Ultrahigh-resolution robust needle probe for high-speed interstitial OCT imaging at 800 nm (Conference Presentation) (Withdrawal Notice)

Scott Wu Yuan, Xingde Li

Scott Wu Yuan, Xingde Li, "Ultrahigh-resolution robust needle probe for high-speed interstitial OCT imaging at 800 nm (Conference Presentation) (Withdrawal Notice)," Proc. SPIE 10053, Optical Coherence Tomography and Coherence Domain Optical Methods in Biomedicine XXI, 100530D (1 February 2018); doi: 10.1117/12.2254938

SPIE.

Event: SPIE BiOS, 2017, San Francisco, California, United States

Ultrahigh-resolution robust needle probe for high-speed interstitial OCT imaging at 800 nm (Conference Presentation) (Withdrawal Notice)

Proc. SPIE 10053, 100530D (2017)

Online Publication Date: 19 April 2017

Withdrawn from Publication: 1 February 2018

Conference Date: 30 January–1 February 2017

Conference Location: San Francisco, California, United States

Conference Title: Optical Coherence Tomography and Coherence Domain Optical Methods in Biomedicine XXI

Conference Chairs: James G. Fujimoto, Joseph A. Izatt, Valery V. Tuchin

[Scott Wu Yuan, Xingde Li](#)

Johns Hopkins Univ. (United States)

Publisher's Note: This conference presentation, originally published on 19 April 2017, was withdrawn per author request.
