Selected Papers of the Chinese Society for Optical Engineering
Conferences held July 2016

Yueguang Lv
Weimin Bao
Guangjun Zhang
Editors

12–14 and 22–26 July 2016
Beijing and Changchun, China

Organized by
Chinese Society for Optical Engineering (China)
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)
Science and Technology on Electro-Optical Information Security Control Laboratory (China)

Sponsored by
Chinese Academy of Engineering (China)
National Natural Science Foundation of China (China)
Chinese Society for Optical Engineering (China)
China High-Tech Industrialization Association (China)

SELECTED PROCEEDINGS OF THE CHINESE SOCIETY FOR OPTICAL ENGINEERING
CONFERENCES HELD JULY 2016

10141 02 Measure short separation for space debris based on radar angle error measurement information [10141-9]
10141 03 An efficient two-dimensional ALE modelling and experimental validation for pulsed laser-matter interaction [10141-10]
10141 04 Gaussian total variation blind restoration of ground-based space object imagery [10141-18]
10141 05 Research on the development of space target detecting system and three-dimensional reconstruction technology [10141-20]
10141 06 Application of femtosecond laser range finder in space debris monitoring [10141-21]
10141 07 Modeling and correction of static pointing error of level mounting telescope [10141-28]
10141 08 Research of radiation resistant Er doped fiber for space detection [10141-41]
10141 09 A high-precision K-band LFM CW radar for range measurement [10141-45]
10141 0A Research on calibration error of carrier phase against antenna arraying [10141-51]
10141 0B The online estimation of relative alignments for multiple heads star tracker based on the invariability of inter-star angle principle [10141-56]
10141 0C Weak point target detection in star sensor [10141-69]
10141 0D Enhanced multi-view prediction structure [10141-70]
10141 0E A conjunction of photons statistic and wave interferometry in interstellar space communication [10141-71]
10141 0F Research on the optical system for space optical clock at NTSC [10141-73]
10141 0G Design and analysis of control system for VCSEL of atomic interference magnetometer [10141-74]
Fabrication of the new structure 980nm VCSEL [10141-75]

Study on the etching process GaAs-based VCSEL [10141-76]

Time-varying property of electron density in plasma sheath and its effect on EM wave at Ka band [10141-39]

Software development for electromagnetic scattering of aircraft in near space [10141-44]

Research on informational operation application of tactical loitering platform [10141-55]

Proportional navigation law design of plane-symmetrical vehicle with terminal attack angle constraint for over target flight [10141-63]

A double candidate survivable routing protocol for HAP network [10141-72]

Linear response of an instrument entitled Sky Radiometer [10141-16]

Numerical calculation of the plume infrared radiation of a long-endurance UAV [10141-23]

Application of joint orthogonal bases in compressive sensing ghost image [10141-24]

Plasma radome designed for the EMP effects defense [10141-25]

The design of parabolic cylindrical antenna with light emitting plasma [10141-59]

Research on polarization bidirectional reflectance characteristic of metal paint surfaces [10141-1]

Error analysis of angular resolution for direct intercepting measurement laser warning equipment [10141-3]

Photon counting chirped amplitude modulation lidar using an asymmetric triangular wave modulation [10141-4]

Simulation of multiplying electron distribution in electron multiplier layer for EBAPS [10141-5]

The design of cathode for organic photovoltaic devices [10141-6]

Based on B-splines non-rigid registration method for atmospheric turbulence degraded image [10141-8]

Adaptive optics image restoration algorithm based on wavefront reconstruction and adaptive total variation method [10141-12]

Small high-speed dynamic target at close range laser active imaging system [10141-13]

Reflectance and reflection phase of photonic crystal with anisotropic left-handed materials [10141-14]

Highly sensitive detection using Herriott cell for laser absorption spectroscopy [10141-15]
Design and FPGA implementation of real-time automatic image enhancement algorithm

Thermostatic system of sensor in NIR spectrometer based on PID control

Based on coherent detection of Rayleigh - Brillouin temperature measurement

The review on infrared image restoration techniques

Research on pseudo-color image generation technology of the distribution of gaseous pollutants

Simulating the spatial resolution of the framing camera

A high accuracy image registration method research of polarization

Two-dimensional photon counting imaging detector based on PCB delay line anode

The relationship between the size of x-ray focal spot and image geometry definition

