PROCEEDINGS OF SPIE

Medical Applications of Laser-Generated Beams of Particles IV: Review of Progress and Strategies for the Future

Kenneth W. D. Ledingham

Editor

24–25 April 2017

Prague, Czech Republic

Sponsored by
SPIE

Cooperating Organisations
Science and Technology Facilities Council (United Kingdom)
ELI Beamlines (Czech Republic)
Laserlab Europe
AILU—Association of Laser Users (United Kingdom)
European Optical Society
HiLASE (Czech Republic)
AWE—Atomic Weapons Establishment (United Kingdom)

Published by
SPIE

Volume 10239

Proceedings of SPIE 0277-786X, V. 10239

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Medical Applications of Laser-Generated Beams of Particles IV: Review of Progress and Strategies
for the Future, edited by Kenneth W. D. Ledingham, Proc. of SPIE Vol. 10239, 1023901
© 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2281167

Proc. of SPIE Vol. 10239 1023901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a seven-digit CID article numbering system in which:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SESSION 1 HAVE LASERS A PART TO PLAY IN PROTON THERAPY?

10239 04	Laser-driven particle acceleration for radiobiology and radiotherapy: where we are and where we are going [10239-3]
----------	--

SESSION 2 MEDICAL APPLICATIONS OF LASER-GENERATED BEAMS OF PARTICLES I

10239 06	Application of laser-wakefield-based x-ray source to global food security issues [10239-6]
10239 07	Nanomedical science and laser-driven particle acceleration: promising approaches in the prethermal regime [10239-7]
10239 0A	New approaches in clinical application of laser-driven ionizing radiation [10239-10]
10239 0B	On the potential of laser driven isotope generation at ELI-NP for positron emission tomography [10239-21]

SESSION 3 MEDICAL APPLICATIONS OF LASER-GENERATED BEAMS OF PARTICLES II

10239 0C	Laser-plasma generated very high energy electrons (VHEEs) in radiotherapy [10239-14]
----------	---

POSTER SESSION

10239 0H	Modeling of the laser device for the stress therapy [10239-18]
10239 0J	Application autofluorescence diagnosis method in endoscopy for investigation mucosal structure in gastrointestinal tract [10239-15]
10239 0K	The meat product quality control by a polarimetric method [10239-19]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jiri Homola, Institute of Photonics and Electronics of the ASCR, v.v.i.
(Czech Republic)
Bedrich Rus, Institute of Physics of the ASCR, v.v.i. (Czech Republic)
Chris Edwards, Central Laser Facility, Science and Technology
Facilities Council (United Kingdom)
Mike Dunne, SLAC National Accelerator Laboratory (United States)
and Linac Coherent Light Source (United States)
Ivo Rendina, Istituto per la Microelettronica e Microsistemi, CNR (Italy)

Conference Chair

Kenneth W. D. Ledingham, University of Strathclyde (United Kingdom)

Conference Co-chairs

Paul R. Bolton, Ludwig-Maximilians-Universität München (Germany)
Antonio Giulietti, Consiglio Nazionale delle Ricerche (Italy)
Paul McKenna, University of Strathclyde (United Kingdom)
Klaus Spohr, University of the West of Scotland (United Kingdom)

Conference Programme Committee

Sergei V. Bulanov, Japan Atomic Energy Agency (Japan)
Thomas E. Cowan, Helmholtz-Zentrum Dresden-Rossendorf e. V.
(Germany)
Wolfgang Enghardt, Technische Universität Dresden (Germany)
Jean-Claude Kieffer, Institut National de la Recherche Scientifique
(Canada)
Chang-Ming C. Ma, Fox Chase Cancer Center (United States)
Victor Malka, Ecole Nationale Supérieure de Techniques Avancées
(France)
Franz Pfeiffer, Technische Universität München (Germany)
Markus Roth, Kiepenheuer-Institut für Sonnenphysik (Germany)
Akifumi Yogo, Japan Atomic Energy Agency (Japan)

Session Chairs

- 1 Have Lasers a Part to Play in Proton Therapy?
Kenneth W. D. Ledingham, University of Strathclyde (United Kingdom)
- 2 Medical Applications of Laser-Generated Beams of Particles I
Paul R. Bolton, Ludwig-Maximilians- Universität München (Germany)
- 3 Medical Applications of Laser-Generated Beams of Particles II
Kenneth W. D. Ledingham, University of Strathclyde (United Kingdom)
