Volume 10069

Proceedings of SPIE, 1605-7422, V. 10069

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Multiphoton Microscopy in the Biomedical Sciences XVII, edited by Ammasi Periasamy,
Peter T. C. So, Karsten König, Xiaoliang S. Xie, Proc. of SPIE Vol. 10069, 1006901
© 2017 SPIE · CCC code: 1605-7422/17/\$18 · doi: 10.1117/12.2276744

Proc. of SPIE Vol. 10069 1006901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
xi	<i>Conference Committee</i>
xv	<i>Introduction</i>

SECOND/THIRD HARMONIC GENERATION I

10069 06	Multiphoton tomography of the human eye (Invited Paper) [10069-5]
10069 08	Enhancing resolution and contrast in second-harmonic generation microscopy using an advanced maximum likelihood estimation restoration method [10069-7]
10069 09	Orientation analysis of collagen fibers in healing tendon by using second-harmonic-generation microscopy [10069-8]

SECOND/THIRD HARMONIC GENERATION II

10069 0B	Mapping the orientation of corneal sutural lamellae by means of backward-scattered SHG microscopy [10069-11]
----------	---

IN VIVO/INTRAVITAL IMAGING

10069 0C	In vivo multiphoton microscopy beyond 1 mm in the brain [10069-12]
10069 0D	Neuroscience imaging enabled by new highly tunable and high peak power femtosecond lasers [10069-13]

BIOMEDICAL APPLICATIONS OF COHERENT RAMAN I

10069 0M	Hyperspectral stimulated Raman scattering imaging facilitates accurate diagnosis of human prostate cancer (Invited Paper) [10069-22]
10069 0O	Multimodal nonlinear optical imaging of cartilage development in mouse model [10069-24]

BIOMEDICAL APPLICATIONS OF COHERENT RAMAN II

10069 0T	New approaches to intracellular drug imaging by stimulated Raman scattering microscopy [10069-29]
----------	--

COHERENT RAMAN TECHNICAL DEVELOPMENT I

- 10069 0Y **Multi-wavelength time-lens source and its application to nonresonant background suppression for coherent anti-Stokes Raman scattering microscopy** [10069-34]

COHERENT RAMAN TECHNICAL DEVELOPMENT II

- 10069 0Z **CARS microscopy enables BISTRO measurements (Invited Paper)** [10069-35]
- 10069 11 **Stimulated Raman spectral imaging by microsecond delay-line tuning** [10069-37]
- 10069 12 **Sparse sampled hyperspectral stimulated Raman scattering microscopy: a theoretical investigation** [10069-38]
- 10069 14 **A flexible and rapid frequency selective scheme for SRS microscopy** [10069-40]
- 10069 15 **Ultra-broadband coherent anti-Stokes Raman scattering microscopy with a dynamically power-tuned Stokes supercontinuum** [10069-41]

FLIM/FRET/FCS I

- 10069 16 **TCSPC online-FLIM at a speed of 10 images per second (Invited Paper)** [10069-42]
- 10069 17 **Fluorescence lifetime FRET imaging of receptor-ligand complexes in tumor cells in vitro and in vivo (Invited Paper)** [10069-44]
- 10069 18 **Frequency domain phosphorescence lifetime Imaging measurements and applications by ISS FastFLIM and multi pulse excitation** [10069-45]
- 10069 1B **Fluorescence lifetime imaging of calcium flux in neurons in response to pulsed infrared light** [10069-48]
- 10069 1C **A novel pulsed STED microscopy method using FastFLIM and the phasor plots (Invited Paper)** [10069-100]

FLIM/FRET/FCS II

- 10069 1E **From morphology to clinical pathophysiology: multiphoton fluorescence lifetime imaging at patients' bedside** [10069-49]
- 10069 1F **Two-Photon-Excited Fluorescence (TPEF) and Fluorescence Lifetime Imaging (FLIM) with sub-nanosecond pulses and a high analog bandwidth signal detection** [10069-50]

METABOLISM-NADH/FAD/TRYPHTOPHAN I

- 10069 1I **Correlated oxygen sensing PLIM, cell metabolism FLIM and applications (Invited Paper)** [10069-53]
- 10069 1J **In vivo multiphoton imaging and quantification of cytoplasmic and nuclear metabolism in the hepatobiliary system** [10069-54]

METABOLISM-NADH/FAD/TRYPHTOPHAN II

- 10069 1K **Genetically encoded sensors and fluorescence microscopy for anticancer research (Invited Paper)** [10069-55]
- 10069 1L **Effects of anti-cancer drug doxorubicin on endogenous biomarkers NAD(P)H, FAD and Trp in prostate cancer cells: a FLIM study (Invited Paper)** [10069-56]
- 10069 1P **Pump-probe microscopy of respiratory chain pigments: towards non-fluorescent label-free metabolic imaging** [10069-60]

