, "Front Matter: Volume 10244," Proc. SPIE 10244, International Conference on Optoelectronics and Microelectronics Technology and Application, 1024401 (5 January 2017); doi: 10.1117/12.2269869

SPIE.

Event: International Conference on Optoelectronics and Microelectronics Technology and Application, 2016, Shanghai, China

PROCEEDINGS OF SPIE

International Conference on Optoelectronics and Microelectronics Technology and Application

**Yangyuan Wang
Guofan Jin**
Editors

**10–12 October 2016
Shanghai, China**

Organized by
Chinese Society for Optical Engineering (China)
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)
Science and Technology on Electro-Optical Information Security Control Laboratory (China)

Sponsored by
Chinese Academy of Engineering (China)
National Natural Science Foundation of China (China)
Chinese Society for Optical Engineering (China)

Published by
SPIE

Volume 10244

Proceedings of SPIE 0277-786X, V. 10244

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

International Conference on Optoelectronics and Microelectronics Technology and Application, edited by
Yangyuan Wang, Guofan Jin, Proc. of SPIE Vol. 10244, 1024401 · © 2017 SPIE · CCC code:
0277-786X/17/\$18 · doi: 10.1117/12.2269869

Proc. of SPIE Vol. 10244 1024401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Optoelectronics and Microelectronics Technology and Application*, edited by Yangyuan Wang, Guofan Jin, Proceedings of SPIE Vol. 10244 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix	<i>Authors</i>
xiii	<i>Conference Committees</i>
xv	<i>Introduction</i>

OPTICAL INTERCONNECTS

10244 02	Signal detection for polarization multiplexing QAM optical coherent receivers using ESN [10244-101]
10244 03	An all-fiber spectroscopic Raman lidar system for atmospheric water vapor measurements [10244-102]
10244 04	A highly-reliable long-reach WDM access network with broadcasting services and flexible scalability [10244-103]
10244 05	Design of diffractive optical elements for optical interconnections [10244-104]
10244 06	PMD monitoring with the interference of CD and OSNR using delay-tap sampling [10244-106]
10244 07	Analysis of performance of high light-energy-utilization-ratio laser communication antenna based on axicon [10244-107]
10244 08	Synchronization schemes for continuous-variable quantum key distribution [10244-108]
10244 09	Modified algorithm for calculating the center position of optical vortices in the space optical communication system [10244-110]
10244 0A	MPNACK: an optical switching scheme enabling the buffer-less reliable transmission [10244-111]
10244 0B	A hybrid multiplexer for wavelength/mode-division based on photonic crystals [10244-120]

OPTOELECTRONIC SENSING AND IMAGING TECHNOLOGY

10244 0C	Realization of circularly polarized beam based on plasmonic metasurface [10244-1]
10244 0D	Design and optimization of an active ring-coupled Mach-Zehnder interferometer for rotation sensing [10244-3]

10244 OE	Improving the scale factor for rotation sensing in a frequency sensitive integrated optical gyroscope [10244-4]
10244 OF	Camouflage target detection via hyperspectral imaging plus information divergence measurement [10244-5]
10244 OG	Research of elevation error based on points cloud data of stripe principle lidar [10244-6]
10244 OH	A review on several key problems of standoff trace explosives detection by optical-related technology [10244-7]
10244 OI	Vibration measurement research with stroboscopic method in electrical speckle shearing pattern interferometry [10244-8]
10244 OJ	Study on infrared athermal defocusing amount test system [10244-9]
10244 OK	Microscope droplet size detecting based on image processing [10244-12]
10244 OL	Preliminary research on organics recognition by x-ray absorption spectroscopy detection and classification [10244-14]
10244 OM	Research on stability control of floated inertial platform based on ADRC [10244-16]
10244 ON	Plasma characteristics of single crystal silicon irradiated by millisecond pulsed laser [10244-17]
10244 OO	Wide color gamut LCD module using white light LED [10244-18]
10244 OP	Radiation characteristics analysis of space target photoelectric detection [10244-19]
10244 OQ	Spatial implementation for compressive imaging [10244-20]
10244 OR	Distributed optical fiber sensor based on modulated dual-pulse probe signal [10244-22]
10244 OS	Effect on maximum ranging distance of laser range finder in different visibility with power fluctuation of emitting system [10244-23]
10244 OT	Experiment on infrared radiation characteristic of colloid Fe/Al thermite [10244-24]
10244 OU	Computational polarization difference underwater imaging based on image fusion [10244-25]
10244 OV	A CMOS APS arrays with TDI in analog voltage domain [10244-26]
10244 OW	The design of rapid MicroRNA detection system [10244-28]
10244 OX	The application of compressed sensing algorithm based on total variation method into ghost image reconstruction [10244-29]
10244 OY	Infrared characteristics and flow field of the exhaust plume outside twin engine nozzle [10244-36]

