Proc. of SPIE Vol. 10127 1012701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 APPLICATIONS, MATERIALS, AND PROCESSES I

10127 02	Effective public security features for embossed holograms (Invited Paper) [10127-1]
10127 03	Coherent backlight unit using holographic optical elements for full-color flat-panel holographic display [10127-2]
10127 04	Backside imaging of a microcontroller with common-path digital holography [10127-3]
10127 05	Digital holographic microtomography of fusion spliced optical fibers [10127-4]

SESSION 2 HOLOGRAPHY, ART, AND PERCEPTION

10127 06	Holographic data visualization: using synthetic full-parallax holography to share information [10127-5]
10127 07	Sonorous images through digital holographic images [10127-6]
10127 08	Holographic space: presence and absence in time [10127-7]

SESSION 3 APPLICATIONS, MATERIALS, AND PROCESSES II

10127 0A	Mass production of volume holographic optical elements (vHOEs) using Bayfol® HX photopolymer film in a roll-to-roll copy process (Invited Paper) [10127-9]
10127 0B	Holographic interferometric and correlation-based laser speckle metrology for 3D deformations in dentistry [10127-10]
10127 0C	HoloNetwork: communicating science through holography [10127-11]
10127 0D	Numerical analysis of Bragg regime polarization gratings by rigorous coupled-wave analysis [10127-12]
10127 0E	Changes in diffraction efficiency of gratings with high fructose corn syrup by aging [10127-13]

SESSION 4	DIGITAL HOLOGRAPHY I
10127 OH	Blind digital holographic microscopy [10127-16]
10127 OI	Sparsity-based fast CGH generation using layer-based approach for 3D point cloud model [10127-17]
10127 OJ	Near-to-eye electroholography via guided-wave acousto-optics for augmented reality [10127-18]
10127 OK	Graphics processing unit accelerated numerical model for collinear holographic data storage system [10127-19]
10127 OL	An analysis of printing conditions for wavefront overlapping printing [10127-20]
10127 OM	Computation of exact diffraction field from its distributed samples [10127-21]
SESSION 5	DIGITAL HOLOGRAPHY II
10127 ON	Investigating numerical reconstruction quality and sparsity constraints on the holographic fringe pattern in digital holography [10127-22]
10127 OO	Off-axis self-interference incoherent digital holographic microscopy [10127-23]
10127 OP	An accurate algorithm to find the axial position of an object in lens-free inline digital holography [10127-24]
10127 OQ	Fast computer-generated hologram computation using rendered depth map image [10127-26]
	POSTER SESSION
10127 OR	Holographic recording mechanism in albumin films with iron ions [10127-27]
10127 OS	Angular multiplexing holograms of four images recorded on photopolymer films with recording-film-thickness-dependent holographic characteristics [10127-28]
10127 OT	CuBE: Coherent u Beam Educator [10127-29]
10127 OU	Advanced channel modeling of holographic data storage considering degradation shapes of reconstructed image [10127-30]
10127 OV	Lensless digital holographic microscope using in-line configuration and laser diode illumination [10127-31]
10127 OW	Effect of monomer diffusion on photoinduced shrinkage in photopolymer layers determined by electronic speckle pattern interferometry [10127-32]

- 10127 0X **Compact holographic optical element-based electronic speckle pattern interferometer for rotation and vibration measurements** [10127-33]
- 10127 0Y **Full-color high-definition CGH reconstructing hybrid scenes of physical and virtual objects** [10127-34]
- 10127 0Z **Comparison of computation time and image quality between full-parallax 4G-pixels CGHs calculated by the point cloud and polygon-based method** [10127-35]
- 10127 10 **Holographic gratings with cupric chloride, PVA, and organic dye** [10127-36]
- 10127 11 **Albumin holograms with gentian violet dye** [10127-37]
- 10127 12 **Nopal cactus film** [10127-38]
- 10127 13 **Recording of digital holograms of 3D scenes with depth up to 0.5 meter** [10127-39]
- 10127 14 **Analysis of security of optical encryption with spatially incoherent illumination technique** [10127-40]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jean-Emmanuel Broquin, IMEP-LAHC (France)
Shibin Jiang, AdValue Photonics, Inc. (United States)

