Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>
xiii	<i>2017 Medical Imaging Award Recipients</i>

SESSION 1 EMERGING TECHNOLOGIES

10140 02	Determining local and contextual features describing appearance of difficult to identify mitotic figures [10140-1]
10140 03	Fast clustering in linear 1D subspaces: segmentation of microscopic image of unstained specimens [10140-2]
10140 04	Applications of QCL mid-IR imaging to the advancement of pathology [10140-3]
10140 05	Data-driven sampling method for building 3D anatomical models from serial histology [10140-4]
10140 06	Automatic evaluation of skin histopathological images for melanocytic features [10140-5]

SESSION 2 DETECTION AND SEGMENTATION

10140 07	Automated wholeslide analysis of multiplex-brightfield IHC images for cancer cells and carcinoma-associated fibroblasts [10140-6]
10140 08	Lumen-based detection of prostate cancer via convolutional neural networks [10140-7]
10140 09	Hierarchical patch-based co-registration of differently stained histopathology slides [10140-8]
10140 0A	Automated high-grade prostate cancer detection and ranking on whole slide images [10140-9]
10140 0B	Automated plasmodia recognition in microscopic images for diagnosis of malaria using convolutional neural networks [10140-10]
10140 0C	A model of tumor architecture and spatial interactions with tumor microenvironment in breast carcinoma [10140-11]

SESSION 3	PRECISION MEDICINE AND GRADING
10140 0D	Identification and characterization of neutrophil extracellular trap shapes in flow cytometry [10140-12]
10140 0E	FOXP3-stained image analysis for follicular lymphoma: optimal adaptive thresholding with maximal nucleus coverage [10140-13]
10140 0F	Context-sensitive patch histograms for detecting rare events in histopathological data [10140-14]
10140 0G	Automatic computational labeling of glomerular textural boundaries [10140-15]
10140 0H	Convolutional neural networks for prostate cancer recurrence prediction [10140-16]
SESSION 4	KEYNOTE AND TRENDS
10140 0I	Leveraging unsupervised training sets for multi-scale compartmentalization in renal pathology [10140-17]
10140 0J	A computational framework to detect normal and tuberculosis infected lung from H and E-stained whole slide images [10140-18]
10140 0K	Evaluation of nucleus segmentation in digital pathology images through large scale image synthesis [10140-19]
	POSTER SESSION
10140 0M	Automated epidermis segmentation in histopathological images of human skin stained with hematoxylin and eosin [10140-21]
10140 0N	Automated cancer stem cell recognition in H and E stained tissue using convolutional neural networks and color deconvolution [10140-22]
10140 0O	Convolutional neural networks for an automatic classification of prostate tissue slides with high-grade Gleason score [10140-23]
10140 0P	Heterogeneity characterization of immunohistochemistry stained tissue using convolutional autoencoder [10140-24]
10140 0Q	A computational study on convolutional feature combination strategies for grade classification in colon cancer using fluorescence microscopy data [10140-25]
10140 0R	Evaluating color performance of whole-slide imaging devices by multispectral-imaging of biological tissues [10140-26]
10140 0S	Automatic Gleason grading of H and E stained microscopic prostate images using deep convolutional neural networks [10140-27]

10140 OT	Integrative analysis on histopathological image for identifying cellular heterogeneity [10140-29]
10140 OU	Extraction of glomeruli in whole slide imaging of kidney biopsy specimens [10140-30]
10140 OV	Unsupervised segmentation of H and E breast images [10140-31]
10140 OW	Optimized color decomposition of localized whole slide images and convolutional neural network for intermediate prostate cancer classification [10140-32]
10140 OY	Panning artifacts in digital pathology images (Cum Laude Poster Award) [10140-34]
10140 OZ	Tissue classification of liver pathological tissue specimens image using spectral features [10140-36]
10140 10	Color normalization of histology slides using graph regularized sparse NMF [10140-37]
10140 11	Frequency analysis of gaze points with CT colonography interpretation using eye gaze tracking system [10140-38]
10140 13	Content-based histopathological image retrieval for whole slide image database using binary codes [10140-40]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Berkman Sahiner, U.S. Food and Drug Administration (United States)
Leonard Berliner, Weill Cornell Medical College (United States) and
New York Methodist Hospital (United States)