- 10244 0Z **Segmented-spectrum detection mechanism for medical x-ray in CdTe** [10244-45]
- 10244 10 **Trajectory estimating methods based on dynamic uncertainty of optical measurement**
[10244-46]
- 10244 11 **Experiment research of the temperature characteristics of transmissive silica waveguide
ring resonator** [10244-61]
- 10244 12 **An amplified distributed feedback fiber laser for distributed and interference sensing**
[10244-62]
- 10244 13 **A study of sheath flow method in laser scattering particles size measurement** [10244-64]
- 10244 14 **A real-time spectrum acquisition system design based on quantum dots-quantum well
detector** [10244-65]
- 10244 15 **Design and analysis of particles detecting system based on near forward light scattering**
[10244-75]
- 10244 16 **Low temperature readout circuit characteristics of low dimensional compound
semiconductor photodetectors** [10244-76]
- 10244 17 **The 64 pixels pulse frequency modulation and capacitive transimpedance amplifier
readout circuit** [10244-81]
- 10244 18 **Application research of achromatic double-prism scanner for free space laser
communication** [10244-86]
- 10244 19 **Influence of size of the spherical scatterers and the attenuation coefficient on the
polarization memory based on the Electric Monte Carlo simulation** [10244-87]
- 10244 1A **A design of atmospheric laser communication system based on semiconductor laser**
[10244-88]
- 10244 1B **Research on processing and optimization's method of BOTDR distributed optical fiber
sensor signal** [10244-89]
- 10244 1C **Review of passive-blind detection in digital video forgery based on sensing and imaging
techniques** [10244-90]
- 10244 1D **Character superimposition inpainting in surveillance video** [10244-95]
- 10244 1E **Surface platinum metal plasma resonance photonic crystal fiber sensor** [10244-97]
- 10244 1F **Design on catadioptric panoramic imaging system** [10244-99]
- 10244 1G **Simulation research of location mechanism of chaotic distributed optical fiber sensing
system** [10244-200]
- 10244 1H **Analysis method of microstructure surface topography based on wavelet filter** [10244-202]
- 10244 1I **A novel optical system design of light field camera** [10244-91]

MICROWAVE PHOTONICS

- 10244 1J **Coherence-free and reconfigurable microwave photonic filter using coherent-to-incoherent light conversion** [10244-401]
- 10244 1K **Micro-ring sensor used in the diagnosis of gastric cancer** [10244-402]
- 10244 1L **Evaluation of the un-eliminated laser phase noise induced by interferometer imbalance in self-homodyne coherent optical RF receivers** [10244-403]
- 10244 1M **Photonic generation of high order uniform QAM signals based on IQ modulators** [10244-404]
- 10244 1N **Radiation characteristics of photoconductive antennas based on low-temperature grown GaAs** [10244-405]
- 10244 1O **Microwave photonic frequency down-conversion link based on intensity and phase paralleled modulation** [10244-406]
- 10244 1P **Application of the leapfrog ADI-FDTD method and PML boundary condition to dielectric** [10244-407]
- 10244 1Q **The application of microwave photonics delay-modulation in radar countermeasures** [10244-408]
- 10244 1R **The qualitative identification of different alfalfa breed in same forage series by the terahertz spectroscopy** [10244-409]
- 10244 1S **Experimental research on beam steering characteristics of liquid crystal optical phased array** [10244-410]

MICRO-ENERGY OPTOELECTRONICS

- 10244 1T **Design on compatible stealth photonic crystal of near/middle infrared and 1.06 μm laser** [10244-501]
- 10244 1U **Interface state density effect on the performance of graphene silicon heterojunction solar cell** [10244-502]

WIDE BANDGAP SEMICONDUCTOR TECHNOLOGY

- 10244 1V **Study on frequency stabilization of diode laser saturated absorption spectroscopy** [10244-602]
- 10244 1W **Characterization of down-state capacitance degradation in capacitive RF MEMS switch with rough dielectric layer** [10244-604]
- 10244 1X **Thermal degradation of InGaN/GaN quantum wells in blue laser diode structure during the epitaxial growth** [10244-605]

10244 1Y **GaN-based flip-chip parallel micro LED array for visible light communication** [10244-606]

NANOPHOTONICS

10244 1Z **Fully vertical-coupling and one-step etching subwavelength binary blazed grating coupler** [10244-701]

10244 20 **Schottky photodetector with tapered thin metal strip on silicon waveguide** [10244-702]

10244 21 **Flexible multifunction optical micro-manipulation technique based on PDMS chip** [10244-706]

10244 22 **Colloidal quantum dots based integrated fiber-optic detector** [10244-707]

10244 23 **Spatial dispersion for diffraction grating based optical systems** [10244-710]

10244 24 **Compact and efficient large cross-section SOI rib waveguide taper optimized by a genetic algorithm** [10244-711]

10244 25 **Imaging to single virus by using surface plasmon polariton scattering** [10244-712]

10244 26 **Graphene-based optical absorbers in middle-infrared wavelengths** [10244-713]

