Proceedings of SPIE 0277-786X, V. 10338

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Thirteenth International Conference on Quality Control by Artificial Vision 2017, edited by Hajime Nagahara,
Kazunori Umeda, Atsushi Yamashita, Proc. of SPIE Vol. 10338, 1033801 · © 2017 SPIE
CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2277475

Proc. of SPIE Vol. 10338 1033801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

IMAGE ANALYSIS

10338 02	Robust feature estimation by non-rigid hierarchical image registration and its application in disparity measurement [10338-46]
10338 03	Detection and localization of underground networks by fusion of electromagnetic signal and GPR images [10338-48]
10338 04	3D geometrical characterization and modelling of solid oxide cells electrodes microstructure by image analysis [10338-11]
10338 05	A belief-propagation-based decoding method for two-dimensional barcodes with monochrome auxiliary lines robust against non-uniform geometric distortion [10338-29]

PLENARY TALK 1

10338 06	Towards next generation 3D cameras [10338-56]
----------	--

CAMERA AND SENSING

10338 07	Interests of refocused images calibrated in depth with a multi-view camera for control by vision [10338-10]
10338 08	Ultrasonic imaging for non-destructive evaluation of standing trees: effect of anisotropy on image reconstruction [10338-22]
10338 09	An omni-RGB+D camera rig calibration and fusion using unified camera model for 3D reconstruction [10338-47]
10338 0A	Synthesis filter bank and pupil function for perfect reconstruction of all-in-focus image from focal stack [10338-49]
10338 0B	Estimation of extrinsic parameters of multiple fish-eye cameras using calibration markers [10338-55]
10338 0C	Underwater 3D scanning using Kinect v2 time of flight camera [10338-27]

FACE AND GESTURE

- 10338 OD **A visual surveillance system for person re-identification** [10338-17]
- 10338 OE **Mixed features for face detection in thermal image** [10338-28]
- 10338 OF **Spatial and temporal segmented dense trajectories for gesture recognition** [10338-31]
- 10338 OG **Development of facial aging simulation system combined with three-dimensional shape prediction from facial photographs** [10338-37]

MACHINE LEARNING

- 10338 OH **Deep learning for evaluating difficult-to-detect incomplete repairs of high fluence laser optics at the National Ignition Facility** [10338-5]
- 10338 OI **A method based on machine learning using hand-crafted features for crack detection from asphalt pavement surface images** [10338-7]
- 10338 OJ **Training sample selection based on self-training for liver cirrhosis classification using ultrasound images** [10338-8]
- 10338 OK **Recognition and defect detection of dot-matrix text via variation-model based learning** [10338-9]
- 10338 OL **Convolution neural network for contour extraction of corneal endothelial cells** [10338-12]
- 10338 OM **Development of a classification method for a crack on a pavement surface images using machine learning** [10338-36]

PLENARY TALK 2

- 10338 ON **Machine Learning, deep learning and optimization in computer vision** [10338-57]

3D MEASUREMENT

- 10338 OO **Microgeometry capture and RGB albedo estimation by photometric stereo without demosaicing** [10338-15]
- 10338 OP **Dent detection method by high gradation photometric stereo** [10338-18]
- 10338 OQ **Use of polarimetric imaging of emissive objects** [10338-45]
- 10338 OR **Joint technique of fine object boundary recovery and foreground image deblur for video including moving objects** [10338-20]
- 10338 OS **3D shape measurement with defect detection** [10338-21]

10338 OT **Three dimensional measurement using likelihood function by multi-camera** [10338-13]

OBJECT CLASSIFICATION AND TRACKING

10338 OU **Object classification with range and reflectance data from a single laser scanner**
[10338-14]

10338 OV **Evidential multi-class classification from binary classifiers: application to waste sorting
quality control from hyperspectral data** [10338-50]

