Volume 10141

Proceedings of SPIE 0277-786X, V. 10141

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Selected Papers of the Chinese Society for Optical Engineering Conferences held July 2016,
edited by Yueguang Lv, Weimin Bao, Guangjun Zhang, Proc. of SPIE Vol. 10141, 1014101
© 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2262027

Proc. of SPIE Vol. 10141 1014101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

SELECTED PROCEEDINGS OF THE CHINESE SOCIETY FOR OPTICAL ENGINEERING CONFERENCES HELD JULY 2016

10141 02	Measure short separation for space debris based on radar angle error measurement information [10141-9]
10141 03	An efficient two-dimensional ALE modelling and experimental validation for pulsed laser-matter interaction [10141-10]
10141 04	Gaussian total variation blind restoration of ground-based space object imagery [10141-18]
10141 05	Research on the development of space target detecting system and three-dimensional reconstruction technology [10141-20]
10141 06	Application of femtosecond laser range finder in space debris monitoring [10141-21]
10141 07	Modeling and correction of static pointing error of level mounting telescope [10141-28]
10141 08	Research of radiation resistant Er doped fiber for space detection [10141-41]
10141 09	A high-precision K-band LFM CW radar for range measurement [10141-45]
10141 0A	Research on calibration error of carrier phase against antenna arraying [10141-51]
10141 0B	The online estimation of relative alignments for multiple heads star tracker based on the invariability of inter-star angle principle [10141-56]
10141 0C	Weak point target detection in star sensor [10141-69]
10141 0D	Enhanced multi-view prediction structure [10141-70]
10141 0E	A conjunction of photons statistic and wave interferometry in interstellar space communication [10141-71]
10141 0F	Research on the optical system for space optical clock at NTSC [10141-73]
10141 0G	Design and analysis of control system for VCSEL of atomic interference magnetometer [10141-74]

10141 OH	Fabrication of the new structure 980nm VCSEL [10141-75]
10141 OI	Study on the etching process GaAs-based VCSEL [10141-76]
10141 OJ	Time-varying property of electron density in plasma sheath and its effect on EM wave at Ka band [10141-39]
10141 OK	Software development for electromagnetic scattering of aircraft in near space [10141-44]
10141 OL	Research on informational operation application of tactical loitering platform [10141-55]
10141 OM	Proportional navigation law design of plane-symmetrical vehicle with terminal attack angle constraint for over target flight [10141-63]
10141 ON	A double candidate survivable routing protocol for HAP network [10141-72]
10141 OO	Linear response of an instrument entitled Sky Radiometer [10141-16]
10141 OP	Numerical calculation of the plume infrared radiation of a long-endurance UAV [10141-23]
10141 OQ	Application of joint orthogonal bases in compressive sensing ghost image [10141-24]
10141 OR	Plasma radome designed for the EMP effects defense [10141-25]
10141 OS	The design of parabolic cylindrical antenna with light emitting plasma [10141-59]
10141 OT	Research on polarization bidirectional reflectance characteristic of metal paint surfaces [10141-1]
10141 OU	Error analysis of angular resolution for direct intercepting measurement laser warning equipment [10141-3]
10141 OV	Photon counting chirped amplitude modulation lidar using an asymmetric triangular wave modulation [10141-4]
10141 OW	Simulation of multiplying electron distribution in electron multiplier layer for EBAPS [10141-5]
10141 OX	The design of cathode for organic photovoltaic devices [10141-6]
10141 OY	Based on B-splines non-rigid registration method for atmospheric turbulence degraded image [10141-8]
10141 OZ	Adaptive optics image restoration algorithm based on wavefront reconstruction and adaptive total variation method [10141-12]
10141 10	Small high-speed dynamic target at close range laser active imaging system [10141-13]
10141 11	Reflectance and reflection phase of photonic crystal with anisotropic left-handed materials [10141-14]
10141 12	Highly sensitive detection using Herriott cell for laser absorption spectroscopy [10141-15]