10244 27 **Design of film-micro-cavity interleaver filters based on digital signal processing** [10244-714]

10244 28 **Guided-mode resonance filter with variable bandwidth using coupling gratings near the Brewster angle** [10244-715]

10244 29 **CMOS compatible thermal tunable planar silicon etched diffraction gratings** [10244-716]

10244 2A **A tunable optofluidic circular liquid fiber** [10244-719]

10244 2B **Gold nanoparticle sorting based on optofluidics** [10244-720]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Yue Hao, Xidian University (China)
Yueguang Lv, Northern Institute of Electronic Equipment (China)
Shaohua Yu, Wuhan Research Institute of Posts and Telecommunications (China)
Wei Huang, Nanjing Tech University (China)
Ru Huang, Peking University (China)

Organizing Committee

Chongjin Xie, Alibaba Group (United States)
Yikai Su, Shanghai Jiao Tong University (China)
Chao Zhang, University of Wollongong (Australia)
Wei Lu, Shanghai Institute of Technical Physics (China)
Nanjian Wu, Institute of Semiconductors (China)
Donal Bradley, University of Oxford (United Kingdom)
Akihiko Yoshikawa, Chiba University (Japan)
Yi Luo, Tsinghua University (China)
Yoshiaki Nakano, The University of Tokyo (Japan)
Bo Shen, Peking University (China)
Xinqiang Wang, Peking University (China)

Program Committee

Yong Liu, University of Electronic Science and Technology of China (China)
Xinliang Zhang, Huazhong University of Science and Technology (China)
Lianshan Yan, Southwest Jiaotong University (China)
Xiangjun Xin, Beijing University of Posts and Telecommunications (China)
Jianjun Yu, Fudan University (China)
Zhaohui Li, Jinan University (China)
Li Pei, Beijing Jiaotong University (China)
Xueming Liu, Xi'an Institute of Optics and Precision Mechanics (China)
Yiping Wang, Shenzhen University (China)
Yanqing Lu, Nanjing University (China)
Baiou Guan, Jinan University (China)

Wanhua Zheng, Institute of Semiconductors (China)
Yanyun Wang, Shanghai University (China)
Ming Li, Institute of Semiconductors (China)
Xuetao Gan, Northwestern Polytechnical University (China)
Qianggao Hu, Accelink Technologies Company, Ltd.(China)
Min Qiu, Zhejiang University (China)
XiaocongYuan, Shenzhen University (China)
Wei Shi, Tianjin University (China)
Weiyang Huang, Hong Kong Baptist University (Hong Kong, China)
Qichun Zhang, Nanyang Technological University (Singapore)
Xuhui Zhu, South China University of Technology (China)
Yixin Zhao, Shanghai Jiao Tong University (China)
Haoli Zhang, Lanzhou University (China)
Qiang Zhao, Nanjing University of Posts and Telecommunications (China)
Hiroshi Fujioka, The University of Tokyo (Japan)
Shijie Xu, The University of Hong Kong (Hong Kong, China)
Jung Han, Yale University (United States)
Tao Wang, The University of Sheffield (United Kingdom)
Xuqiang Shen, National Institute of Advanced Industrial Science and Technology (Japan)
Qixin Guo, Saga University (Japan)
Chih-Chung Yang, National Taiwan University (Taiwan, China)
HaoChung Kuo, National Chiao Tung University (China)
Jinming Li, Institute of Semiconductors (China)
Feng Yun, Xi'an Jiaotong University (China)
Dezhen Shen, Changchun Institute of Optics, Fine Mechanics and Physics (China)

Introduction

We had the great honor of organizing the International Conference on Optoelectronics and Microelectronics Technology and Application 2016 (OMTA 2016). It was truly a great pleasure for us to greet more than 500 participants from many different countries attending the symposium. We firmly believe this symposium will become an important international event in the field of optical technology.

OMTA 2016 was sponsored by the Information and Electronic Engineering Faculty, Chinese Academy of Engineering National, Natural Science Foundation of China, Chinese Society for Optical Engineering, organized by Chinese Society for Optical Engineering (CSOE), Photoelectronic Technology Committee, Chinese Society of Astronautics (CSA), Science and Technology on Low-light-level Night Vision Laboratory, Science and Technology on Electro-Optical Information Security Control Laboratory.

The symposium is to provide a forum for the participants to report and review innovative ideas and up-to-date progress and developments and discuss novel approaches to applications in the optical field. We sincerely hope that research and development in optical fields will be promoted, and international cooperation sharing a common interest will be enhanced.

On behalf of the other chairs and co-chairs and the organization committee, we would like to heartily thank our sponsors and organizers for all they have done for the symposia. Thanks also to all the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us to make the symposium possible, to the program committee for their effective work and valuable advice, especially the secretariat and the coordinators at SPIE for their tireless effort and outstanding services in preparing the symposium and publishing the proceedings.

Yangyuan Wang
