Event: International Symposium on Optoelectronic Technology and Application 2016, 2016, Beijing, China

PROCEEDINGS OF SPIE

Hyperspectral Remote Sensing Applications and Environmental Monitoring and Safety Testing Technology

**Wenqing Liu
Jinnian Wang**
Editors

**9–11 May 2016
Beijing, China**

Organized by
Chinese Society for Optical Engineering (CSOE) (China)
Photo-electronic Technology Committee, Chinese Society of Astronautics (China)
Photo-electronic Industrialization Committee, CHIA (China)
Department of Cooperation and Coordination for Industry, Academe and Research, CHIA
(China)

Sponsored by
Chinese Society for Optical Engineering (CSOE) (China)
China High-tech Industrialization Association (CHIA) (China)

Technical Co-sponsor and Publisher
SPIE

Volume 10156

Proceedings of SPIE 0277-786X, V. 10156

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Hyperspectral Remote Sensing Applications and Environmental Monitoring and Safety
Testing Technology, edited by Wenqing Liu and Jinnian Wang, Proc. of SPIE Vol. 10156,
1015601 · © 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2264711

Proc. of SPIE Vol. 10156 1015601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xiii	<i>Introduction</i>

HYPERSPECTRAL REMOTE SENSING APPLICATIONS AND ENVIRONMENTAL MONITORING AND SAFETY TESTING TECHNOLOGY

10156 02	Research on differences of AOTF imaging spectrometer spectral calibration results caused by ambient temperature [10156-1]
10156 03	Development of a broadband cavity enhanced UV-LED spectrometer for the detection of atmospheric HONO and NO₂ [10156-4]
10156 04	Study on the influence factors of camouflage target polarization detection [10156-5]
10156 05	Development of laser light source with high stability for Brillouin optical fiber sensor [10156-6]
10156 06	Anomaly detection based on PCA and local RXOSP in hyperspectral image [10156-7]
10156 07	Data reconstructed of ultraviolet spatially modulated imaging spectrometer [10156-9]
10156 08	An experimental sonobuoy system based on fiber optic vector hydrophone [10156-10]
10156 09	Discrimination of tree species using random forests from the Chinese high-resolution remote sensing satellite GF-1 [10166-12]
10156 0A	A novel method of target detection under the electro-optical jamming circumstance [10156-13]
10156 0B	Land cover classification based on object-oriented with airborne lidar and high spectral resolution remote sensing image [10156-15]
10156 0C	Remote sensing with laser spectrum radar [10156-16]
10156 0D	Detecting payload performance based on relative radiometric characteristic: case of the optical sensors [10156-17]
10156 0E	Design of the NDUV detection circuit for the NO concentration of the vehicle exhaust emissions [10156-18]
10156 0F	Research and evolution of mid-infrared optical source [10156-20]

10156 OG	FTIR spectroscopic analysis of the harmful gases in underground closed environment [10156-21]
10156 OH	A research on coalfield fire detection in Daliuta mining area at Inner Mongolia based on hyperspectral thermal infrared remote sensing [10156-22]
10156 OI	Recent development of hyperspectral LiDAR using supercontinuum laser [10156-23]
10156 OJ	Band selection method based on spectrum difference in targets of interest in hyperspectral imagery [10156-24]
10156 OK	Research on impervious surface dynamic changes based on Landsat satellite images in Nantong, China [10156-25]
10156 OL	Study on the backscattered light intensity to airborne laser range-gated imaging [10156-26]
10156 OM	A new embedded solution of hyperspectral data processing platform: the embedded GPU computer [10156-27]
10156 ON	The comparison of single-band and dual-band infrared detection of small targets [10156-31]
10156 OO	A random optimization approach for inherent optic properties of nearshore waters [10156-32]
10156 OP	The regularized iteratively reweighted object-based MAD method for change detection in bi-temporal, multispectral data [10156-33]
10156 OQ	New generation VNIR/SWIR/TIR airborne imaging spectrometer [10156-34]
10156 OR	Study on synchronous detection method of methane and ethane with laser absorption spectroscopy technology [10156-37]
10156 OS	Measurements of axisymmetric temperature and H₂O concentration distributions on a circular flat flame burner based on tunable diode laser absorption tomography [10156-39]
10156 OT	Ship detection in high spatial resolution remote sensing image based on improved sea-land segmentation [10156-41]
10156 OU	New generation handheld hyperspectral imager [10156-42]
10156 OV	The research development of hyperspectral imaging in apple nondestructive detection and grading [10156-43]
10156 OW	A compact LWIR Fourier transform imaging spectrometer employing a variable gap Fabry-Perot interferometer [10156-44]
10156 OX	A novel image watermarking method based on singular value decomposition and digital holography [10156-45]

