Event: SPIE's 1995 Symposium on OE/Aerospace Sensing and Dual Use Photonics, 1995, Orlando, FL, United States

Contents

vii	<i>Conference Committee</i>
ix	<i>Preface</i>

DIGITAL SIGNAL PROCESSING DEVICES AND INDUSTRIAL APPLICATIONS

3	Integration options for signal processing systems P. N. Ehlig, Texas Instruments Inc.
23	Adaptive active noise control systems: algorithms and digital signal processing (DSP) implementations S. M. Kuo, Northern Illinois Univ.
50	Monitoring the health of mechanical systems with smart materials: signal processing issues L. P. Heck, SRI International
74	Trends in spectral analysis: higher order and cyclic statistics G. B. Giannakis, Univ. of Virginia

DIGITAL SIGNAL PROCESSING APPLICATIONS TO SPEECH, AUDIO, AND IMAGE PROCESSING

101	Automated speech understanding: the next generation J. Picone, W. J. Ebel, Mississippi State Univ.; N. Deshmukh, Boston Univ.
115	Speech coding for mobile and multimedia applications A. S. Spanias, Arizona State Univ.
145	Digital audio compression algorithms and implementations J. Rowlands, Texas Instruments Inc.
170	Wavelets: a passing wave or a truly useful tool? A. H. Tewfik, Univ. of Minnesota
198	Digital restoration of images: recent advances and future trends A. K. Katsaggelos, Northwestern Univ.; M. R. Banham, Motorola

PARALLEL PROCESSING AND ADAPTIVE DIGITAL SIGNAL PROCESSING APPLICATIONS

231	Performance measurements of complex signal and image processing algorithms over multiple signal processor systems F. Miville, Rose-Hulman Inst. of Tech.

- 250 **Execution of parallel algorithms on a heterogeneous multicomputer**
B. S. Isenstein, J. Greene, Mercury Computer Systems, Inc.
- 277 **Parallel processing architectures for image processing systems**
M. D. Vahey, R. Cody, Hughes Aircraft Co.
- 291 **CORDIC-based digital signal processing (DSP) element for adaptive
signal processing**
G. D. Bolstad, K. B. Neeld, Hughes Aircraft Co.
- 314 **Digital systems for neural networks**
P. Ienne, EPFL Microcomputing Lab. (Switzerland); G. Kuhn, Siemens Corporate
Research Learning Systems

Conference Committee

Conference Chairs

Panos Papamichalis, Texas Instruments Inc.
Robert Kerwin, Hughes Aircraft Company

Session Chairs

- 1 Digital Signal Processing Devices
and Industrial Applications
Panos Papamichalis, Texas Instruments Inc.
- 2 Digital Signal Processing Applications to Speech,
Audio, and Image Processing
Joseph Picone, Mississippi State University
- 3 Parallel Processing and Adaptive Digital
Signal Processing Applications
Robert Kerwin, Hughes Aircraft Company

Preface

Digital signal processing (DSP) has made significant inroads into practically every commercial and military signal processing application. It has even started penetrating consumer applications, such as digital audio and video. The reasons are the ability to develop highly sophisticated algorithms, and the availability of fast and inexpensive devices to implement these algorithms.

This Critical Reviews volume addresses both the hardware and the algorithmic aspects of DSP. From the hardware standpoint, programmable and dedicated devices are considered, with input/output, memory, and architectural features covering several areas of applications. The main focus, though, is on algorithmic applications.

The algorithmic developments, presented in three sessions, address industrial applications, speech, audio, image processing, parallel processing, and adaptive DSP applications.

We would like to thank the authors for their excellent papers, and the SPIE staff for their assistance with the organization of this meeting and the preparation of the proceedings.

Panos Papamichalis
Robert Kerwin
