Proc. of SPIE Vol. 10342 1034201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY
SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 OPTICAL TELECOMMUNICATION TECHNOLOGIES AND SYSTEMS

10342 02	Design of graded refractive index profile for silica multimode optical fibers with improved effective modal bandwidth for short-distance laser-based multi-Gigabit data transmission over “O”-band [10342-4]
10342 03	Blocking probability in the hose-model optical VPN with different number of wavelengths [10342-5]
10342 04	Design of MDM channel precision positioning scheme at the end of a few-mode optical fiber with enlarged core diameter [10342-6]
10342 05	Influence of fiber bends on mode-dependent loss and mode coupling in mode division multiplexing systems [10342-10]
10342 06	Cognitive optical networks: architectures and techniques [10342-11]
10342 07	Design of low DMD few-mode optical fibers with extremely enlarged core diameter providing nonlinearity suppression for operating over “C”-band central region [10342-19]
10342 08	The latest achievements in the development of the concept of radio- and optical systems quasiparticle based on Feynman integrals [10342-20]
10342 09	Experimental demonstration of high-speed data transmission based on Gaussian pulses for IR-UWB radio-over-fiber systems [10342-27]
10342 0A	Experimental study of wireless part of laboratory bench, implementing IR-UWB radio-over-fiber system [10342-28]
10342 0B	Comparison of propagation of vortex and non-vortex laser beams in a random medium [10342-32]
10342 0C	Spinor-based approach on wave processes in optical fiber (Invited Paper) [10342-34]
10342 0D	Optical frequency modulated pulse power losses, caused by optical fiber material dispersion [10342-39]
10342 0E	Fiber material dispersion effect on a matched compression of an optical pulse with frequency modulation [10342-41]

- 10342 OF **Simulation and analysis of mode staff excitation during “O”-band optical signal launching to graded multimode fiber with large central defect of refractive index profile via standard singlemode fiber** [10342-43]
- 10342 OG **Redistribution of the laser beam power using diffractive optical elements** [10342-45]
- 10342 OH **Investigation of characteristics of semiconductor optical amplifiers as a multifunctional devices for systems radio over fiber** [10342-53]

SESSION 2 PASSIVE AND ACTIVE COMPONENTS OF OPTICAL TELECOMMUNICATION

- 10342 OI **Action of a generalized parabolic (aspheric) lens in different optical models** [10342-1]
- 10342 OJ **Generation and conversion of mode beams and their polarization states** [10342-12]
- 10342 OK **Investigation of the characteristics of fiber optic delay lines with different types of optical emission intensity modulation** [10342-13]
- 10342 OL **Modeling of nebula viewing broadband and narrowband filters based on TiO₂-SiO₂ multilayers** [10342-21]
- 10342 OM **Necessary conditions for a nonlinear few-mode excitation of modes in single-mode optical fiber** [10342-23]
- 10342 ON **Dispersion characteristics of step index single mode optical fiber with Kerr nonlinearity** [10342-25]
- 10342 OO **Infrared reflective coatings for building and automobile glass windows for heat protection** [10342-26]
- 10342 OP **Constructive functional principles and control objectives executed with the device for optical signal splitting and chirping** [10342-29]
- 10342 OQ **Optical signal splitting and chirping device modeling** [10342-30]
- 10342 OR **Tight focusing of laser light propagated through subwavelength micropolarizer using Fresnel zone plate** [10342-31]
- 10342 OS **Determination the allowable error to adjustment of a diffractive optical element and the accuracy demanded to set the parameters of the focused beam** [10342-35]
- 10342 OT **Simulation of temporal integration of optical signals with photonic crystal nanobeam cavities** [10342-40]
- 10342 OU **Modeling of the diffraction of the focused pulsed laser beam on a binary phase plate** [10342-42]
- 10342 OV **Morphology and optical properties of thin CdTe films** [10342-44]
- 10342 OW **Quasi-interferometric scheme improved by fiber Bragg grating written on macrostructure defect in silica multimode optical fiber operating in a few-mode regime** [10342-47]

- 10342 0X **Technique for writing of fiber Bragg gratings over or near preliminary formed macro-structure defects in silica optical fibers** [10342-48]

SESSION 3 ONE-DIMENSION AND MULTI-DIMENSION OPTICAL SIGNALS DATA PROCESSING

- 10342 0Y **Geometrical optics solutions of the inverse problem of focusing laser light into plane regions** [10342-3]
- 10342 0Z **Phase recovery algorithm in coherent homodyne optical systems** [10342-7]
- 10342 10 **Image analysis in unmanned aerial vehicle on-board system for objects detection and recognition with the help of energy characteristics based on wavelet transform** [10342-8]
- 10342 11 **The use of global image characteristics for neural network pattern recognitions** [10342-15]
- 10342 12 **Surface plasmon polaritons generated by radial polarized laser beam on silver nano-ring** [10342-17]
- 10342 13 **Processing multidimensional optical signals of video surveillance for speed measurement of extensional objects** [10342-22]
- 10342 14 **Formation of optical signals based on eigenfunctions of double finite Hankel transform of order m** [10342-24]
- 10342 15 **Software for analysis of the process of formation of the catalytic mask in the off-electrode plasma** [10342-37]

SESSION 4 FIBER OPTIC SENSORS AND SENSOR NETWORKS

- 10342 16 **Diffraction polarization illuminator for a two-axis fiber-optic angle sensor** [10342-18]
- 10342 17 **Fiber-optic Bragg sensors with special spectrum shapes for climatic test systems** [10342-38]
- 10342 18 **Methods and technique of manufacturing silica graded-index fibers with a large central defect of the refractive index profile for fiber-optic sensors based on few-mode effects** [10342-46]
- 10342 19 **A practical approach to the development of aircraft GTE's noise suppression system on the base of fiber optic sensors** [10342-49]
- 10342 1A **Microwave photonic system for instantaneous frequency measurement based on principles of "frequency-amplitude" conversion in fiber Bragg grating and additional frequency separation (Invited Paper)** [10342-54]
- 10342 1B **Photonic system for spectrum analysis of SHF-band signals based on stimulated Mandelstam-Brillouin scattering** [10342-55]

SESSION 5 OPTICAL NETWORKS MAINTENANCE, CONTROL AND RESTORATION

- 10342 1C **Dependence of the optical cable stiffness on the hydrophobic filling at low temperatures**
[10342-16]
- 10342 1D **Detection of splices of optical fibers with low loss** [10342-36]
- 10342 1E **The method for a measurement of the excess fiber length on the cable delivery length by**
using the polarization reflectometry [10342-50]
- 10342 1F **Application of remote fiber test system for distributed temperature measurement on**
overhead power lines [10342-51]
- 10342 1G **Statistical characteristics of excess fiber length in loose tubes of optical cable** [10342-56]

SESSION 6 PROBLEMS OF TRAINING ON OPTICAL TELECOMMUNICATION SCIENCE TOPICS

- 10342 1H **Interactive educational technologies as a method of communicative competency**
development of optical and fiber optic communication systems specialists [10342-9]
- 10342 1I **Advanced training of specialists in area of fiber-optic communication lines maintenance**
[10342-14]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

This volume contains a selection of reports presented at the 14th International Conference on Optical Technologies for Telecommunications. The conference was held 22–24 November 2016 at Povolzhskiy State University of Telecommunications and Informatics, Samara, Russian Federation.

The conference covered a large range of problems in optical technologies in telecommunications. We have no doubt that the proceedings from this conference will be helpful for both scientists and specialists working in the field of telecommunication technologies.
