SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

High Power Lasers, High Energy Lasers, and Silicon-based Photonic Integration, edited by Lijun Wang, Zhiping Zhou
Proc. of SPIE Vol. 10152, 1015211 · © 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2264628

Proc. of SPIE Vol. 10152 1015211-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xi	<i>Introduction</i>

HIGH POWER LASERS, HIGH ENERGY LASERS, AND SILICON-BASED PHOTONIC INTEGRATION

10152 01	Transfer printing of thin-film microscale GaAs lasers on silicon [10152-1]
10152 02	Experimental study of HgCdTe imaging sensor irradiated by pulse CO₂ laser [10152-2]
10152 03	Numerical studies of the magnetic field and thermal flux reduction in anisotropic plasmas [10152-5]
10152 04	Numerical analysis of the temperature field in silicon avalanche photodiode by millisecond laser irradiation [10152-14]
10152 05	High efficiency Tm³⁺-doped fiber seed source of optimum fiber length [10152-29]
10152 06	Analysis of influence factors on 2 μm Tm³⁺-doped fiber laser output characteristics [10152-30]
10152 07	Study on CCD detector irradiated by multi-pulse laser [10152-32]
10152 08	Influence analysis of an asymmetrical suspension system on triaxial signals' phase differences of fiber optic vector hydrophones [10152-35]
10152 09	Stable and tunable single frequency mid-infrared optical parametric oscillator [10152-36]
10152 0A	Study of dual wavelength composite output of solid state laser based on adjustment of resonator parameters [10152-39]
10152 0B	A novel criterion for evaluating the beam quality of high energy laser [10152-40]
10152 0C	Active illuminated space object imaging and tracking simulation [10152-42]
10152 0D	Measurements of electron number density and plasma temperature using LIBS [10152-43]
10152 0E	The shape effect of space debris on recoil impulse by pulsed laser ablation [10152-45]
10152 0F	Powerful 40 GHz narrow linewidth random fiber laser [10152-46]
10152 0G	Investigation on the thermal properties of volume Bragg grating in laser diodes with external cavities [10152-47]

10152 OH	Thermal effect of large-diameter laser rod in multi-direction side-pump high power pulsed Nd:YAG laser amplifier [10152-48]
10152 OI	Plasma evolution regulations with the change of initial conditions of femtosecond laser and an optical detecting scheme is verified numerically [10152-49]
10152 OJ	Proposal of using slot-waveguide cavity to reduce noises in resonant integrated optical gyroscopes [10152-50]
10152 OK	Wideband and low dispersion slow light in structure optimized optofluidic infiltrated photonic crystal waveguide [10152-52]
10152 OL	Investigation on ultrafast third-order nonlinear optical properties of benzothiadiazole copolymer with triphenylamine derivative side chain [10152-53]
10152 OM	Wideband slow light with large NDBP at any group index in photonic crystal waveguide [10152-53]
10152 ON	Ultra-fast nonlinear optical properties and photophysical mechanism of a novel pyrene derivative [10152-54]
10152 OO	A tunable nonreciprocal device based on PT symmetry [10152-55]
10152 OP	The performance study of oxide by-passed(OB) lateral double diffused MOSFET [10152-56]
10152 OQ	Influence of Er³⁺ and Yb³⁺ concentration for upconversion emission in KLTN ceramics under 980nm laser excitation [10152-57]
10152 OR	Chemical laser exhaust pipe design research [10152-58]
10152 OS	High power 888nm optical fiber end-pumped Nd:YVO₄ picosecond regenerative amplifier at hundreds kHz [10152-59]
10152 OT	The homogeneous and dual-medium cell's refractive index decoupling method and entropy tomographic imaging [10152-60]
10152 OU	Design and optimization of a silica waveguide based visible etched diffraction grating with uniform loss [10152-61]
10152 OV	Design of 6 kw fiber-coupled system for semiconductor laser [10152-63]
10152 OW	The study of the noise immunity of chip spectrometer based on sparse recovery [10152-64]
10152 OX	Interaction between pulsed infrared laser and carbon fiber reinforced polymer composite laminates [10152-66]
10152 OY	An experimental research about dye-doped distributed feedback laser [10152-67]
10152 OZ	Research of target uniform illumination on SG-III laser facility [10152-68]

