing algorithm [10033-85] |
| 10033 2L | Software supporting definition and extraction of the quality parameters of potatoes by using image analysis [10033-67] |
| 10033 2M | Use of computer image analysis methods to evaluate the quality topping sugar beets with using artificial neural networks [10033-148] |
| 10033 2N | An IT system for the simultaneous management of vector and raster images [10033-68] |
### Characterizing the time-frequency image by morphological pattern spectrum for evaluating electromagnetic environment complexity  
[10033-90]

### A new plantar surface reference system for pressure study  
[10033-96]

### SESSION 8  IMAGE INFORMATION MANAGEMENT

#### 10033 2Q  A novel lossless information hiding scheme based on histogram shifting of residual image  
[10033-101]

#### 10033 2R  Secure chaos-based substitution with diffusion for highly auto-correlated data in image encryption  
[10033-206]

#### 10033 2S  A fast 1D chaotic map-based image encryption using generalized Fibonacci-Lucas transform and bidirectional diffusion  
[10033-238]

#### 10033 2T  A novel biometric image encryption algorithm based on compressed sensing and dual-tree complex wavelet transform  
[10033-165]

#### 10033 2U  A SIFT-based robust watermarking scheme in DWT-SVD domain using majority voting mechanism  
[10033-4]

#### 10033 2V  A dual color image watermarking algorithm based on chaotic scrambling and wavelet transform  
[10033-106]

#### 10033 2W  Research of image compression algorithm based on wavelet transformation  
[10033-71]

#### 10033 2X  Credit card account numbers detection and extraction from camera-based images  
[10033-204]

#### 10033 2Y  A new robust multiple description coding method for image based on block compressed sensing  
[10033-216]

#### 10033 2Z  Reversible watermarking for 2D CAD engineering graphics using asymmetric histogram shifting and complementary embedding  
[10033-135]

#### 10033 30  A new gray-scale watermark method based on irregular LDPC codes with Unequal Error Protection (UEP)  
[10033-38]

#### 10033 31  Informative and compressed features for aircraft detection in object recognition system  
[10033-18]

#### 10033 32  A novel image encryption method based on fractional Fourier transform and odd-even quantification  
[10033-192]

#### 10033 33  Research of digital image watermarking algorithm based on DCT  
[10033-170]

#### 10033 34  A novel image secret sharing scheme based on pixel field  
[10033-190]

#### 10033 35  A computer method to analyse the impact of ultrasound frequency on the brightness of USG images of muscle cross-sections  
[10033-259]

</table>

**SESSION 11  IMAGE DETECTION AND APPLICATION**

| 10033 3U | Fabric defect detection based on wavelet transform and background estimation [10033-133] |
| 10033 3V | Inshore ship detection with high-resolution SAR data using salience map and kernel density [10033-244] |
| 10033 3W | A study of the potential of using worldview-2 of images for the detection of red attack pine tree [10033-172] |
| 10033 3X | UAV reconnaissance images targeting method [10033-163] |
| 10033 3Y | A defect detection method based on sub-image statistical feature for texture surface [10033-157] |
| 10033 3Z | A new A-star algorithm adapted to the semi-automatic detection of cracks within grey level pavement images [10033-52] |
| 10033 40 | Eye feature points detection by CNN with strict geometric constraint [10033-225] |
| 10033 41 | A new feature selection method for the detection of architectural distortion in mammographic images [10033-114] |
| 10033 42 | Rear-view vehicle detection based on MSER and spatial combination feature description [10033-232] |
| 10033 43 | Model recommendation for pedestrian detection [10033-215] |
| 10033 44 | Spatiotemporal saliency detection using border connectivity [10033-143] |
### SESSION 12 SUPER-RESOLUTION IMAGE AND COMPUTATIONAL PHOTOGRAPHY

| 10033 45 | Uyghur language text detection in images [10033-70] |
| 10033 46 | Blind authentication for detecting multi-image forgery [10033-243] |

