xix Introduction

Part One

INFRARED TECHNOLOGY AND APPLICATIONS, AND ROBOT SENSING AND ADVANCED CONTROL

10157 02 Research overview on reliability of infrared focal plane array detector assemblies [10157-1]
10157 03 Design and algorithm research of high precision airborne infrared touch screen [10157-2]
10157 04 IR decoys modeling method based on particle system [10157-3]
10157 05 Near-infrared hyperspectral reflective confocal microscopy [10157-4]
10157 06 Optimal selection of regularization parameter for $\ell_1$-based image restoration based on SURE [10157-5]
10157 08 Infrared responsivity enhancement for silicon detectors by non-mask reactive ion etching [10157-7]
10157 09 Hardware friendly adaptive support-weight approach for stereo matching [10157-8]
10157 0A Highly sensitive NIR PtSi/Si-nanostructure detectors [10157-9]
10157 0B Analysis of DC control in double-inlet GM type pulse tube refrigerators for detectors [10157-10]
10157 0C Perception-inspired background subtraction in complex scenes based on spatiotemporal features [10157-11]
10157 0D Research on infrared radiation signatures of high-altitude plume based on DSMC method [10157-12]
10157 0E Pseudo-color visualization of infrared temperature data based on color difference and HSI [10157-13]
10157 0F Multi-level SLIC superpixels segmentation method based on edge detection operator [10157-14]

</table>
The influence of the intensity of electric field on methane-air mixed gas discharge electron transport parameters [10157-38]

Boolean map saliency combined with motion feature used for dim and small target detection in infrared video sequences [10157-39]

A numerical method based on transfer function for removing the noise of water vapor from terahertz spectra [10157-40]

Method of measuring speed of LOS for optics-electricity system of unmanned aerial vehicle [10157-41]

Study on failure analysis of array chip components in IRFPA [10157-42]

Surface passivation of backside-illuminated InSb FPAs [10157-43]

Study on non-target area of LLL image statistical characteristics under different illumination [10157-44]

Adaptive iteration method for star centroid extraction under highly dynamic conditions [10157-46]

Robust object tracking based on structural local sparsity via a global L2 norm constraint [10157-48]

Development of high-resolution spaceborne infrared detection technology [10157-51]

Influence of operating temperature on operating range of InSb detection system [10157-52]

Research on MR-SVD based visual and infrared Image fusion [10157-53]

The study of multilayer anti-reflection coating in InSb focal plane detector [10157-54]

Simulations of infrared atmospheric transmittance based on measured data [10157-55]

Drunk identification using far infrared imagery based on DCT features in DWT domain [10157-56]

Numerical calculation on infrared characteristics of the exhaust plume outside axial-symmetrical nozzle [10157-57]

Infrared detectors and test technology of cryogenic camera [10157-58]

Focal plane array detectors with micro-bolometer structure and its application in IR and THz imaging [10157-59]

Vision-based posture recognition using an ensemble classifier and a vote filter [10157-60]

Parameter estimation for chaotic systems based on improved boundary chicken swarm optimization [10157-61]
Potential fault region detection in TFDS images based on convolutional neural network [10157-62]

Projection collimator optics for DMD-based infrared scene simulator [10157-63]

Algorithm for image fusion via gradient correlation and difference statistics [10157-64]

Performance analysis of device-level SINS/ACFSS deeply integrated navigation method [10157-65]

Comparative study of deep traps in extended wavelength In$_x$Ga$_{1-x}$As photodetectors [10157-66]

A dual-waveband dynamic IR scene projector based on DMD [10157-67]

A comparison of filtering techniques on denoising terahertz coaxial digital holography image [10157-68]

Internet based gripper teleoperation with random time delay by using haptic feedback and SEMG [10157-69]

An improved finger-vein recognition algorithm based on template matching [10157-70]

Part Two

INFRARED TECHNOLOGY AND APPLICATIONS; AND ROBOT SENSING AND ADVANCED CONTROL (CONT’D)

Continuous-wave terahertz reflective off-axis digital holography [10157-71]

Comparison and evaluation on image fusion methods for GaoFen-1 imagery [10157-72]

Shape matching under affine transformation using normalization and multi-scale area integral features [10157-73]

Joint geometric and photometric direct image registration based on Lie algebra parameterization [10157-74]

Corona discharge spectrum measurement and nitrogen molecular vibrational temperature calculation [10157-76]

Research on laser induced acoustic source based underwater communication system [10157-77]

Learning to assign binary weights to binary descriptor [10157-78]

Study of adaptive LLL/infrared image color fusion algorithm based on the environment illumination [10157-79]

Train wheel edge detection and image object region segmentation [10157-80]
10157 24 Preparation and electromagnetic waves attenuation performances of infrared-interfering composite smog [10157-81]

10157 25 Infrared dim and small target tracking method incorporating statistical characteristics [10157-82]

10157 26 Research of trajectory optimization on feeding manipulator based on internal penalty function [10157-83]

10157 27 Theoretical calculation of mid-infrared spectra from hypersonic non-ablative sphere [10157-84]

10157 28 Toeplitz block circulant matrix optimized with particle swarm optimization for compressive imaging [10157-85]

10157 29 The effect of the three non-collinear chips on the imaging of infrared remote sensor [10157-86]

10157 2A Simulation of InGaAs/InAlAs avalanche photodetectors [10157-87]

10157 2B Measurement of aerosol optical properties by cw cavity enhanced spectroscopy [10157-88]

10157 2C Research on the characteristic of acoustic signal induced by thermoelastic mechanism [10157-89]

