Event: Eighth International Conference on Graphic and Image Processing, 2016, Tokyo, Japan

PROCEEDINGS OF SPIE

Eighth International Conference on Graphic and Image Processing (ICGIP 2016)

**Tuan D. Pham
Vit Vozenilek
Zhu Zeng**
Editors

**29–31 October 2016
Tokyo, Japan**

Organized by
International Association of Computer Science and Information Technology, Singapore

Sponsored by
University of Aizu (Japan)
Wuhan University (China)
Linköping University (Sweden)
Palacky University (Czech Republic)

Published by
SPIE

Volume 10225

Proceedings of SPIE 0277-786X, V. 10225

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Eighth International Conference on Graphic and Image Processing (ICGIP 2016), edited by Tuan D. Pham, Vit Vozenilek, Zhu Zeng, Proc. of SPIE Vol. 10225, 1022501 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2271086

Proc. of SPIE Vol. 10225 1022501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix	<i>Authors</i>
xiii	<i>Conference Committee</i>
xv	<i>Introduction</i>

SECTION 1 FEATURE EXTRACTION AND PATTERN MATCHING

10225 02	Feature extraction using gray-level co-occurrence matrix of wavelet coefficients and texture matching for batik motif recognition [10225-79]
10225 03	Fast template matching based on grey prediction for real-time object tracking [10225-22]
10225 04	Object tracking via kernel-based forward-backward keypoint matching [10225-43]
10225 05	Navigable points estimation for mobile robots using binary image skeletonization [10225-98]
10225 06	Using the erroneous data clustering to improve the feature extraction weights of original image algorithms [10225-6]
10225 07	An improved RANSAC algorithm for line matching on multispectral images [10225-46]
10225 08	Automatic detection and extraction of ultra-fine bright structure observed with new vacuum solar telescope [10225-96]

SECTION 2 TARGET DETECTION AND RECOGNITION

10225 09	Unconstrained face detection and recognition based on RGB-D camera for the visually impaired [10225-18]
10225 0A	Gait recognition based on integral outline [10225-21]
10225 0B	Deep learning and non-negative matrix factorization in recognition of mammograms [10225-32]
10225 0C	TDSIFT: a new descriptor for 2D and 3D ear recognition [10225-55]
10225 0D	Pre-impact fall detection system using dynamic threshold and 3D bounding box [10225-66]
10225 0E	Overhead spine arch analysis of dairy cows from three-dimensional video [10225-5]
10225 0F	Real time lobster posture estimation for behavior research [10225-40]

- 10225 OG **Face recognition based on the band fusion of generalized phase spectrum of 2D-FrFT** [10225-41]
- 10225 OH **Arabic sign language recognition based on HOG descriptor** [10225-45]
- 10225 OI **Kinect-based sign language recognition of static and dynamic hand movements** [10225-56]
- 10225 OJ **Emotion detection model of Filipino music** [10225-58]
- 10225 OK **Tele-operated search robot for human detection using histogram of oriented objects** [10225-78]
- 10225 OL **The identification of molecular surfaces' feature regions based on spherical mapping** [10225-85]
- 10225 OM **Support vector machine and mel frequency Cepstral coefficient based algorithm for hand gestures and bidirectional speech to text device** [10225-91]
- 10225 ON **Circle Hough transform implementation for dots recognition in braille cells** [10225-93]
- 10225 OO **Error-detective one-dimensional mapping** [10225-103]
- 10225 OP **A scale-invariant keypoint detector in log-polar space** [10225-104]
- 10225 OQ **An automated detection for axonal boutons in vivo two-photon imaging of mouse** [10225-107]

SECTION 3 IMAGE TRANSFORMATION AND ANALYSIS

- 10225 OR **Two-stage underwater image restoration based on a physical model** [10225-50]
- 10225 OS **An evaluation on CT image acquisition method for medical VR applications** [10225-60]
- 10225 OT **Mosaicing of fisheye images through conformal projection and sphere matching** [10225-42]
- 10225 OU **A liver cirrhosis classification on B-mode ultrasound images by the use of higher order local autocorrelation features** [10225-73]
- 10225 OW **Extended gray level co-occurrence matrix computation for 3D image volume** [10225-87]
- 10225 OX **Classification of photographed document images based on deep-learning features** [10225-90]
- 10225 OY **An improved the volume trace transform by a sub-micro pattern for solving the Gaussian noise image problem** [10225-117]
- 10225 OZ **An effective image classification method with the fusion of invariant feature and a new color descriptor** [10225-71]

- 10225 10 **A multi-label image annotation scheme based on improved SVM multiple kernel learning** [10225-8]
- 10225 11 **Multi-frame blind image deconvolution through split frequency - phase recovery** [10225-30]
- 10225 12 **High resolution OCT image generation using super resolution via sparse representation** [10225-33]