**Implementation of ill-sampled image geometry super-resolution processing technology** [10033-20]

**An edge-preserving iterative back-projection method for image super-resolution** [10033-255]

**Super-resolution reconstruction algorithm based on local self-similarity** [10033-124]

**Image super-resolution via multistage sparse coding** [10033-131]

**Super-resolution reconstruction based on adaptive regularization using constrained particle swarm optimization** [10033-62]

**Single image super resolution of 3D MRI using local regression and intermodality priors** [10033-5]

**Three-dimensional point cloud registration based on ICP algorithm employing K-D tree optimization** [10033-261]

**Stepless digital zoom for high definition camera** [10033-221]

**Image super-resolution based on self-similarity and various patch size** [10033-16]

**The optimization and implementation of the auto-exposure algorithm based on image entropy** [10033-250]

### SESSION 13 MEDICAL IMAGE PROCESSING

| 10033 4H | Lumbar spinal finite element analysis in a gravity environment [10033-110] |
| 10033 4I | CT reconstruction from sparse projections based on extrapolation in Fourier domain [10033-66] |
| 10033 4J | GM-Citation-KNN: Graph matching based multiple instance learning algorithm [10033-7] |
| 10033 4K | Medical image fusion using pulse coupled neural network and multi-objective particle swarm optimization [10033-191] |
| 10033 4L | Atlas-based segmentation of neck muscles from MRI for the characterisation of Whiplash Associated Disorder [10033-12] |
| 10033 4M | Improvement of mass detection in mammogram using multi-view information [10033-112] |
| 10033 4N | Segmentation and classification of offline hand drawn images for the BGT neuropsychological screening test [10033-72] |
| 10033 4O | A fast iris localization algorithm under visible light condition [10033-180] |
| 10033 4P | Support vector machine and morphological processing algorithm for red blood cell identification [10033-9] |

**SESSION 14  IMAGE PROCESSING TECHNOLOGIES**

| 10033 4Q | Robust scene text detection based on color consistency [10033-138] |
| 10033 4R | Particle detection of porous media using scanning electron microscope images [10033-11] |
| 10033 4S | Copy-move forgery detection using improved SIFT [10033-83] |
| 10033 4T | Refinement for Morse decompositions of vector fields using robust critical simplexes [10033-81] |
| 10033 4U | Snow accumulation rendering algorithms introducing image processing in virtual reality [10033-22] |
| 10033 4V | Multi-scale and multi-GMM pooling based on Fisher Kernel for image representation [10033-226] |
| 10033 4W | Accelerating CNN’s forward process on mobile GPU using OpenCL [10033-155] |
| 10033 4X | Blind image quality assessment with complete pixel-level information [10033-84] |
| 10033 4Y | Tone correction through a spherical color model [10033-122] |
| 10033 50 | Automatic design of heat sink using genetic algorithms, Lindenmayer systems and digital image processing [10033-249] |

**SESSION 15  FILTER DESIGN AND SIGNAL PROCESSING**

<p>| 10033 51 | Improved adaptive convex combination of LMS algorithm based on conjugate gradient method [10033-125] |
| 10033 52 | A filter design method for beam hardening correction in middle-energy x-ray computed tomography [10033-220] |
| 10033 53 | A new adaptive weighted mean filter for removing high density impulse noise [10033-28] |
| 10033 54 | A novel method for block ambiguities of independent component analysis using previous demixing matrices [10033-242] |
| 10033 55 | Artifact removal for physiological signals via wavelets [10033-153] |</p>

A robust visual tracking method with restricted Boltzmann machines based classifier [10033-74]

Image processing in dimensional measurement for hot large forgings based on laser-aided binocular machine vision system [10033-76]

High-speed railway clearance surveillance system based on convolutional neural networks [10033-213]

Bag of visual word model based on binary hashing and space pyramid [10033-211]

