Volume 10165

Proceedings of SPIE 0277-786X, V. 10165

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Behavior and Mechanics of Multifunctional Materials and Composites 2017, edited by Nakhiah C. Goulbourne,
Proc. of SPIE Vol. 10165, 1016501 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2270662

Proc. of SPIE Vol. 10165 1016501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

SESSION 1 ADVANCES IN PIEZOELECTRIC MATERIALS

10165 02	The effects of bonding layer on the high-frequency dynamic response of piezoelectric augmented structures [10165-1]
10165 06	Mechanoelectrochemistry of soft electroactive materials via surface-tracked scanning electrochemical microscopy [10165-5]

SESSION 2 FERROELECTRIC MATERIALS

10165 07	Numerical investigation of crack propagation direction in ferroelectric actuators [10165-6]
10165 08	Global sensitivity analysis for a quantum informed ferroelectric phase field model [10165-7]
10165 09	Uncertainty analysis of continuum phase field modeling in 180° degree domain wall structures [10165-8]
10165 0A	Surrogate model development and feedforward control implementation for PZT bimorph actuators employed for RoboBee [10165-9]
10165 0B	Energetics of domain engineered rhombohedral ferroelectric single crystals [10165-10]

SESSION 3 SHAPE MEMORY MATERIALS I

10165 0C	Modeling of a soft multiple-shape-memory ionic polymer-metal composite actuator [10165-11]
10165 0D	Influence of stress concentrations on failure of shape memory alloy actuators [10165-12]
10165 0E	Finite element analysis of a 3D Fe-based SMA cellular beam with highly heterogeneous stress and strain distributions [10165-13]
10165 0F	Predicting the constitutive response of precipitation hardened NiTiHf [10165-14]
10165 0G	Graphene based skins on thermally responsive composites for deicing applications [10165-16]

SESSION 4	METAMATERIALS
10165 0I	Design and fabrication of materials and structures with negative Poisson's ratio and negative linear compressibility [10165-18]
10165 0K	Assessment of uncertainty effect in piezoelectric metamaterial [10165-20]
10165 0L	Self-folding structure using light-absorption of polystyrene sheet [10165-21]
SESSION 5	NANOCOMPOSITES MATERIALS APPLICATIONS
10165 0M	New sensing method of dispersion and damage detection of carbon fiber/polypropylene-polyamide composites via two-dimensional electrical resistance mapping [10165-22]
10165 0N	Development of carbon nanotube: cellulose composites using a simple papermaking process for multifunctional sensing applications [10165-23]
10165 0Q	Development of electrothermal actuator (ETA) with low activation voltage [10165-26]
SESSION 6	MULTIFUNCTIONAL COMPOSITES
10165 0T	Design of thermally adaptive composite structures for damping and stiffness control [10165-30]
10165 0U	Stress-strain and fracture toughness behaviour of composites reinforced with inhomogeneously distributed particles [10165-31]
10165 0V	Influence of heating time of pyrolysis method for extracting recycled carbon fibers from wasted Prepreg on fiber breakages in its injection molded composite [10165-32]
10165 0W	Impact resistant smart hybrid laminates [10165-33]
10165 0X	Multifunctional surfaces produced using fiber debonding and pullout in composite materials [10165-34]
10165 0Y	Bistable morphing composites with selectively pre-stressed laminae [10165-28]
SESSION 7	SELF HEALING AND 3D PRINTING
10165 10	Nondestructive evaluation of smart rheologically recoverable self-healing materials before and after exposure to space radiations [10165-36]
10165 11	3D printed thermoplastic polyurethane with isotropic material properties [10165-37]
10165 12	The impact of nozzle and bed temperatures on the fracture resistance of FDM printed materials [10165-38]