SECTION 4 IMAGE SEGMENTATION

- 10225 13 **Various uses of statistical tools for texture analysis** [10225-39]
- 10225 14 **Bounded Rayleigh mixture model for ultrasound image segmentation** [10225-84]
- 10225 15 **Multi-scales region segmentation for ROI separation in digital mammograms** [10225-100]
- 10225 16 **Omega-3 chicken egg detection system using a mobile-based image processing segmentation method** [10225-3]
- 10225 17 **Surgical wound segmentation based on adaptive threshold edge detection and genetic algorithm** [10225-9]
- 10225 18 **SOM-based nonlinear least squares twin SVM via active contours for noisy image segmentation** [10225-24]
- 10225 19 **Novel approach for automatic segmentation of LV endocardium via SPCNN** [10225-31]
- 10225 1A **Handwritten text line segmentation by spectral clustering** [10225-89]

SECTION 5 IMAGE RECONSTRUCTION AND IMAGE SECURITY

- 10225 1B **Image steganography using layered pixel-value differencing** [10225-35]
- 10225 1C **Fingerprint spoof detection using wavelet based local binary pattern** [10225-69]
- 10225 1D **Image watermarking against lens flare effects** [10225-77]
- 10225 1E **Indoor space 3D visual reconstruction using mobile cart with laser scanner and cameras** [10225-51]
- 10225 1F **Robust optical flow using adaptive Lorentzian filter for image reconstruction under noisy condition** [10225-54]
- 10225 1G **The ultra-rate spatial enhancement using Huber regularization MSRR and Huber high-spectrum expectation** [10225-65]

SECTION 6 VISUAL AND VIDEO PROCESSING TECHNOLOGY

- 10225 1H **Estimating 3D gaze in physical environment: a geometric approach on consumer-level remote eye tracker** [10225-12]
- 10225 1I **An add-on video compression codec based on content-adaptive sparse super-resolution reconstructions** [10225-15]
- 10225 1J **Sample-adaptive-prediction for HEVC SCC intra coding with ridge estimation from spatially neighboring samples** [10225-16]
- 10225 1K **A neighbor pixel communication filtering structure for Dynamic Vision Sensors** [10225-26]
- 10225 1L **Detecting dominant motion patterns in crowds of pedestrians** [10225-67]
- 10225 1M **Visual identification and similarity measures used for on-line motion planning of autonomous robots in unknown environments** [10225-94]
- 10225 1N **Color image zero-watermarking based on SVD and visual cryptography in DWT domain** [10225-99]
- 10225 1O **Multiple candidates and multiple constraints based accurate depth estimation for multi-view stereo** [10225-102]
- 10225 1P **An improved TLD with Harris corner and color moment** [10225-110]
- 10225 1Q **The software for automatic creation of the formal grammars used by speech recognition, computer vision, editable text conversion systems, and some new functions** [10225-112]
- 10225 1R **Measuring tail beat frequency and coast phase in school of fish for collective motion analysis** [10225-44]
- 10225 1S **Head pose free 3D gaze estimation using RGB-D camera** [10225-4]
- 10225 1T **IECDS: an improved electrical charge distribution on the shape** [10225-10]

SECTION 7 IMAGE PROCESSING AND APPLICATION

- 10225 1U **Landscape analysis through remote sensing and GIS techniques: a case study of Astrakhan, Russia** [10225-27]
- 10225 1V **Deep learning in assessment of drill condition on the basis of images of drilled holes** [10225-29]
- 10225 1W **Cloud-based application for rice moisture content measurement using image processing technique and perceptron neural network** [10225-80]
- 10225 1X **Low cost 3D scanning process using digital image processing** [10225-92]

- 10225 1Y **Behavioral similarity measurement based on image processing for robots that use imitative learning** [10225-97]
- 10225 1Z **Selection of achromatic and non-neutral colors to fill lacunae in frescoes guided by a variational model of perceived contrast** [10225-116]
- 10225 20 **Scene classification for weak devices using spatial oriented gradient indexing** [10225-19]
- 10225 21 **Visualization and processing of images in nano-resolution** [10225-70]
- 10225 22 **Temperature and oxygen visual estimator for carbonization process control** [10225-95]
- 10225 23 **The simulation of the half-dry stroke based on the force feedback technology** [10225-34]
- 10225 24 **Surface height map estimation from a single image using convolutional neural networks** [10225-48]
- 10225 25 **Discriminant analysis of multiple cortical changes in mild cognitive impairment** [10225-25]