Feature pooling for small visual dictionaries [10033-60]

Indoor robot 3D scene reconstruction optimization using planar features [10033-183]

Selective background prior for saliency detection [10033-210]

SESSION 18 COMPUTER AND COMMUNICATION ENGINEERING

A new method of virtual Han Chang’an City navigation system [10033-251]

A Kalman-filter-based wireless clock synchronization method in indoor localization [10033-53]

Transfer sparse machine: matching joint distribution by subspace learning and classifier transduction [10033-121]

A dropout distribution model on deep networks [10033-47]

Ambiguity resolving in parameter estimation of a single near-field source with uniform circular array via clustering [10033-128]

Clustering by exponential density analysis and find of cluster centers based on genetic algorithm [10033-144]

Symbol-by-symbol detection for turbo-coded FTN aided with precoding [10033-61]

A mesh simplification algorithm based on vertex importance and hierarchical clustering tree [10033-161]

An ant colony algorithm based on differential evolution [10033-132]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Honorary Chairs

Zhang Jingzhong, Chinese Academy of Sciences (China)
Chin-Chen Chang, Feng Chia University (Taiwan)

International Advisory Committee

Yuri Rzhanov, University of New Hampshire (United States)
Lin Zhouchen, Peking University (China)

Conference Chairs

Charles M. Falco, College of Optical Sciences, The University of Arizona (United States)
Wang Xiaooyu, Sichuan Province Computer Society (China)
Zhou Jiliu, Chengdu University of Information Technology (China)

Program Committee Chairs

Xudong Jiang, Nanyang Technological University (Singapore)
Zhang Yi, Sichuan University (China)
Qin Zhiguang, University of Electronic Science and Technology (China)
Pan Wei, Southwest Jiaotong University (China)

Steering Committee Chairs

Jamshid Dehmeshki, Kingston University (United Kingdom)
Wang Xiaojing, Chengdu Institute of Computer Applications (China)
Chen Xingshu, Sichuan University (China)

Organizing Committee Chair

Changyuan Song, Sichuan Province Computer Federation (China)

Publicity Chairs

Zhu Guobin, University of Electronic Science and Technology (China)
Xiang Qian, Sichuan Province Computer Federation (China)
Technical Committee Chairs

Zhang Yong, Chengdu Institute of Computer Applications (China)
Liu Zhang, Chengdu Institute of Computer Applications (China)
Ismail Rakip Karas, Karabük University (Turkey)

Technical Committee

Xiangyang Hao, Information Engineering University (China)
Introduction

We had the great honor of organizing the Eighth International Conference on Digital Image Processing (ICDIP 2016). It was truly a great pleasure for us to greet more than 250 participants from many different countries. We firmly believe that ICDIP will become an important international event in the field of Digital Image Processing.

The Eighth International Conference on Digital Image Processing (ICDIP 2016) was co-sponsored by Sichuan Province Computer Federation, International Association of Computer Science and Information Technology, Chengdu University of Information Technology and Chinese Academy of Sciences Chengdu Institute of Computer Applications, and assisted by Sichuan University, University of Electronics Science and Technology of China, Southwest Jiaotong University, and Chengdu Young Education Consulting Co., Ltd.

The objective of this conference was to provide a platform for the participants to report and review innovative ideas and up-to-date progress and developments and discuss novel approaches to application in the digital image processing field. It is sincerely hoped that the research and development in digital image processing will be improved and the international cooperation sharing the common interest enhanced.

On behalf of other Co-Chairs, and the Organization Committee of ICDIP 2016, we would like to express our heartfelt thanks for our sponsors and cooperating organizers for all they have done for ICDIP 2016. Thanks also to all the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us to make it possible, to the Program Technical Committee for their effective work and valuable advice, the Conference Secretary, and to the editors at SPIE for their tireless efforts and outstanding service in preparing and publishing the proceedings.

Xudong Jiang