10157 2D An infrared image enhancement algorithm based on HVS [10157-90]

10157 2E Characterization of gramineous forage varieties using terahertz time-domain spectroscopy [10157-91]

10157 2F Optical micro-scanning zero calibration for a thermal microscope imaging system [10157-92]

10157 2G A reusable temperature-based infrared system image correction IP core [10157-93]

10157 2H Evaluation of wake detection probability of underwater vehicle by IR [10157-94]

10157 2I Optimal interference code based on machine learning [10157-95]

10157 2J Evaluating the thermal stability of multi-pass cells' effective optical path length using optical frequency domain reflectometer [10157-96]

10157 2K Calibration of effective optical path length for hollow-waveguide based gas cell using absorption spectroscopy [10157-97]

10157 2L A robust line matching method based on local appearance descriptor and neighboring geometric attributes [10157-99]

10157 2M Experimental study on the push-broom infrared imaging system based on line-plane-switching fiber bundle [10157-100]
Design of infrared signal processing system based on ZYNQ platform

An infrared light polarized beam splitter based on graphene array

The study on increasing the equivalent SNR in the certain DOI by adjusting the SD separation in near-infrared brain imaging application

Coprimel frequency modulation on light field for correlation imaging

Stripe noise removal for infrared images using guided filter

An enhancement algorithm for dim and small infrared target based on time and spatial correlation

Preliminary investigation of the capillary adsorption for a hollow waveguide based laser ammonia analyzer

Algorithm for eliminating false location targets based on associated multiple period

Scene recognition and colorization for vehicle infrared images

Optimal design of TIR prism for the infrared target simulator based on DMD

Improved kernel correlation filter tracking with Gaussian scale space

Improved semi-supervised online boosting for object tracking

Design of non-dispersion Infrared detector's data processor on measurement of automobile emission CO and CO2

High temperature spectral emissivity measurement using integral blackbody method

Short-delayed self-heterodyne interferometer combined with time-frequency analysis for measuring dynamic spectral properties of tunable lasers

Research on optical system of spaceborne laser target indicator

An improved real-time visual tracking method for space non-cooperative target

Infrared moving small target detection based on saliency extraction and image sparse representation

Analysis and research on thermal infrared properties and adaptability of the camouflage net

A curvature filter and PDE based non-uniformity correction algorithm
Research on infrared target tracking adaptively based on second-order differential and template matching [10157-124]

Improved temporal high-pass filter non-uniformity correction algorithm based on shearlet transform [10157-127]

Research on metal-plated cellulose nitrate flakes and their infrared / millimeter wave characteristics [10157-128]

An improved robust blind motion de-blurring algorithm for remote sensing images [10157-129]

High operating temperature InAlSb infrared detectors [10157-131]

Numerical simulation study on quantum efficiency characteristics of InP/InGaAs/InP infrared photocathode [10157-134]

Modification method of numerical calculation of heat flux over dome based on turbulence models [10157-132]

Study on the mechanism of human blood glucose concentration measuring using mid-infrared spectral analysis technology [10157-133]

Growth and characterization of high strain InGaAs/GaAs quantum well by molecular beam epitaxy [10157-135]

Analysis of thermal shock resistance of CVD ZnS dome [10157-136]

Evaluation of the morphology structure of meibomian glands based on mask dodging method [10157-137]

Infrared dim target tracking based on guide filter and Bayes classification [10157-139]

Temporal non-uniformity correction for infrared image based on moment matching [10157-140]

Studies on different passivation on InAs/GaSb type-II superlattice photodetectors [10157-144]

Optimization of plasma etching of SiO2 as hard mask for HgCdTe dry etching [10157-148]

Object tracking by transitive learning using perspective transformation [10157-152]

Precision improvement of RGD-D camera with photometric stereo method [10157-155]

An exploratory study on the driving method of speech synthesis based on the human eye reading imaging data [10157-156]

Effect of substrate baking temperature on zinc sulfide and germanium thin films optical parameters [10157-158]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We had the great honor of organizing the International Symposium on Infrared Technology and Application and the International Symposiums on Robot Sensing and Advanced Control. It was truly a great pleasure for us to greet more than 1,000 participants from many different countries attending these two symposia. We firmly believe the symposia will become important international events in the field of optical technology.

The International Symposium on Infrared Technology and Application and the International Symposium on Robot Sensing and Advanced Control were sponsored by Chinese Society for Optical Engineering and China High-tech Industrialization Association (CHIA), and organized by the Chinese Society for Optical Engineering (CSOE), the Photo-electronic Technology Committee, the Chinese Society of Astronautics, the Photo-electronic Industrialization Committee, CHIA, and the Department of Cooperation and Coordination for Industry, Academe and Research, CHIA.

The purpose of these two symposia was to provide a forum for the participants to report and review the innovative ideas and up-to-date progress and developments, discuss novel approaches to application in the optical field. It was sincerely hoped that the research and development in optical field would get promoted, and the international cooperation sharing the common interest would get enhanced.

On behalf of the other co-chairmen and the Organizing Committee of these two conferences, we would like to heartily thank for our sponsors and cooperating organizers for all they have done for the symposia. Thanks also to all the authors for their contributions to the Proceedings, to all of the participants and friends for their interest and efforts in helping us to make the symposia possible, to the Program Committee for their effective work and valuable advice—especially the Secretariat—and the editors at SPIE for their tireless effort and outstanding services in preparing the symposia and publishing the Proceedings.

Haimei Gong