SECTION 8 MEDICAL IMAGE PROCESSING

- 10225 26 **Automatic wound infection interpretation for postoperative wound image** [10225-13]
- 10225 27 **Automatic right ventricle segmentation in cardiac MRI via anisotropic diffusion and SPCNN** [10225-17]
- 10225 28 **CUDA-based acceleration of collateral filtering in brain MR images** [10225-74]
- 10225 29 **A new boundary correction method for lung parenchyma** [10225-2]
- 10225 2A **Evaluation of feature selection algorithms for classification in temporal lobe epilepsy based on MR images** [10225-36]
- 10225 2B **Detection of tuberculosis using hybrid features from chest radiographs** [10225-62]
- 10225 2C **Regions of micro-calcifications clusters detection based on new features from imbalance data in mammograms** [10225-72]
- 10225 2D **Recursive Gauss-Seidel median filter for CT lung image denoising** [10225-86]
- 10225 2E **Determining the number of clusters for nuclei segmentation in breast cancer image** [10225-88]
- 10225 2F **Link prediction boosted psychiatry disorder classification for functional connectivity network** [10225-115]

SECTION 9 COMPUTER ENGINEERING AND PHOTOGRAPHY

- 10225 2G **3D kinematic measurement of human movement using low cost fish-eye cameras**
[10225-49]
- 10225 2H **Foreground extraction for moving RGBD cameras** [10225-14]
- 10225 2I **Analyzing machine noise for real time maintenance** [10225-11]
- 10225 2J **An interpretation model of GPR point data in tunnel geological prediction** [10225-23]
- 10225 2K **Optimization of deep learning algorithms for object classification** [10225-38]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Advisory Committee

David Zhang, Hong Kong Polytechnic University (Hong Kong)
Godfried T. Toussaint, New York University Abu Dhabi (UAE)
Josef Kittler, University of Surrey (United Kingdom)

Conference Chairs

Tuan D. Pham, Linkoping University (Sweden)
Vít Vozenilek, Palacky University (Czech Republic)

Program Committee

Feng Tian, Bournemouth University (United Kingdom)
Hui Yu, University of Portsmouth (United Kingdom)
Hayato Ohwada, Tokyo University of Science (Japan)

Session Chairs

- 1 Pattern Recognition
Vít Vozenilek, Palacky University (Czech Republic)
- 2 Signal processing and computer science
András Horváth, Peter Pazmany Catholic University (Hungary)
- 3 Computer Vision and Video Processing
Je-Won Kang, Ewha Womans University (Korea)
- 4 Image Segmentation
Tuan D. Pham, Linkoping University (Sweden)
- 5 Image Analysis
Thumrongrat Amornraksa, King Mongkut's University of Technology Thonburi (Thailand)
- 6 Target Detection and Image Information on Security
Jessie R. Balbin, Mapua Institute of Technology (Philippines)
- 7 Image processing technology and application
Muhamad Taufik Abdullah, University Putra Malaysia (Malaysia)

Introduction

Dear Distinguished Delegates and Guests,

It was a great pleasure for us to organize 2016 8th International Conference on Graphic and Image Processing (ICGIP 2016) from October 29-31, 2016 in Tokyo, Japan.

This conference is hosted at Hotel Sunroute Plaza Shinjuku, co-sponsored by International Association of Computer Science and Information Technology, University of Aizu, Wuhan University, Linkoping University and Palacky University.

ICGIP conference has become a popular annual event particularly attracting the young researchers. It has established itself as a world-class conference in which participants from academia and industry interact through formal presentations and informal discussions, accompanied with keynotes.

The purpose of ICGIP 2016 is to share an opportunity for researchers to introduce recent issues related to Graphic and Image Processing. It covers a broad range of topics in the field, such as Image acquisition, Pattern recognition and analysis, Signal Noise Control, Watermarking, and Nonlinear Signals and Systems, etc. We thank the members of the ICGIP 2016 committee for managing the reviews of submissions. We believe these are the main driving factors attributed to our success.

This year 171 papers were submitted, and all the submitted papers in the proceeding have been peer reviewed by the reviewers drawn from the scientific committee, external reviewers and editorial board depending on the subject matter of the paper. Reviewing and initial selection were undertaken electronically. After the rigorous peer-review process, the submitted papers were selected on the basis of originality, significance, and clarity for the purpose of the conference. We want to thank all the authors for submitting their innovative and sound work to ICGIP 2016.

Apart from Technical paper presentation, there were also keynote lectures. We are grateful to the keynote speakers for accepting our invitation. They are Prof. Tuan D. Pham from Linkoping University, Sweden, Prof. Shigeo Takahashi from University of Aizu, Japan, Prof. Patrick Wang from Northeastern University, USA, Prof. Vit Vozenilek, Palacky University from Czech Republic and Prof. Hiroshi FUJITA from Gifu University, Japan.

We extend our gratitude to the partners and sponsors who made the events feasible. We truly believe the participants will find the discussion fruitful, and will enjoy the opportunity for setting up future collaborations. It is our sincere hope that ICGIP will one day become the leading conference in this specific academic area.

Vit Vozenilek