- 10156 0Y **Hyperspectral mineral mapping technology applied to geology based on HyMap data**
[10156-46]
- 10156 0Z **Design of an LVDS to USB3.0 adapter and application** [10156-48]
- 10156 10 **Investigation of surface plasmon resonance in composite nanostructure of silver film and nanowire array** [10156-49]
- 10156 11 **Use of CASI/SASI imaging spectrometer data to map mineralogy in the Hongliugou area on the northern margin of the Altyn Tagh mountains** [10156-50]
- 10156 12 **The technique flows of target detection using thermal infrared hyperspectral remote sensing** [10156-51]
- 10156 13 **Dehazing method for hyperspectral remote sensing imagery with hyperspectral linear unmixing** [10156-52]
- 10156 14 **Quantitative analysis of multi-component complex oil spills based on the least-squares support vector regression** [10156-53]
- 10156 15 **Theoretical analysis for scaling law of thermal blooming based on optical phase deference**
[10156-54]
- 10156 16 **Monitoring heavy metal Cr in soil based on hyperspectral data using regression analysis**
[10156-55]
- 10156 17 **Research on hyperspectral dynamic scene and image sequence simulation** [10156-56]
- 10156 18 **In-lab in-line digital holography for cloud particle measurement experiment** [10156-58]
- 10156 19 **Research on photodiode detector-based spatial transient light detection and processing system** [10156-60]
- 10156 1A **Aerosol absorption measurement with a sinusoidal phase modulating fiber optic photo thermal interferometer** [10156-61]
- 10156 1B **Measuring atmospheric visibility cavity attenuated phase shift spectroscopy** [10156-62]
- 10156 1C **Design and fabrication of linear Fresnel zone plates used for microspectrometer** [10156-63]
- 10156 1D **Research and application of air mercury measurement based on transverse Zeeman background correction** [10156-65]
- 10156 1E **A microfluidic laser scattering sensor for label-free detection of waterborne pathogens**
[10156-67]
- 10156 1F **Optical properties of two-dimensional ZnO array generated by template method**
[10156-68]
- 10156 1G **Remote detection of carbon monoxide by FTIR for simulating field detection in industrial process** [10156-69]

10156 1I	Rolling forecasting model of PM2.5 concentration based on support vector machine and particle swarm optimization [10156-72]
10156 1J	High sensitivity measurement of NO, NO₂ and NH₃ using MIR-QCL and time division multiplexing WMS technology [10156-73]
10156 1K	The convex grating with high efficiency for hyperspectral remote sensing [10156-74]
10156 1L	Use hyperspectral remote sensing technique to monitoring pine wood nomatode disease preliminary [10156-76]
10156 1M	In-flight absolute radiometric calibration of MODIS using the irradiance-based method [10156-77]
10156 1N	Hyperspectral imaging simulation of object under sea-sky background [10156-78]
10156 1O	Estimate the noise of high-spectral data with multiplicative noise model [10156-79]
10156 1P	Application of hydrothermal alteration mineral mapping using airborne hyperspectral remote sensing: data taken in the Baixianishan region of Gansu Province as an example [10156-80]
10156 1Q	Applicability of spectral indices on thickness identification of oil slick [10156-81]
10156 1R	Study on ammonia slip detection in the harsh combustion environments using diode laser spectroscopy [10156-82]
10156 1S	The measurement and evaluation of bidirectional reflectance characteristics of Dunhuang radiometric calibration test site [10156-83]
10156 1T	Research on starlight hardware-in-the-loop simulator [10156-85]
10156 1U	Investigation on transmission and reflection characteristics of plasma array to 6 GHz high-power microwave [10156-86]
10156 1V	A method for extracting urban built-up area based on RS indexes [10156-87]
10156 1W	High spectral resolution remote sensing detection system for atmosphere greenhouse gas [10156-88]
10156 1X	Research on high resolution spectral method of hyperspectral LiDAR [10156-89]
10156 1Y	Research on hyperspectral dynamic scene and image sequence simulation [10156-90]
10156 1Z	Implementation on GPU-based acceleration of the m-line reconstruction algorithm for circle-plus-line trajectory computed tomography [10156-93]
10156 20	Image mosaic based on the camera self-calibration of combining two vanishing points and pure rotational motion [10156-94]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We had the great honor of organizing the International Symposium on Hyperspectral Remote Sensing Applications and the International Symposium on Environmental Monitoring and Safety Testing Technology. It was truly a great pleasure for us to greet more than 1,000 participants from many different countries attending the symposiums. We firmly believe the symposiums will become an important international event in the field of optical technology.

The International Symposium on Hyperspectral Remote Sensing Applications and the International Symposium on Environmental Monitoring and Safety Testing Technology were sponsored by the Chinese Society for Optical Engineering and the China High-tech Industrialization Association (CHIA); and organized by the Chinese Society for Optical Engineering (CSOE), the Photo-electronic Technology Committee, the Chinese Society of Astronautics, the Photo-electronic Industrialization Committee, and the Department of Cooperation and Coordination for Industry, Academe and Research, CHIA.

The purpose of the symposia was to provide a forum for the participants to report and review innovative ideas and up-to-date progress and developments, and discuss novel approaches to applications in the optical field. It was sincerely hoped that the research and development in optical field would get promoted, and the international cooperation sharing the common interest would get enhanced.

On behalf of the other co-chairmen and the Organizing Committee of the conference, we would like to heartily thank for our sponsors and cooperating organizers for all they have done for these symposia. Thanks also to all the authors for their contributions to the Proceedings, to all of the participants and friends for their interest and efforts in helping us to make these symposia possible, to the Program Committee for their effective work and valuable advice – especially the Secretariat – and to the editors at SPIE for their tireless effort and outstanding services in preparing the symposia and publishing the Proceedings.
