INTERNATIONAL CONFERENCE ON INNOVATIVE OPTICAL HEALTH SCIENCE

10245 02 Medical image segmentation based on SLIC superpixels model [10245-2]
10245 03 High-efficiency FRET-enhanced photoacoustic probes for in vivo tumor imaging [10245-3]
10245 04 An image enhancement technique using nonlinear transfer function and unsharp masking in multispectral endoscope [10245-4]
10245 05 Analysis of light incident location and detector position in early diagnosis of knee osteoarthritis by Monte Carlo simulation [10245-6]
10245 06 3D reconstruction of cortical microtubules using multi-angle total internal reflection fluorescence microscopy [10245-7]
10245 07 Novel regularized sparse model for fluorescence molecular tomography reconstruction [10245-8]
10245 08 A comprehensive description of diffraction phase microscopy [10245-9]
10245 09 Regulating the surface plasmon resonance coupling between Au-nanoparticle and Au-film [10245-10]
10245 0A A three-dimensional measurement method for medical electric endoscope [10245-11]
10245 0B The algorithm study for using the back propagation neural network in CT image segmentation [10245-12]
10245 0C 3D registration method based on scattered point cloud from B-model ultrasound image [10245-13]
10245 0D Minimally invasive positioning robot system of femoral neck hollow screw implants based on x-ray error correction [10245-14]
10245 0E The research on noninvasive detection of skin cholesterol by diffuse reflectance spectroscopy [10245-15]
10245 0F Cell light scattering characteristic numerical simulation research based on FDTD algorithm [10245-17]
The effect of mental fatigue on sustained attention: an fNIRS study [10245-18]

Real time monitoring to the odour of excrement for health of infants and elderly completely bedridden [10245-21]

The investigation of brain-computer interface for motor imagery and execution using functional near-infrared spectroscopy [10245-23]

Microcirculation monitoring with real time spatial frequency domain imaging [10245-24]

Lung cancer diagnosis with quantitative DIC microscopy and support vector machine [10245-25]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Conference Chairs

Xingde Li, Johns Hopkins University (United States)
Qingming Luo, Huazhong University of Science and Technology (China)

Organizing Committee

Daxi Xiong, Suzhou Institute of Biomedical Engineering and Technology (China)
Pengcheng Li, Huazhong University of Science and Technology (China)

Program Committee

Hui Li, Suzhou Institute of Biomedical Engineering and Technology (China)
Ke Si, Zhejiang University (China)
Ling Fu, Huazhong University of Science and Technology (China)
Liangyi Chen, Peking University (China)
Liang Song, Shenzhen Institutes of Advanced Technology (China)
Minbiao Ji, Fudan University (China)
Xiaowei Chen, Third Military Medical University (China)
Introduction

We had the great honor of organizing the International Conference on Innovative Optical Health Science. It was truly a great pleasure for us to greet more than 300 participants from many different countries attending these three symposia. We firmly believe the conference will become an important international event in the field of optical technology.

The International Conference on Innovative Optical Health Science was sponsored by Chinese Academy of Engineering, National Natural Science Foundation of China, and Chinese Society for Optical Engineering, and organized by Chinese Society for Optical Engineering and Suzhou Institute of Biomedical Engineering and Technology, Chinese Academy of Sciences.

The purpose of this conference is to provide a forum for the participants to report and review the innovative ideas, up-to-date progress and developments, and to discuss the novel approaches to application in the optical field. It is sincerely hoped that the research and development in optical field will be promoted, and the international cooperation sharing the common interest will be enhanced.

On behalf of the other chairs, co-chairs, and the organization committee of this conference, I would like to heartily thank our sponsors and organizers for all they have done for the symposia. Thanks also to all the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us to make the conference possible, to the program committee for their effective work and valuable advice, especially the secretariat and the editors in SPIE for their tireless effort and outstanding services in preparing the conference and publishing the proceedings.
