Proc. of SPIE Vol. 10190 1019001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 COALITION OPERATIONS AND INTEROPERABILITY

10190 03	ISA for the internet of tactical things [10190-2]
10190 04	Interoperability at the tactical edge: lessons learned from Enterprise Challenge 2016 [10190-3]
10190 05	Performing data analytics on information obtained from various sensors on an OSUS compliant system [10190-4]
10190 07	Aligning vocabulary for interoperability of ISR assets using authoritative sources [10190-6]

SESSION 2 INTERNET OF THINGS (IOT) APPLICATIONS

10190 0A	Coalitions of things: supporting ISR tasks via internet of things approaches [10190-9]
10190 0B	Node red for sensors [10190-10]

SESSION 3 ANOMALY DETERMINATION AND DEEP LEARNING ANALYTICS

10190 0D	Deep learning on temporal-spectral data for anomaly detection [10190-12]
10190 0E	A generative model for predicting terrorist incidents [10190-13]
10190 0F	Discovering anomalous events from urban informatics [10190-14]
10190 0G	Deep learning for anomaly detection in maritime vessels using AIS-cued camera imagery [10190-15]
10190 0H	Framework for behavioral analytics in anomaly identification [10190-16]

SESSION 4 HUMAN-MACHINE INTERFACE AND MACHINE LEARNING APPROACHES I

10190 0J	The need for separate operational and engineering user interfaces for command and control of airborne synthetic aperture radar systems [10190-18]
----------	--

10190 0K **Using machine learning to emulate human hearing for predictive maintenance of equipment (Keynote Paper) [10190-51]**

SESSION 5 HUMAN-MACHINE INTERFACE AND MACHINE LEARNING APPROACHES II

10190 0M **In-context query reformulation for failing SPARQL queries [10190-20]**

10190 0N **Interface cloning and sharing: interaction designs for conserving labor and maintaining state across 24X7 sensor operations teams [10190-21]**

10190 0O **Does this interface make my sensor look bad? Basic principles for designing usable, useful interfaces for sensor technology operators [10190-22]**

SESSION 6 DETECTION, TRACKING AND LOCALIZATION FOR PERSISTENT SURVEILLANCE

10190 0Q **Persistent maritime traffic monitoring for the Canadian Arctic [10190-24]**

10190 0R **Detection and localization of multiple wideband intermittent acoustic sources [10190-25]**

10190 0T **Track classification within wireless sensors network [10190-27]**

SESSION 7 MODELING AND SIMULATION AND ENABLING TECHNOLOGIES I

10190 0U **Sensor data fusion for automated threat recognition in manned-unmanned infantry platoons [10190-28]**

10190 0V **Dynamic network based learning systems for sensor information fusion [10190-29]**

10190 0W **Invocation oriented architecture for agile code and agile data [10190-30]**

10190 0X **Heterogeneous information sharing of sensor information in contested environments [10190-32]**

SESSION 8 OPTIMIZATION OF UTILITY OF ISR ASSETS

10190 0Y **A blockchain based architecture for asset management in coalition operations [10190-33]**

10190 0Z **Evaluating the integration of operations tasks while optimizing ISR activities [10190-34]**

10190 10 **Mission-informed needed information: discoverable, available sensing sources (MINI-DASS): the operators and process flows the magic rabbits must negotiate [10190-35]**

SESSION 9 MODELING AND SIMULATION AND ENABLING TECHNOLOGIES II

10190 14 **Modeling of signal propagation and sensor performance for infrasound and blast noise [10190-39]**

- 10190 15 **Photogrammetric point cloud compression for tactical networks** [10190-40]
- 10190 16 **An overview of the U.S. Army Research Laboratory's Sensor Information Testbed for Collaborative Research Environment (SITCORE) and Automated Online Data Repository (AODR) capabilities** [10190-41]

SESSION 10 ISR AIRBORNE IMAGING/SENSING

- 10190 17 **Distributed subterranean exploration and mapping with teams of UAVs** [10190-42]
- 10190 18 **Robust drone detection for day/night counter-UAV with static VIS and SWIR cameras** [10190-43]
- 10190 19 **Tree detection in urban regions from aerial imagery and DSM based on local maxima points** [10190-45]
- 10190 1A **Improved hyperspectral vegetation detection using neural networks with spectral angle mapper** [10190-46]

SESSION 11 ISR VEHICLE STEERING/CONTROL

- 10190 1C **Piezo-based, high dynamic range, wide bandwidth steering system for optical applications** [10190-48]

