SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Photon Counting Applications 2017, edited by Ivan Prochazka, Roman Sobolewski, Ralph B. James, Proc. of SPIE Vol. 10229, 1022901 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2281901

Proc. of SPIE Vol. 10229 1022901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY
SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SUPERCONDUCTING PHOTON COUNTING I

10229 03	Superconducting nanowire single-photon detectors: recent advances (Invited Paper) [10229-2]
----------	---

SOLID STATE PHOTON COUNTING AND ITS APPLICATIONS I

10229 0A	High-performance integrated pick-up circuit for SPAD arrays in time-correlated single photon counting (Invited Paper) [10229-9]
10229 0B	High-efficiency dynamic routing architecture for the readout of single photon avalanche diode arrays in time-correlated measurements [10229-10]
10229 0C	Photon counting detector package optimized for laser time transfer with sub-picosecond limiting precision and stability [10229-11]
10229 0D	Development of a high-performance multi-channel system for time-correlated single photon counting [10229-12]
10229 0E	Development and characterization of an 8x8 SPAD-array module for gigacount per second applications [10229-13]

SUPERCONDUCTING PHOTON COUNTING II

10229 0G	Coherent detection of weak signals with superconducting nanowire single photon detector at the telecommunication wavelength (Invited Paper) [10229-15]
10229 0H	Superconducting order parameter fluctuations in NbN/NiCu and NbTiN/NiCu bilayer nanostripes for photon detection [10229-16]
10229 0I	Investigation of dark counts in innovative materials for superconducting nanowire single-photon detector applications [10229-17]

SOLID STATE PHOTON COUNTING AND ITS APPLICATIONS II

10229 0J	Satellite laser ranging in the near-infrared regime (Invited Paper) [10229-18]
----------	---

- 10229 OK **Satellite and lunar laser ranging in infrared** [10229-19]
- 10229 OL **Evaluation of performance of silicon photomultipliers in LIDAR applications** [10229-20]
- 10229 ON **Ultra-high optical responsivity of semiconducting asymmetric nano-channel diodes for photon detection** [10229-22]

POSTER SESSION

- 10229 OP **An ultra-fast thermoelectric sensor for single-photon detection in a wide range of the electromagnetic spectrum** [10229-24]
- 10229 OQ **Tracks detection from high-orbit space objects** [10229-25]
- 10229 OR **Short-range energy budget simulator of single photon lidar demonstrator** [10229-26]
- 10229 OS **Time transfer capability of standard small form factor pluggable laser modules based on photon counting approach** [10229-27]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jiri Homola, Institute of Photonics and Electronics of the ASCR, v.v.i.
(Czech Republic)
Bedrich Rus, Institute of Physics of the ASCR, v.v.i. (Czech Republic)
Chris Edwards, Central Laser Facility, Science and Technology
Facilities Council (United Kingdom)
Mike Dunne, SLAC National Accelerator Laboratory (United States)
and Linac Coherent Light Source (United States)
Ivo Rendina, Istituto per la Microelettronica e Microsistemi, CNR (Italy)

Conference Chairs

Ivan Prochazka, Czech Technical University in Prague
(Czech Republic)
Roman Sobolewski, University of Rochester (United States)
Ralph B. James, Savannah River National Laboratory (United States)

Conference Programme Committee

Josef Blazej, Czech Technical University in Prague (Czech Republic)
Ulrich Schreiber, Technische Universität München (Germany)
Valery Zwiller, KTH Royal Institute of Technology (Sweden)

Session Chairs

- 1 Superconducting Photon Counting I
Roman Sobolewski, University of Rochester (United States)
- 2 X-ray Photon Detection
Aleksey E. Bolotnikov, Brookhaven National Laboratory
(United States)
- 3 Solid State Photon Counting and Its Applications I
Ivan Prochazka, Czech Technical University in Prague
(Czech Republic)
- 4 Superconducting Photon Counting II
Oleg A. Mukhanov, HYPRES, Inc. (United States)
- 5 Solid State Photon Counting and Its Applications II
Josef Blazej, Czech Technical University in Prague (Czech Republic)

Introduction

This volume contains the proceedings of the SPIE Conference on Photon Counting Applications. The conference was held on 24–25 April, in Prague, Czech Republic as part of SPIE Optics and Optoelectronics 2017. The meeting was organized into technical sessions on superconducting photon counting, X-ray photon detection, and solid-state photon counting and applications. A poster session was also featured.

The purpose of the conference was to provide a forum for scientists and engineers from the detector development and user communities to present and evaluate the most recent results on photon-counting detectors and to discuss the requirements for a variety of detection and imaging applications. A total of 24 presentations, including four posters, were presented at the conference. This book provides detailed documentation describing a portion of the presentations. The editors hope that it will serve as an important record of the meeting, provide an update on the status of photon-counting detectors and applications, and serve as a useful resource for those working in the field.

The Conference Chairs would like to thank the Session Chairs and members of the Conference Programme Committee, who offered their time to enlist the involvement of researchers working in the field.

Ivan Prochazka
Roman Sobolewski
