Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

The 15th *Asia-Pacific Conference on Fundamental Problems of Opto- and Microelectronics* (APCOM 2016) was held in the far east of the Russia Federation in October 2016. Since 2000, the conference has been the venue for cutting-edge achievements in a variety of topics related to opto- and microelectronics. During the intervening years, the focus of the conference has shifted to fundamental and applied aspects of optics, photonics and nano-electronics and covers photonic communication, optical measuring systems, photonic sensors, as well as their application in life-sciences, bio-medicine, social welfare, industrial facilities, and structural health monitoring. The conference also covers novel materials and structures for optics and photonics, new principles and methods for optical information processing and imaging, and nano- and bio-photonics.

In the past, APCOM papers have been published as SPIE Proceedings (volumes 4513, 4357, 5129, 5851, and 6595); and now, with the publication of this SPIE volume, we are glad to have restored the long-established tradition.

We are looking forward to receiving submissions for the 16th APCOM conference in 2017.