TECHNOLOGY DEVELOPMENT

- 10069 1Q **Selection of proper objective lens for the higher-order multiphoton microscopy at the 1700-nm window** [10069-61]
- 10069 1R **Identification of intramural metastasis in esophageal cancer using multiphoton microscopy** [10069-62]
- 10069 1S **Ten years of biophotonics single-photon SPAD imager applications: retrospective and outlook** [10069-63]
- 10069 1T **High-speed amplitude modulation of femtosecond laser pulses for frequency-multiplexed two-photon imaging** [10069-64]

POSTER SESSION

- 10069 1X **Quantitative multi-parameter analysis of single molecule dynamics by PIE FastFLIM microscopy (Invited Paper)** [10069-43]
- 10069 1Y **Towards in vivo breast skin characterization using multiphoton tomography** [10069-68]
- 10069 20 **Femtosecond two-photon absorption spectra and permanent electric dipole moment change of tryptophan, 2-aminopurine and related intrinsic and synthetic fluorophores** [10069-70]
- 10069 22 **Simultaneous acquisition of trajectory and fluorescence lifetime of moving single particles** [10069-72]

- 10069 24 **Optimizing ultrafast wide field-of-view illumination for high-throughput multi-photon imaging and screening of mutant fluorescent proteins** [10069-74]
- 10069 27 **All-fiber nonlinear microscopy at 1550 nm using a double-clad fiber coupler** [10069-77]
- 10069 28 **Visualization of active ingredients uptake in seed coats with stimulated Raman scattering microscopy** [10069-78]
- 10069 29 **Absorption characterization of immersion medium for multiphoton microscopy at the 1700nm window** [10069-79]
- 10069 2B **In situ monitoring of collagen fibers in human skin using a photonic-crystal-fiber-coupled, hand-held, second-harmonic-generation microscope** [10069-81]
- 10069 2E **Multimodal imaging of vocal fold scarring in a rabbit model by multiphoton microscopy (Best Student Paper Award)** [10069-84]
- 10069 2F **Optimum repetition rate and pulse duration studies for two photon imaging** [10069-85]
- 10069 2G **In vivo metabolic imaging of mouse tumor models in response to chemotherapy (JenLab Young Investigator Award)** [10069-86]
- 10069 2H **Rapid hyperspectral, vibrationally resonant sum-frequency generation microscopy** [10069-87]
- 10069 2I **The effect of changing the numerical aperture in SHG microscopy of cartilage** [10069-89]
- 10069 2J **Label-free imaging of cortical structures with multiphoton microscopy** [10069-90]
- 10069 2K **Epi-direction detected multimodal imaging of an unstained mouse retina with a Yb-fiber laser** [10069-91]
- 10069 2L **In vivo three-photon activity imaging of GCaMP6-labeled neurons in deep cortex and the hippocampus of the mouse brain (JenLab Young Investigator Award)** [10069-92]
- 10069 2M **Multimodal optical imaging database from tumour brain human tissue: endogenous fluorescence from glioma, metastase and control tissues (Best Student Paper Award)** [10069-94]
- 10069 2P **Spatial Frequency Modulated Imaging (SPIMI) with amplitude or phase grating from a spatial light modulator (Best Student Paper Award)** [10069-97]
- 10069 2R **Differential levels of metabolic activity in isolated versus confluent/partially confluent HeLa cells are analyzed by autofluorescent NAD(P)H using multi-photon FLIM microscopy** [10069-99]
- 10069 2T **Development of simple and robust femtosecond optical parametric oscillator for multiphoton imaging** [10069-102]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Session Chairs

- 1 Keynote Session
Ammasi Periasamy, University of Virginia (United States)
- 2 Second/Third Harmonic Generation I
Paul J. Campagnola, University of Wisconsin-Madison (United States)
- 3 Second/Third Harmonic Generation II
Paul J. Campagnola, University of Wisconsin-Madison (United States)
Kevin W. Eliceiri, University of Wisconsin-Madison (United States)
- 4 In Vivo/Intravital Imaging
Peter T. C. So, Massachusetts Institute of Technology (United States)
Arnd K. Krueger, Spectra-Physics (United States)
- 5 Biomedical Applications of Coherent Raman I
Ji-Xin Cheng, Purdue University (United States)
- 6 JenLab Young Investigator Award Papers Presentation
Ammasi Periasamy, University of Virginia (United States)
- 7 Biomedical Applications of Coherent Raman II
Wei Min, Columbia University (United States)
- 8 Coherent Raman Technical Development I
Marcus T. Cicerone, National Institute of Standards and Technology (United States)
- 9 Coherent Raman Technical Development II
Eric O. Potma, University of California, Irvine (United States)
- 10 FLIM/FRET/FCS I
Yuansheng Sun, ISS, Inc. (United States)
Wolfgang Becker, Becker & Hickl GmbH (Germany)
- 11 FLIM/FRET/FCS II
Margarida Barroso, Albany Medical College (United States)

- 12 Metabolism-NADH/FAD/Tryptophan I
Elena V. Zagaynova, Nizhny Novgorod State Medical Academy
(Russian Federation)
- 13 Metabolism-NADH/FAD/Tryptophan II
Angelika C. Rueck, Universität Ulm (Germany)
- 14 Technology Development
Karsten König, Universität des Saarlandes (Germany)

Introduction

Multiphoton microscopy has been established as the 3D imaging method of choice for studying biomedical specimens from single cells and whole animals to patients with sub-micron resolution. 26 years have passed since the realization of two-photon laser scanning microscopy. The ever-expanding scope of applications and the continuing instrumental innovations require a forum where new ideas can be exchanged and presented. Our conference at the SPIE Photonics West meeting continues to address this need.

