Volume 10339

Proceedings of SPIE 0277-786X, V. 10339

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Pacific Rim Laser Damage 2017: Optical Materials for High-Power Lasers, edited by Jianda Shao,
Takahisa Jitsuno, Wolfgang Rudolph, Proc. of SPIE Vol. 10339, 1033901 · © 2017
SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2292237

Proc. of SPIE Vol. 10339 1033901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a seven-digit CID article numbering system in which:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

HIGH POWER LASER DAMAGE, UV THROUGH IR I

10339 05	High peak power green light generation by frequency doubling of a superluminescent pulse amplifier system [10339-4]
----------	--

LASER ABLATION AND LASER MACHINING I

10339 06	3D laser printing by ultra-short laser pulses for micro-optical applications: towards telecom wavelengths (Invited Paper) [10339-5]
10339 09	Mathematical model for CO₂ laser high precision ablation of fused silica [10339-8]

MECHANISMS, MODELING, AND SIMULATIONS

10339 0B	Study on Brewster angle thin film polarizer using hafnia-silica mixture as high refractive index material [10339-10]
10339 0C	Simulation of the evolution of fused silica's surface defect during wet chemical etching [10339-11]
10339 0D	First-principles calculations of crystal structure, electronic structure and optical properties of RETaO₄ (RE= Y, La, Sm, Eu, Dy, Er) [10339-12]

HIGH LASER DAMAGE RESISTANT COATINGS I

10339 0F	Improving 355nm laser damage resistance for fluoride mirrors with overcoat layer [10339-14]
10339 0G	Study on high power CW laser's irradiation effect on yttria-stabilized zirconia coating [10339-15]
10339 0H	Comparison between intrinsic and contaminant-induced damages of multilayer dielectric gratings [10339-16]

HIGH POWER LASER DAMAGE, UV THROUGH IR II

- 10339 OK **Prejudgement of hot-images' damage based on gradient direction matching method in high power laser system** [10339-19]

LASER ABLATION AND LASER MACHINING II

- 10339 ON **A compact plasma pre-ionized TEA-CO₂ laser pulse clipper for material processing** [10339-22]
- 10339 OO **Towards crack-free ablation cutting of thin glass sheets with picosecond pulsed lasers** [10339-23]

NONLINEAR LASER CRYSTALS

- 10339 OV **Photoluminescence properties of KDP crystals under high power nanosecond laser irradiation** [10339-30]
- 10339 OW **DKDP crystal growth controlled by cooling rate** [10339-31]

CHARACTERIZATION TECHNIQUES AND MEASUREMENT PROTOCOLS I

- 10339 OX **Spherical aberration compensation method for long focal-length measurement based on Talbot interferometry** [10339-35]
- 10339 OY **Transient transmittance and scattering changes during nanosecond laser-induced damage in fused silica** [10339-36]

HIGH LASER DAMAGE RESISTANT COATINGS II

- 10339 11 **Design of broadband polarization-independent multilayer dielectric grating** [10339-41]

CHARACTERIZATION TECHNIQUES AND MEASUREMENT PROTOCOLS II

- 10339 16 **UV fatigue investigations with non-destructive tools in silica (Invited Paper)** [10339-42]
- 10339 18 **Influence of laser wavelengths and polarizations on absorption of KDP crystal** [10339-45]
- 10339 1A **Development of an infrared absorption measurement system for large aperture optics** [10339-47]

OPTICAL GLASSES AND FIBERS

- 10339 1C **Exploring high power, extreme wavelength operating potential of rare-earth-doped silica fiber (Invited Paper)** [10339-48]

POSTER SESSION

- 10339 1H **Measurement system for diffraction efficiency of convex gratings** [10339-52]
- 10339 1I **Highly transparent VO₂-SiO₂ films with excellent infrared characteristics by dual-target magnetron sputtering** [10339-53]
- 10339 1J **Study on imaging reconstruction based on filtered back-projection combined with a modified shift-invariant wavelet threshold method** [10339-54]
- 10339 1K **Discrimination of the glucose and the white sugar based on the pulsed laser-induced photoacoustic technique** [10339-55]
- 10339 1M **Verification technology of remote sensing camera satellite imaging simulation based on ray tracing** [10339-57]
- 10339 1N **Investigations on laser ablation mechanism of anti-reflection layers for solar cells** [10339-58]
- 10339 1S **A calibration mechanism based on worm drive for space telescope** [10339-64]
- 10339 1V **The influence of 1/ f noise on the electrical derivative initial peak of high-power semiconductor laser diodes** [10339-85]
- 10339 1W **Effects of substrate etching on laser-induced damage of 355nm space coatings** [10339-86]
- 10339 1Y **Effect of ion beam figuring on laser damage properties of KDP crystal** [10339-32]
- 10339 20 **Realization and testing of a deployable space telescope based on tape springs** [10339-68]
- 10339 22 **Range walk error correction and modeling on Pseudo-random photon counting system** [10339-70]
- 10339 23 **Investigation of the hydrogen of silica glass being laser-irradiating by ¹H MAS NMR** [10339-71]
- 10339 25 **Research on the welding process of aluminum alloy based on high power fiber laser** [10339-73]
- 10339 26 **Z-propagation Ti: Er: Tm: LiNbO₃ strip waveguide with Er³⁺/Tm³⁺ Codoped** [10339-74]
- 10339 27 **Multiple-slit diffraction of high-polarization-order cylindrical vector beams** [10339-75]
- 10339 28 **Modeling for the thermal damage process of the optical film caused by contaminants** [10339-76]

- 10339 2B **Modeling and simulation for effective removal rate of damage** [10339-79]
- 10339 2C **The adsorption behavior between particle contamination and fused silica in high-energy laser system** [10339-80]
- 10339 2D **Generation of multiple solitons in an all-fiber mode-locked Yb-doped ring laser** [10339-81]
- 10339 2E **Effect of elastic region nanoparticle SiO₂ jet polishing on the laser damage properties of fused silica** [10339-82]
- 10339 2F **Design, fabrication and performance study of rugate narrow band minus filters** [10339-83]
- 10339 2G **Analysis of hot images in final optics assembly** [10339-84]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.