- 10141 13 **Design and FPGA implementation of real-time automatic image enhancement algorithm**
[10141-17]
- 10141 14 **Thermostatic system of sensor in NIR spectrometer based on PID control** [10141-19]
- 10141 15 **Based on coherent detection of Rayleigh - Brillouin temperature measurement** [10141-22]
- 10141 16 **The review on infrared image restoration techniques** [10141-26]
- 10141 17 **Research on pseudo-color image generation technology of the distribution of gaseous pollutants** [10141-27]
- 10141 18 **Simulating the spatial resolution of the framing camera** [10141-32]
- 10141 19 **A high accuracy image registration method research of polarization** [10141-34]
- 10141 1A **Two-dimensional photon counting imaging detector based on PCB delay line anode**
[10141-35]
- 10141 1B **The relationship between the size of x-ray focal spot and image geometry definition**
[10141-36]
- 10141 1C **The method of x-ray image intensifies pixel matching and noise suppression based on the CCD** [10141-37]
- 10141 1D **Transmission characteristics of x-ray in MCP collimator in parallel structure** [10141-38]
- 10141 1E **Research on polarization imaging information parsing method** [10141-40]
- 10141 1F **Fabrication of the curved artificial compound eyes with a homebuilt mold** [10141-42]
- 10141 1G **Demonstration of single pixel computational ghost imaging with pseudo-randomly patterned illumination from a liquid crystal display** [10141-46]
- 10141 1H **Multi-spectral image enhancement algorithm based on keeping original gray level**
[10141-47]
- 10141 1I **Measuring the thermal expansion coefficient of the carbon fiber optical tube by heterodyne laser interferometry** [10141-48]
- 10141 1J **An algorithm of super-resolution based on phase shifting** [10141-49]
- 10141 1K **Faint spatial object classifier construction based on data mining technology** [10141-50]
- 10141 1L **Study on characteristics of chirp about Doppler wind lidar system** [10141-52]
- 10141 1M **Enhancement of low quality reconstructed digital hologram images based on frequency extrapolation of large objects under the diffraction limit** [10141-53]
- 10141 1N **Design of a solar-blind ultraviolet detection system** [10141-54]
- 10141 1O **A novel rain removal technology based on video image** [10141-57]

- 10141 1P **Simulative calculation of the Earth surface temperature variation in certain place of Xinjiang, China during summer daytime** [10141-58]
- 10141 1Q **Design of a solar-blind ultraviolet zoom lens in corona detection** [10141-60]
- 10141 1R **Development and application of a thermoelectric cooler extended area blackbody** [10141-61]
- 10141 1S **Enhancement system of nighttime infrared video image and visible video image** [10141-64]
- 10141 1T **Infrared image gray adaptive adjusting enhancement algorithm based on gray redundancy histogram-dealing technique** [10141-65]
- 10141 1U **A method of image compression based on lifting wavelet transform and modified SPIHT** [10141-66]
- 10141 1V **Research on flight stability performance of rotor aircraft based on visual servo control method** [10141-67]
- 10141 1W **Measurement of modulation transfer function for space remote sensing TDDICCD camera** [10141-68]
- 10141 1X **Astrometric calibration for space debris with a small field of view** [10141-7]
- 10141 1Y **The preparation of the nonlinear optical quantum dots in organic polymer composite** [10141-11]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We had the great honor of organizing The Third International Symposium on Monitoring, Early Warning, Removal Technology of Space Targets and Debris, The Fourth International Conference on Frontiers in Optical Imaging Technology and Applications, and The Second International Symposium on Photoelectric Defense Technologies. It was truly a great pleasure for us to greet more than 800 participants from many different countries attending these three symposia. We firmly believe these symposia will become important international events in the field of optical technology.

The Third International Symposium on Monitoring, Early Warning, Removal Technology of Space Targets and Debris, The Fourth International Conference on Frontiers in Optical Imaging Technology and Applications, and The Second International Symposium on Photoelectric Defense Technologies are sponsored by the Chinese Academy of Engineering, National Natural Science Foundation of China, Chinese Society for Optical Engineering, and China High-tech Industrialization Association. These symposia are organized by Chinese Society for Optical Engineering and Photoelectronic Technology Committee, Chinese Society of Astronautics and Science and Technology on Electro-Optical Information Security Control Laboratory.

The purpose of these three symposia is to provide a forum for the participants to report and review innovative ideas and up-to-date progress and developments and discuss the novel approaches to application in the optical field. It is sincerely hoped that the research and development in the optical field and international cooperation will be promoted and thus sharing of the common interest will be enhanced.

On behalf of other chairs, co-chairs, and the organization committee of these three conferences, I would like to heartily thank our sponsors and organizers for all they have done for the symposia. Thanks also to all the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us to make the symposia possible, to the program committee for their effective work and valuable advice, and especially the secretariat and the SPIE staff or their tireless effort and outstanding services in preparing the symposia and publishing the proceedings.