This is the 17th year of this conference, and it began with four keynote lectures from leaders in the field:

- Dr. Paras N. Prasad, University of New York at Buffalo, (United States), **"Multiphoton microscopy and image guided light activated therapy using nanomaterials"**
- Dr. Martin J. Booth, University of Oxford (United Kingdom), **"Dynamic optics for multi photon microscopy"**
- Dr. Na Ji, Howard Hughes Medical Institute, (United States), **"Wavefront shaping enables clearer and faster two-photon fluorescence microscopy"**
- Dr. Chi-Kuang Sun, National Taiwan University (Taiwan), **"Molecular imaging of melanin distribution in vivo and quantitative differential diagnosis of human pigmented lesions using label-free harmonic generation biopsy"**

For the sixth year in a row, the conference included the JenLab Young Investigator Award, in addition to our regular poster awards. The JenLab Young Investigator Award is sponsored by JenLab GmbH (Germany). The award selection committee included Drs. Arnd Krueger, Newport-Spectra Physics, (United States), Francesca Pavone, University of Florence (Italy), Paul Campagnola, University of Wisconsin-Madison, (United States), Conor Evans, Massachusetts General Hospital, (United States), and the conference chairs. The selection process included reviewing seven abstracts, manuscripts, and poster presentations. Two finalists were selected for oral presentation after their poster presentation. The two finalists were:

1. Mr. Tianyu Wang, Cornell University (United States), **"Multimodal optical imaging database from tumor brain human tissue: endogenous fluorescence from glioma, metastasis and control tissues."** (Paper 10069-94)
2. Ms. Maria Lukina, Nizhny Novgorod State Medical Academy (Russian Federation), **"In vivo metabolic imaging of mouse tumor models in response to chemotherapy"** (Paper 10069-86)

The review panel selected **Mr. Tianyu Wang, Cornell University, (United States)** as the winner of the JenLab Young Investigator Award 2017. The winner received a certificate and \$2000. This year, for the first time, we gave a certificate and \$500 award for the runner-up. The awards were presented by **Dr. Karsten König, President and Founder of JenLab GmbH, Germany.**

For 17 years in a row, the conference organized poster awards for the students and postdoctoral fellows. The poster award was donated by all of the conference sponsors including: Applied Scientific Instruments (ASI), Becker & Hickl, Carl Zeiss, Chroma Technology, Coherent, ISS Inc., Leica Microsystems, Semrock (IDEX), and Spectra Physics (A Newport Company).

The 4 poster award winners were:

1. Alexei Kazarine, McGill University (Canada), "**Multimodal imaging of vocal fold scarring in a rabbit model by multiphoton microscopy**" (Paper 10069-84)
2. Fanny Poulon, Institut National de Physique Nucléaire et de Physique des Particules (France), "**Multimodal optical imaging database from tumour brain human tissue: endogenous fluorescence from glioma, metastasis and control tissues**" (Paper 10069-94)
3. Michael D. Young, Colorado School of Mines (United States); "**Spatial frequency modulated imaging (SPIFI) with amplitude or phase grating from a spatial light modulator**" (Paper 10069-97)
4. Chenyang Wen, The Chinese University of Hong Kong (Hong Kong, China), "**High-speed focal plane control via a liquid-crystal spatial light modulator for light sheet microscopy**" (Paper 10069-69)

Some of the most valuable contributions in this volume are articles written by highly experienced practitioners of multiphoton microscopy. They have enumerated the most important considerations in designing multiphoton microscopes and imaging experiments. Further, updates on the state-of-the-art commercial multiphoton microscope systems are included. This volume also features articles describing some recent advances in major multi-photon microscope components and applications including laser light sources, ultra-fast optics, filters, FRET, FLIM, FCS, Raman, CARS, SRS and CRS microscopy and spectroscopy, single molecule, endoscopy, in vivo/intravital imaging, metabolism measurements including NADH, FAD, tryptophan in cells and tissues, and various scientific and clinical applications.

On a personal note, the conference chairs are grateful for the participation of all authors and session chairs and acknowledge the innovation-driven manufacturers and sponsors of this conference for their enthusiastic support in organizing this conference successfully for the last 16 years. We look forward to other exciting conferences in the future and welcome your continued participation and support.
