Proc. of SPIE Vol. 10205, 1020501 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2270678

Proc. of SPIE Vol. 10205 1020501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>

SESSION 1 OPEN ARCHITECTURE SYSTEMS I

10205 02	Sensor Open System Architecture (SOSA) evolution for collaborative standards development (Invited Paper) [10205-1]
10205 03	GBU-X bounding requirements for highly flexible munitions (Invited Paper) [10205-2]
10205 04	Mission Systems Open Architecture Science and Technology (MOAST) program (Invited Paper) [10205-3]

SESSION 2 OPEN ARCHITECTURE SYSTEMS II

10205 06	Model based design introduction: modeling game controllers to microprocessor architectures [10205-6]
10205 07	EASEE: an open architecture approach for modeling battlespace signal and sensor phenomenology [10205-7]
10205 08	Using virtual reality and game technology to assist command and control [10205-9]

SESSION 3 COMMUNICATION AND SENSOR NETWORKS

10205 09	Communication networks for the tactical edge (Invited Paper) [10205-10]
10205 0D	System architecture of communication infrastructures for PPDR organisations [10205-14]
10205 0E	Sensor network architecture for monitoring turtles on seashore [10205-15]
10205 0F	Application of assurance-driven design to capability set management [10205-16]

SESSION 4 OPEN ARCHITECTURE SYSTEMS III

10205 0H	Next Generation Space Interconnect Standard (NGSIS): a modular open standards approach for high performance interconnects for space (Invited Paper) [10205-18]
----------	---

**SESSION 5 AUTONOMOUS C4ISR SYSTEMS OF THE FUTURE: JOINT SESSION WITH CONFERENCES 10194
AND 10205**

- 10205 0I **On the application of neural networks to the classification of phase modulated waveforms
(Keynote Paper)** [10205-19]
- 10205 0J **Blue Guardian: open architecture intelligence, surveillance, and reconnaissance (ISR)
demonstrations (Invited Paper)** [10205-20]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

- 6 Self-organizing, Collaborative Unmanned Robotic Team: Joint session
with conferences 10195 and 10205
Raja Suresh, General Dynamics Mission Systems (United States)

Introduction

These are the proceedings of the twenty second Open Architecture/Open Business Model Net-centric Systems and Defense Transformation conference. The papers presented at the conference strongly reflected the inexorable trend towards Open Architecture/Open Business Model acquisition patterns to provide the government Better Buying Power (BBP). The conference included the following joint sessions:

1. Self-organizing Collaborative Unmanned ISR Teams, held jointly with the Unmanned Systems Technology conference.
2. Autonomous C4ISR Systems of the Future, held jointly with the Micro-and Nanotechnology Sensors, Systems, and Applications conference.

The conference included a special session on Communication and Sensor Networks.

The conference included invited papers by several luminaries from the DoD.

Looking ahead, we expect Net-centric systems to increasingly focus on Open Architectures (OA) and Open Business Models (OBM). Such OA/OBM systems seek to mimic the successful PC industry and hold the promise to dramatically reduce the acquisition and life cycle costs of military systems, and tremendously accelerate the rate of technology refresh in military systems.

It is gratifying to see the high level of audience interest in this conference. Particularly gratifying is the fact that this conference has resulted in the “spin-off” of several new conferences at SPIE Defense & Security. My sincere thanks to the distinguished invited speakers, authors, attendees, and my associates on the program committee for another successful conference.

Raja Suresh