Conference Chairs

Metin N. Gurcan, The Ohio State University Wexner Medical Center
(United States)
John E. Tomaszewski, University at Buffalo (United States)

Conference Program Committee

Selim Aksoy, Bilkent University (Turkey)
Ulysses J. Balis, University of Michigan Health System (United States)
Rohit Bhargava, University of Illinois at Urbana-Champaign (United States)
Ulf-Dietrich Braumann, Hochschule für Technik, Wirtschaft und Kultur
Leipzig (Germany)
Eric Cosatto, NEC Laboratories America, Inc. (United States)
Scott Doyle, Rutgers, The State University of New Jersey (United States)
Michael D. Feldman, The University of Pennsylvania Health System
(United States)
David J. Foran, Rutgers Cancer Institute of New Jersey (United States)
Brandon D. Gallas, U.S. Food and Drug Administration (United States)
Marios A. Gavrielides, U.S. Food and Drug Administration (United States)
Tom R. L. Kimpe, Barco N.V. (Belgium)
Elizabeth A. Krupinski, The University of Arizona (United States)
Richard M. Levenson, University of California, Davis (United States)
Olivier Lezoray, Université de Caen Basse Normandie (France)
Anant Madabhushi, Case Western Reserve University (United States)
Derek R. Magee, University of Leeds (United Kingdom)
Anne L. Martel, Sunnybrook Research Institute (Canada)
Erik Meijering, Erasmus MC (Netherlands)
James P. Monaco, Inspirata, Inc. (United States)
Mehdi Moradi, IBM Research - Almaden (United States)
Bahram Parvin, Lawrence Berkeley National Laboratory (United States)
Josien P. W. Pluim, Image Sciences Institute (Netherlands)
Nasir M. Rajpoot, The University of Warwick (United Kingdom)
Gustavo Kunde Rohde, Carnegie Mellon University (United States)
Berkman Sahiner, U.S. Food and Drug Administration (United States)
Chukka Srinivas, Ventana Medical Systems, Inc. (United States)
Darren Treanor, University of Leeds (United Kingdom)

Jeroen van der Laak, Radboud University Nijmegen Medical Center
(Netherlands)
Aaron D. Ward, The University of Western Ontario (Canada)
Martin J. Yaffe, Sunnybrook Research Institute (Canada)
Bülent Yener, Rensselaer Polytechnic Institute (United States)

Session Chairs

- 1 Emerging Technologies
Brandon D. Gallas, U.S. Food and Drug Administration (United States)
Scott Doyle, University at Buffalo (United States)
- 2 Detection and Segmentation
Elizabeth A. Krupinski, Emory University School of Medicine (United States)
Mehdi Moradi, IBM Research - Almaden (United States)
- 3 Precision Medicine and Grading
John E. Tomaszewski, University at Buffalo (United States)
Selim Aksoy, Bilkent University (Turkey)
- 4 Keynote and Trends
Michael D. Feldman, The University of Pennsylvania Health System
(United States)
Martin Yaffe, Sunnybrook Research Institute (Canada)

Introduction

This is the fifth year of the *Digital Pathology* Conference that was introduced at SPIE's Medical Imaging Symposium in Orlando, FL in 2013. Every year since that inaugural event we have seen increased interest in cell and tissue imaging which has made Digital Pathology one of the distinguished conferences at the Medical Imaging Symposium. The quality of the presented talks, posters, and the resulting papers, like in the previous years, continues to be outstanding. This is mainly thanks to our community of digital pathology image scientists and diagnosticians who submit some of their very best work to this conference. We are grateful for their good work. We are also thankful for all the hard work of our program committee, who carefully conducted a rigorous peer-review process to ensure that only top papers are selected for presentation at the meeting.