SESSION 12 ISR IMAGE PROCESSING

- 10190 1D **The image interpretation workstation of the future: lessons learned** [10190-49]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Donald A. Reago Jr., U.S. Army Night Vision & Electronic Sensors
Directorate (United States)

Symposium Co-chair

Arthur A. Morrish, Raytheon Space and Airborne Systems
(United States)

Conference Chairs

Tien Pham, U.S. Army Research Laboratory (United States)

Michael A. Kolodny, U.S. Army Research Laboratory (United States)

Conference Program Committee

Flavio Bergamaschi, IBM United Kingdom Ltd. (United Kingdom)

Geeth R. de Mel, IBM Thomas J. Watson Research Center
(United States)

Daniel J. Henry, Rockwell Collins, Inc. (United States)

Laura Martine Klein, Sandia National Laboratories (United States)

Laura A. McNamara, Sandia National Laboratories (United States)

Olga Mendoza-Schrock, Air Force Research Laboratory
(United States)

Gavin Pearson, Defence Science and Technology Laboratory
(United Kingdom)

King K. Siu, U.S. Army Armament Research, Development and
Engineering Center (United States)

Raja Suresh, General Dynamics Mission Systems (United States)

Igor V. Ternovskiy, Air Force Research Laboratory (United States)

Robert Williams, Air Force Research Laboratory (United States)

Dietrich M. Wiegmann, U.S. Army Research Laboratory (United States)

Session Chairs

- 1 Coalition Operations and Interoperability
Tien Pham, U.S. Army Research Laboratory (United States)

- 2 Internet of Things (IoT) Applications
Flavio Bergamaschi, IBM United Kingdom Ltd. (United Kingdom)

- 3 Anomaly Determination and Deep Learning Analytics
Geeth R. de Mel, IBM Thomas J. Watson Research Center
(United States)
- 4 Human-machine Interface and Machine Learning Approaches I
Michael A. Kolodny, U.S. Army Research Laboratory (United States)
- 5 Human-machine Interface and Machine Learning Approaches II
Laura A. McNamara, Sandia National Laboratories (United States)
- 6 Detection, Tracking and Localization for Persistent Surveillance
Dietrich M. Wiegmann, U.S. Army Research Laboratories
(United States)
- 7 Modeling and Simulation and Enabling Technologies I
Tien Pham, U.S. Army Research Laboratory (United States)
- 8 Optimization of Utility of ISR Assets
Geeth R. de Mel, IBM Thomas J. Watson Research Center
(United States)
- 9 Modeling and Simulation and Enabling Technologies II
Tien Pham, U.S. Army Research Laboratory (United States)
- 10 ISR Airborne Imaging/Sensing
Daniel J. Henry, Rockwell Collins, Inc. (United States)
Thomas J. Walls, U.S. Naval Research Laboratory (United States)
- 11 ISR Vehicle Steering/Control
Daniel J. Henry, Rockwell Collins, Inc. (United States)
Thomas J. Walls, U.S. Naval Research Laboratory (United States)
- 12 ISR Image Processing
Thomas J. Walls, U.S. Naval Research Laboratory (United States)

Introduction

This was the eighth year that Ground/Air Multisensor Interoperability, Integration, and Networking for Persistent ISR was part of the SPIE Defense and Commercial Sensing symposium. The conference was held this year from 9-13 April, in Anaheim, California. The goal of the conference is to bring together the technical, operational, (users) and policy community to provide a forum for discussion of problems, issues, and technology involving interoperability for persistent ISR. This conference focuses on promoting and advancing technology and interoperability for persistent ISR resulting in enhanced situational understanding for the warfighter decision makers!

The conference included 54 technical papers with oral presentations spread over twelve different session topics: Coalition Operations and Interoperability; Internet of Things (IoT) Applications; Anomaly Determination and Deep Learning Analytics; Human-machine Interface and Machine Learning Approaches I & II; Detection, Tracking and Localization for Persistent Surveillance; Modeling & Simulation and Enabling Technologies I & II; Optimization of Utility of ISR Assets; ISR Airborne Imaging/Sensing; ISR Vehicle Steering/Control; and ISR Image Processing.

We hope you find the proceedings both provocative and informative. We are looking forward to an even more exciting conference in 2018 which will be held 15-19, April, in Orlando, Florida. We are planning some exciting events which will include a holistic and provocative panel discussion on Situational Awareness and joint sessions with several other conferences. We hope that everyone will join us then.

Tien Pham
Michael A. Kolodny
