SPIE

Volume 10372

Proceedings of SPIE 0277-786X, V. 10372

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Material Technologies and Applications to Optics, Structures, Components, and Sub-Systems III,
edited by Matthias Krödel, Joseph L. Robichaud, Bill A. Goodman, Proc. of SPIE Vol. 10372,
1037201 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2295963

Proc. of SPIE Vol. 10372 1037201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Authors
vii	Conference Committee

SESSION 1	METALS
10372 03	Mechanically alloyed aluminum metal matrix composites [10372-2]
10372 04	Enhanced aluminum reflecting and solar-blind filter coatings for the far-ultraviolet [10372-3]
10372 05	Characterization of PDMS samples with variation of its synthesis parameters for tunable optics applications [10372-4]
10372 06	Visualization of diffusion mixing in a micro-mixer with flow paths fabricated by photolithography [10372-18]
SESSION 2	GLASS MATERIALS
10372 07	Interfacial studies of a metallurgical bond between "activated" ultrasonically applied solder and high purity fused silica [10372-6]
10372 08	Comparison of material properties between ultra low thermal expansion ceramics and conventional low thermal expansion glass [10372-7]
10372 09	Inverse problem of Bragg's scattering for measuring the spectrum surface roughness in the optical gradient waveguide [10372-8]
SESSION 3	FABRICATION PROCESSES
10372 0B	A review on the advances in 3D printing and additive manufacturing of ceramics and ceramic matrix composites for optical applications (Invited Paper) [10372-10]
10372 0D	Time scales of radiation damage decay in four optical materials [10372-12]
SESSION 4	CERAMICS AND COMPOSITES
10372 0E	A rigid and thermally stable all ceramic optical support bench assembly for the LSST Camera (Invited Paper) [10372-13]
10372 0F	Quality evaluation of spaceborne SiC mirrors: the effects on mirror accuracy by variation in the thermal expansion property of the mirror surface [10372-14]

- 10372 0G **Dimensional stability performance of a CFRP sandwich optical bench for microsatellite payload** [10372-15]
- 10372 0H **Challenges of designing and testing a highly stable sensor platform: Cesium solves MTG star sensor bracket thermoelastic requirements** [10372-16]
- 10372 0I **Trade-off studies on LifeBIRD reflectors** [10372-17]

POSTER SESSION

- 10372 0M **Polishing aspheric mirrors of zero-thermal expansion cordierite ceramics (NEXCERA) for space telescope** [10372-21]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

H. Philip Stahl, NASA Marshall Space Flight Center (United States)

Conference Chairs

Matthias Krödel, ECM GmbH (Germany)

Joseph L. Robichaud, L-3 Communications SSG (United States)

Bill A. Goodman, Goodman Technologies LLC (United States)

Conference Program Committee

A. Marcel Bluth, ATK Aerospace Structures (United States)

Nathan Carlie, SCHOTT North America, Inc. (United States)

Richard A. Haber, Rutgers, The State University of New Jersey
(United States)

Haeng Bok Lee, Agency for Defense Development
(Korea, Republic of)

Rob Michel, Materion Technical Materials (United States)

Ted Mooney, Harris Corporation (United States)

Takao Nakagawa, Japan Aerospace Exploration Agency (Japan)

Tsuyoshi Ozaki, Composites Research and Development Co., Ltd.
(Japan)

John W. Pepi, L-3 Communications SSG-Tinsley (United States)

Stefan Risse, Fraunhofer-Institut für Angewandte Optik und
Feinmechanik (Germany)

Michael N. Sweeney, General Dynamics-Global Imaging
Technologies (United States)

Session Chairs

1 Metals

Rob Michel, Materion Technical Materials (United States)

2 Glass Materials

John W. Pepi, L-3 SSG (United States)

3 Fabrication Processes

Matthias Krödel, ECM Engineered Ceramic Materials GmbH
(Germany)

4 Ceramics and Composites

Bill A. Goodman, Goodman Technologies LLC (United States)