The fifth Digital Pathology Conference took place on February 12 and 13 at the Renaissance SeaWorld, in Orlando, Florida, United States. A plenary talk was given on February 13th by Dr. Anant Madabhushi entitled "*Image based risk score predictor: predicting disease aggressiveness using sub-visual cues from image data.*" Dr. Madabhushi is an image scientist and one of the leaders in the field. Dr. Madabhushi discussed the motivation and rationale for developing image and fused data biomarkers in oncology. He illustrated the opportunity to mine both radiological and high-resolution histopathological images for data which supports both prognostic and predictive modeling in cancer. The audience was left with the clear message that there is critical information about the relationships amongst tumor cells and their host environment which can only be obtained through the use of quantitative image analytics. The keynote talk drew over 200 attendees from all the various conferences as part of the SPIE Medical imaging symposium.

A total of 41 papers were presented during the course of the meeting in both oral and poster form. The sessions included Trends, Precision Medicine and Grading, Detection and Segmentation, Machine Learning, Emerging Technologies.

We would like to acknowledge the excellent work in the following papers:

Conference finalists of the Robert F. Wagner Best Student Paper Award for Digital Pathology (10140)

Optimized color decomposition of localized whole slide images and convolutional neural network for intermediate prostate cancer classification

Paper 10140-32

Student Author: Naiyun Zhou, Stony Brook Univ. (USA)

Tissue classification of liver pathological tissue specimens image using spectral features

Paper 10140-36

Student Author: Emi Hashimoto, Saitama Medical University, Saitama (Japan)

Poster Awards

Cum Laude Poster Award

Panning artifacts in digital pathology images,
Ali R. N. Avanaki, Barco, Inc. (USA) [10140-34]

Honorable Mention Poster Award

Topological descriptors for quantitative prostate cancer morphology analysis,
Peter J. Lawson, Tulane Univ. (USA); Eric Berry, Montana State Univ. (USA); J.
Quincy Brown, Tulane Univ. (USA); Brittany T. Fasy, Montana State Univ. (USA);
Carola Wenk, Tulane Univ. (USA) [10140-33]

The continued success of the Digital Pathology conference is in no small part due to the outstanding efforts of the program committee who carefully constructed the program, the Conference Chairs Drs. Berkman Sahiner and Leonard Berliner, and SPIE management who kindly guided us through all the many steps of the program organization.

Next year the Medical Imaging meeting will take place in Houston, TX. We look forward to seeing you there for another successful conference.

Metin N. Gurcan
John E. Tomaszewski

2017 Medical Imaging Award Recipients

Robert F. Wagner Best Student Paper Award

Robert F. Wagner was an active scientist in the SPIE Medical Imaging meeting, starting with the first meeting in 1972 and continuing throughout his career. He ensured that the BRH, and subsequently the CDRH, was a sponsor for the early and subsequent Medical Imaging meetings, helping to launch and ensure the historical success of the meeting. The Robert F. Wagner All-Conference Best Student Paper Award (established 2014) is acknowledgment of his many important contributions to the Medical Imaging meeting and his many important advances to the field of medical imaging.

This award is cosponsored by:

The Medical Image Perception Society

SPIE.

2017 Recipients:

First Place: **Direct measurement of Lubberts effect in CsI:Tl scintillators using single x-ray photon imaging** (10132-8)

A. Howansky, A. R. Lubinsky, Stony Brook Univ. (United States); S. K. Ghose, Brookhaven National Lab. (United States); K. Suzuki, Hamamatsu Photonics K.K. (Japan); W. Zhao, Stony Brook Univ. (United States)

Second Place: **Evaluation of a high-resolution patient-specific model of the electrically stimulated cochlea** (10135-21)

A. Cakir, Vanderbilt Univ. (United States); R. T. Dwyer, Vanderbilt Univ. Medical Ctr. (United States); J. H. Noble, Vanderbilt Univ. (United States)
