Proceedings of SPIE 0277-786X, V. 10370

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Reliability of Photovoltaic Cells, Modules, Components, and Systems X, edited by Neelkanth G. Dhere,
Keiichiro Sakurai, Michael D. Kempe, Proc. of SPIE Vol. 10370, 1037001
© 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2295643

Proc. of SPIE Vol. 10370 1037001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

LIBRARY**

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 BACKSHEETS

10370 02	Comparison of higher irradiance and black panel temperature UV backsheet exposures to field performance (Invited Paper) [10370-1]
10370 03	Degradation analysis of field-exposed photovoltaic modules with non-fluoropolymer-based backsheets [10370-2]
10370 04	Degradation of photovoltaic backsheet materials under multi-factor accelerated UV light exposures [10370-3]
10370 05	Characterizing the weathering induced changes in optical performance and properties of poly(ethylene-terephthalate) via MaPd:RTS spectroscopy (Invited Paper) [10370-4]

SESSION 2 FIELD TO CHAMBER COMPARISON

10370 06	Comparison of modeled and experimental PV array temperature profiles for accurate interpretation of module performance and degradation [10370-5]
10370 08	Temperature coefficient of power (Pmax) of field aged PV modules: impact on performance ratio and degradation rate determinations [10370-22]

SESSION 3 THIN FILM DURABILITY

10370 09	Stability of unpackaged CIGS solar cells under illumination with damp heat, dry heat and dry cold followed by cycling (Invited Paper) [10370-7]
10370 0A	Ultrashort pulsed laser ablation for decollation of solid state lithium-ion batteries [10370-17]

SESSION 4 GENERAL PV MODULE CONSTRUCTION AND DEPLOYMENT

10370 0B	Impact of PID on industrial rooftop PV-installations [10370-9]
10370 0C	Effect of light irradiation and forward bias during PID tests of CIGS PV modules [10370-10]
10370 0D	Mitigation of PID in commercial PV modules using current interruption method [10370-21]

SESSION 5 GENERAL PV MODULE CONSTRUCTION OF FIELD ARRAYS

- 10370 0G **Data acquisition and PV module power production in upgraded TEP/AzRISE solar test yard**
[10370-13]
- 10370 0H **Analyzing the degradation of pre-damaged PV-modules (Invited Paper)** [10370-14]
- 10370 0I **Application of computational fluids dynamics in the flow on photovoltaic panels** [10370-15]
- 10370 0J **Comparison of efficiency degradation in polycrystalline-Si and CdTe thin-film PV modules
via accelerated lifecycle testing** [10370-20]

POSTER SESSION

- 10370 0K **Image analysis of PV module electroluminescence** [10370-16]
- 10370 0L **Model development of degradation of PV modules backsheet with locating place of
module** [10370-18]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

The SPIE *Reliability of Photovoltaic Cells, Modules, Components, and Systems X* Conference as part of the Optics and Photonics for Sustainable Energy symposium took place at San Diego, CA on Sunday through Monday, 6–7 August 2017.

Sunday, August 6

The afternoon Session 1 on Backsheets, was chaired by Dr. Helio Moutinho, National Renewable Energy Laboratory (NREL) and myself, Neelkanth G. Dhere. It had presentations of two invited papers entitled i) "Comparison of higher irradiance and black panel temperature UV backsheet exposure to field performance" by Felder et al and ii) "Characterizing the weather induced in the changes in the optical performance poly(ethylene-terephthalate) via MaPd:RTS spectroscopy by Gordon et al and two contributed papers.

The next two afternoon sessions, 2 and 3, on Field to Chamber Comparison and Thin Film Durability were chaired by Dr. Michael D. Kempe, National Renewable Energy Lab (NREL) had three contributed presentations including a very good paper on Artefact-free coring of solar modules by Dr. Helio Moutinho et al, National Renewable Energy Laboratory (NREL).

The last afternoon Session 3 had presentation of an invited paper entitled, "Exposure of CIGS cells to negative, zero and positive electrical biases in damp-heat illuminated environment" by Nicolas Barreau et al. There was also one contributed paper.

Monday, August 7

The morning Session 4 General PV Module Construction of PV Arrays Reliability Accelerated and Outdoor Testing I was chaired by myself. It had one invited paper entitled, "Impact of PID on industrial roof-top PV installations" by Claudia Buerhop Lutz et al and two contributed papers.

After the morning Coffee break, Session 5 on General PV Module Reliability Accelerated and Outdoor Testing II was chaired by Dr. Keiichiro Sakurai of National Institute of Advanced Industrial Science and Technology (Japan). It had two contributed papers prior to the morning coffee break and four contributed papers after.

The Posters Session took place on Monday, August 29 during 5:30 PM - 7:30 PM. It had two posters related to PV Module Reliability.

Overall the SPIE Reliability of Photovoltaic Cells, Modules, Components, and Systems X Conference has a good following and was very well-attended with participants from USA, Europe, India, Japan and Republic of Korea. It had 20 papers presented. The discussion and question-answer sessions were very lively and interesting.

Next year the Conference Chairmanship will be passed on to Dr. Michael Kempe who has kindly agreed to accept this appointment.

We would like to thank the authors and other participants for their continuing interest and valuable support. We would also like all of you to continue to provide your support to the incoming Conference Chair, Dr. Michael D. Kempe.

Neelkanth G. Dhere
Keiichiro Sakurai
Michael D. Kempe