SESSION 8 PHOTORESPONSIVE MATERIALS	
10165 13	On the electric and magnetic alignment of magnetoactive barium hexaferrite-PDMS composites [10165-39]
10165 15	Rate dependent modeling, experimental validation, and uncertainty quantification of photostrictive polymers [10165-41]
SESSION 9 SHAPE MEMORY MATERIALS II	
10165 1B	The research of vacuum thermal cycling resistant transparent shape memory polyimide and its application in space flexible electronics [10165-47]
10165 1C	Investigations on transformer oil temperature sensing using CuAlNi/polyimide shape memory alloy composite film [10165-48]
POSTER SESSION	
10165 1E	FEM simulation and experimental measurement of hardness by the Superficial Rockwell HRT scale using the steel and tungsten carbide spherical indenters [10165-49]
10165 1F	Parameter influence on tensile properties of scarf-repaired composite laminates [10165-50]
10165 1G	Application of the FEM for modeling and prediction of the relationship between the hardness and stress of the deformed body [10165-51]
10165 1I	Development and characterization of novel light-curable composite resins with calcium phosphate silicate cement [10165-53]
10165 1L	Deformation characteristics of CFRP bi-stable composites according to negative initial curvature [10165-56]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jayanth N. Kudva, NextGen Aeronautics, Inc. (United States)

Symposium Co-chairs

Tribikram Kundu, The University of Arizona (United States)

Gregory W. Reich, Air Force Research Laboratory (United States)

Conference Chair

Nakhiah C. Goulbourne, University of Michigan (United States)

Conference Co-Chair

Hani E. Naguib, University of Toronto (Canada)

Conference Program Committee

Abhijit Bhattacharyya, University of Arkansas at Little Rock (United States)

Gregory P. Carman, University of California, Los Angeles (United States)

Pavel M. Chaplya, Sandia National Laboratories (United States)

Constantin Ciocanel, Northern Arizona University (United States)

Marcelo J. Dapino, The Ohio State University (United States)

Sergio Luis dos Santos e Lucato, Teledyne Scientific Company
(United States)

LeAnn E. Faidley, Wartburg College (United States)

Darren J. Hartl, Texas A&M University (United States)

Daniel J. Inman, University of Michigan (United States)

Marc Kamlah, Karlsruher Institut für Technologie (Germany)

Haluk E. Karaca, University of Kentucky (United States)

Kwang Jin Kim, University of Nevada, Las Vegas (United States)

Dimitris C. Lagoudas, Texas A&M University (United States)

Chad M. Landis, The University of Texas at Austin (United States)

Kam K. Leang, University of Nevada, Reno (United States)

Hyeong Jae Lee, Jet Propulsion Laboratory (United States)

Donald J. Leo, Virginia Polytechnic Institute and State University
(United States)

Jiangyu Li, University of Washington (United States)

Christopher S. Lynch, University of California, Los Angeles (United States)

Karla M. Mossi, Virginia Commonwealth University (United States)

Robert C. O'Handley, Massachusetts Institute of Technology
(United States)

Zoubeida Ounaies, The Pennsylvania State University (United States)

Etienne Patoor, Université de Metz (France)

Ralph C. Smith, North Carolina State University (United States)
Jonghwan Suhr, University of Delaware (United States)
Vishnu Baba Sundaresan, The Ohio State University (United States)

Session Chairs

- 1 Advances in Piezoelectric Materials
Nakhiah C. Goulbourne, University of Michigan (United States)
Hani E. Naguib, University of Toronto (Canada)
- 2 Ferroelectric Materials
Reza Rizvi, University of Toledo (United States)
- 3 Shape Memory Materials I
Darren J. Hartl, Texas A&M University (United States)
Dimitris C. Lagoudas, Texas A&M University (United States)
- 4 Metamaterials
Zoubeida Ounaies, The Pennsylvania State University (United States)
Paris von Lockette, Rowan University (United States)
- 5 Nanocomposites Materials Applications
William S. Oates, Florida State University (United States)
Vishnu Baba Sundaresan, The Ohio State University (United States)
- 6 Multifunctional Composites
Constantin Ciocanel, Northern Arizona University (United States)
Kwang Jin Kim, University of Nevada, Las Vegas (United States)
- 7 Self Healing and 3D Printing
Marcelo Dapino, The Ohio State University (United States)
- 8 Photoresponsive Materials
Ralph C. Smith, North Carolina State University (United States)
- 9 Shape Memory Materials II
Aaron David Price, Western University (Canada)