- 10152 10 **Pockels effect and optical rectification induced by the built-in electric field in the space charge regions of surface layers of silicon crystals** [10152-69]
- 10152 11 **Study on the electromagnetic radiation characteristics of discharging excimer laser system** [10152-70]
- 10152 12 **Study on transmission characteristics of one-dimensional photonic crystal microring resonators** [10152-71]
- 10152 13 **Compact and efficient CW 473nm blue laser with LBO intracavity frequency doubling** [10152-73]
- 10152 15 **Compact polarization rotator based on directional coupler of two waveguides with different width and height** [10152-75]
- 10152 16 **Optical properties of two-dimensional ZnO array generated by template method** [10152-77]
- 10152 17 **Compact intra-cavity frequency doubled line beam green laser by a laser diode array pumped** [10152-78]
- 10152 18 **Influence of deviation in central wavelengths of both a seed laser and a pump LD on the output features of a DPAL-MOPA system** [10152-80]
- 10152 19 **Study of plasma oscillations in photoelectric semiconductor detectors** [10152-83]
- 10152 1A **Evaluation of population densities of a rubidium laser pumped with a narrow-linewidth Ti:sapphire laser** [10152-84]
- 10152 1B **Ultra-compact photonic crystal integrated sensor formed by series-connected nanobeam bandstop filter and nanobeam cavity** [10152-85]
- 10152 1C **Passively Q-switched Nd:YAG/Cr⁴⁺:YAG micro laser with high beam quality** [10152-86]
- 10152 1D **Influence of truncation factor on coherent beam combining based on a triangular fiber laser array** [10152-87]
- 10152 1E **Stable 500kHz, 1ms, 40mJ pulse-burst GdVO₄/Nd:GdVO₄ laser oscillator** [10152-88]
- 10152 1F **Improving efficiency of spectral beam combining by optimizing reflectivity of output coupler for laser diode array** [10152-89]
- 10152 1G **Development of slab amplifiers for integration-test-bed** [10152-91]
- 10152 1H **Design of 150W, 105- μ m, 0.22NA, fiber coupled laser diode module by ZEMAX** [10152-90]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We had the great honor of organizing the International Symposium on High Power Lasers and High Energy Lasers and the International Symposium on Silicon-Based Photonic Integration. It was truly a great pleasure for us to greet the more than 1000 participants from many different countries that attended these two symposia. We firmly believe the symposia will become important international events in the field of optical technology.

The International Symposium on High Power Lasers and High Energy Lasers and the International Symposium on Silicon-Based Photonic Integration were sponsored by the Chinese Society for Optical Engineering and China High-tech Industrialization Association (CHIA), organized by the Chinese Society for Optical Engineering (CSOE), Photoelectronic Technology Committee, the Chinese Society of Astronautics, Photo-electronic Industrialization Committee, CHIA, and the Department of Cooperation and Coordination for Industry, Academe, and Research, CHIA.

The purpose of the two symposia is to provide a forum for the participants to report and review innovative ideas and up-to-date progress and developments, and discuss the novel approaches to application in the optical field. It is sincerely hoped that the research and development in the optical field will be promoted, and the international cooperation in sharing the common interest will be enhanced.

On behalf of the other chairmen, and the organization committee of these two conferences, we would like to heartily thank our sponsors and cooperating organizations for all they have done for the symposia. Thanks also to all the authors for their contributions to the proceedings; to all of the participants and friends for their interest and efforts in helping us to make the symposia possible; to the Program Committee for their effective work and valuable advice; especially the Secretariat, and to the SPIE staff for their tireless efforts and outstanding service in preparing the symposia and publishing the proceedings.