Symposium Co-chairs

Connie J. Chang-Hasnain, University of California, Berkeley
(United States)
Graham T. Reed, Optoelectronics Research Centre, University of
Southampton (United Kingdom)

Program Track Chair

Liang-Chy Chien, Kent State University (United States)

Conference Chairs

Hans I. Bjelkhagen, Glyndwr University (United Kingdom) and
Hansholo Consulting Ltd. (United Kingdom)
V. Michael Bove Jr., MIT Media Laboratory (United States)

Conference Program Committee

Isabel Azevedo, Universidade de Aveiro (Portugal)
David Brotherton-Ratcliffe, Geola Technologies Ltd. (United Kingdom)
Frank C. Fan, Shenzhen AFC Technology Company, Ltd. (China)
Gerald L. Heidt, Wasatch Photonics, Inc. (United States)
Toshio Honda, Toppan Printing Company, Ltd. (Japan)
Fujio Iwata, Toppan Printing Company, Ltd. (Japan)
Michael A. Klug, Magic Leap, Inc. (United States)
Alkiviadis Lembessis, The Hellenic Institute of Holography (Greece)
Deanna McMillen, L-3 Communications EOTech (United States)
Martina L. Mrongovius, RMIT University (Australia), Center for the
Holographic Arts (United States), and Academy of Media Arts,
Cologne KHM (Germany)
Hiroshi Yoshikawa, Nihon University (Japan)

Introduction

The SPIE conference on Practical Holography XXXI: Materials and Applications took place 30 January–1 February 2017 at the Moscone Center in San Francisco. The conference is an important international event in the field of holographic applications and recording materials. The conference provides a venue for all aspects of holography: art, display, metrology, scientific, security, storage, materials and processes, CGHs, and HOEs. The conference also brings together participants from all over the world. The Practical Holography conference is part of SPIE Photonics West 2017. The large Photonics West exhibition involved over 1,400 companies.

The holography conference was chaired by Hans Bjelkhagen, Glyndŵr University (United Kingdom), and V. Michael Bove Jr., MIT Media Laboratory (United States), and attracted about 50 participants. This year's conference (as always) featured long-time participants and new members of the practical holography community sharing many novel and interesting contributions in various holographic fields during two days of oral presentations and a poster session. The oral presentations divided into three main sessions: Applications, Materials and Processes; Holography, Art, and Perception; and Digital Holography.

Ramunas Bakanas, Geola (Lithuania), demonstrated that it is possible to record digital color master holograms on photoresist materials using pulsed RGB lasers. The main application is enhanced embossed security holograms. Thomas Fäcke, Covestro AG (Germany) (formerly Bayer MaterialScience AG) described mass-production of volume HOEs in Bayfol® HX photopolymer in a roll-to-roll copying process. In the art section, Tove Noorjahaan Dalenius, De Montfort University (United Kingdom), described holographic data visualization using synthetic full-parallax holography. Sundeep Jolly, MIT (United States), described the development of a near-to-eye 3D display based on waveguide holography.

The SPIE Holography Technical Evening Event took place on 31 January at the InterContinental Hotel. It was focused on new developments, applications, holography events, and demonstrations. During the Tuesday evening event, short presentations took place. For example, Bernard Kress from Microsoft (United States) described holographic and diffractive waveguides used in VR displays, such as, in the HoloLens. A review of the HoloCenter in New York was given by Martina Mrongovius, Center for Holographic Arts (United States). Pedro Pombo, University of Aveiro (Portugal) and Fábrica Ciência Viva Science Centre (Portugal), informed us about the 11th International Symposium on Display Holography (ISDH 2018) which will take place 25–29 June 2018 at the University of Aveiro in Portugal.

The conference chairs would like to thank the authors and the program committee members for their contributions to the conference. We look forward to seeing you at next year's conference in San Francisco.