The method of x-ray image intensifies pixel matching and noise suppression based on the CCD

Transmission characteristics of x-ray in MCP collimator in parallel structure

Research on polarization imaging information parsing method

Fabrication of the curved artificial compound eyes with a homebuilt mold

Demonstration of single pixel computational ghost imaging with pseudo-randomly patterned illumination from a liquid crystal display

Multi-spectral image enhancement algorithm based on keeping original gray level

Measuring the thermal expansion coefficient of the carbon fiber optical tube by heterodyne laser interferometry

An algorithm of super-resolution based on phase shifting

Faint spatial object classifier construction based on data mining technology

Study on characteristics of chirp about Doppler wind lidar system

Enhancement of low quality reconstructed digital hologram images based on frequency extrapolation of large objects under the diffraction limit

Design of a solar-blind ultraviolet detection system

A novel rain removal technology based on video image
Simulative calculation of the Earth surface temperature variation in certain place of Xinjiang, China during summer daytime [10141-58]

Design of a solar-blind ultraviolet zoom lens in corona detection [10141-60]

Development and application of a thermoelectric cooler extended area blackbody [10141-61]

Enhancement system of nighttime infrared video image and visible video image [10141-64]

Infrared image gray adaptive adjusting enhancement algorithm based on gray redundancy histogram-dealing technique [10141-65]

A method of image compression based on lifting wavelet transform and modified SPIHT [10141-66]

Research on flight stability performance of rotor aircraft based on visual servo control method [10141-67]

Measurement of modulation transfer function for space remote sensing TDDICCD camera [10141-68]

Astrometric calibration for space debris with a small field of view [10141-7]

The preparation of the nonlinear optical quantum dots in organic polymer composite [10141-11]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Conference Chairs
Weimin Bao, China Aerospace Science and Technology Corporation (China)
Jianquan Yao, Tianjin University (China)
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and Physics (China)
Huilin Jiang, Changchun University of Science and Technology (China)
Ming Li, China Academy of Space Technology (China)
Yueguang Lv, China Northern Institute of Electronic Equipment (China)
Zuyan Xu, Technical Institute of Physics and Chemistry (China)
Yue Hao, Xidian University (China)
Yongjian Liu, Science and Technology on Complex Aviation Systems Simulation Laboratory (China)
Guangjun Zhang, Southeast University (China)

Title Committee
Zejin Liu, National University of Defense Technology (China)
Zizheng Gong, China Academy of Space Technology (China)
Wei Zhang, Science and Technology on Electro-Optical Information Security Control Laboratory (China)
Jin Guo, State Key Laboratory of Laser Interaction with Matter (China)
Xiangang Luo, Institute of Optics and Electronics (China)
Yadong Jiang, University of Electronic Science and Technology of China (China)

Program Committee
Jing Liu, National Astronomical Observatories (China)
Xiaoquan Sun, State Key Laboratory of Pulsed Power Laser Technology (China)
Wei Zhao, Key Laboratory of Electro-Optical Countermeasures, Test, and Evaluation Technology (China)
Shensheng Han, Shanghai Institute of Optics and Fine Mechanics (China)
Weiqi Jin, Beijing Institute of Technology (China)
Xiangjun Wang, Tianjin University (China)
Introduction

We had the great honor of organizing The Third International Symposium on Monitoring, Early Warning, Removal Technology of Space Targets and Debris, The Fourth International Conference on Frontiers in Optical Imaging Technology and Applications, and The Second International Symposium on Photoelectric Defense Technologies. It was truly a great pleasure for us to greet more than 800 participants from many different countries attending these three symposia. We firmly believe these symposia will become important international events in the field of optical technology.

The purpose of these three symposia is to provide a forum for the participants to report and review innovative ideas and up-to-date progress and developments and discuss the novel approaches to application in the optical field. It is sincerely hoped that the research and development in the optical field and international cooperation will be promoted and thus sharing of the common interest will be enhanced.

On behalf of other chairs, co-chairs, and the organization committee of these three conferences, I would like to heartily thank our sponsors and organizers for all they have done for the symposia. Thanks also to all the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us to make the symposia possible, to the program committee for their effective work and valuable advice, and especially the secretariat and the SPIE staff or their tireless effort and outstanding services in preparing the symposia and publishing the proceedings.