10338 OW **Affordance-based 3D feature for generic object recognition** [10338-38]

10338 OX **Visual object tracking based on disc-harmonic moments features invariants** [10338-33]

10338 OY **Tracking and removal of suspended matter from underwater video images** [10338-6]

HUMAN FACTOR

10338 OZ **Hyperspectral imaging using flickerless active LED illumination** [10338-23]

10338 IO **Method for evaluating the uniformity of projector luminance distribution** [10338-40]

10338 II **Attention retargeting in real space with projector camera system** [10338-41]

10338 IJ **Evaluating the visibility of presentation slides** [10338-42]

10338 IK **Features contributing sense of scale in photographs** [10338-2]

10338 IL **Prototype implementation of mirror with built-in display** [10338-51]

PLENARY TALK 3

10338 IS **Machine vision for various manipulation tasks** [10338-58]

AUTONOMOUS VEHICLE

10338 IT **Studying the response of drivers against different collision warning systems: a review**
[10338-19]

10338 IU **Fast and robust-vanishing point detection system using fast M-estimation method and
regional division for in-vehicle camera** [10338-30]

10338 IV **Motorcyclists safety system to avoid rear end collisions based on acoustic signatures**
[10338-32]

10338 IW **Plugin-docking system for autonomous charging using particle filter** [10338-52]

10338 1A **Real-time flight altitude estimation using phase correlation with Gram polynomial decimation** [10338-24]

INSPECTION

10338 1B **Automatic construction of image inspection algorithm by using image processing network programming** [10338-39]

10338 1C **Computer vision based nacre thickness measurement of Tahitian pearls** [10338-43]

10338 1D **A novel quantitative methodology for age evaluation of the human corneal endothelium** [10338-3]

10338 1E **Component extraction on CT volumes of assembled products using geometric template matching** [10338-16]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Local Arrangement Committee

Takashi Komuro, Saitama University (Japan)
Akira Kubota, Chuo University (Japan)
Gakuto Masuyama, Chuo University (Japan)
Akio Nakamura, Tokyo Denki University (Japan)
Mihoko Niitsuma, Chuo University (Japan)
Tsuyoshi Shimizu, Yamanashi University (Japan)
Hironori Takimoto, Okayama Prefectural University (Japan)

Introduction

We are pleased to welcome you to the Thirteenth International Conference on Quality Control by Artificial Vision (QCAV2017). As you know, QCAV started in 1993 at Le Creusot, France, and this year the thirteenth QCAV Conference is in Tokyo, Japan. This is the fourth time QCAV has been in Japan. The first was in Kagawa in 1998, then Nagoya in 2005, and later Fukuoka in 2013.

The objective of the QCAV2017 Conference remains the same as the previous ones: to provide a forum for researchers, engineers, suppliers, and users of vision systems to present and discuss the state-of-the-art developments in machine and computer vision and image processing techniques, with an emphasis on quality control.

This proceedings volume contains forty-six reviewed papers selected from fifty-two submitted papers. All presentations are oral and in a single track. We believe this makes the conference more unified and helps produce deep and intensive discussions on the presented papers.

Moreover, we are proud to have three fabulous plenary talks:

- Prof. Mohit Gupta (University of Wisconsin-Madison): *Towards Next Generation 3D Cameras.*
- Prof. Stéphane Canu (INSA de Rouen, Normandie Université): *Machine Learning, Deep Learning and Optimization in Computer Vision.*
- Dr. Yukiyasu Domae (Mitsubishi Electric Corporation): *Machine Vision for Various Manipulation Tasks.*

We really appreciate the plenary speakers for sharing their cutting-edge research and development results with us.

We would like to thank The Technical Committee on Industrial Application of Image Processing (IAIP) and The Japan Society for Precision Engineering for sponsoring QCAV2017. In addition, we also would like to thank the ten organizations that contributed to the conference as technical sponsors.

We hope all attendees enjoy not only the conference itself, but also Tokyo, one of the largest megalopolises in the world and the venue of next summer Olympic Games in 2020.

QCAV2017 Organizing Committee
