Proc. of SPIE Vol. 10376 1037601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1	EXOTIC AND UNCONVENTIONAL OPTICS AND SYSTEMS
------------------	---

10376 03	Curved sensors for compact high-resolution wide field designs (Invited Paper) [10376-1]
10376 05	Ideal-lens stars [10376-3]
10376 06	High-speed video analysis of ballistic trials to investigate the crack propagation in glass laminates [10376-4]
10376 07	Imaging with pairs of skew lenses [10376-5]

SESSION 2	MULTI- AND HYPERSPECTRAL APPLICATIONS
------------------	--

10376 09	Aberrations of temporally modulated optical wavefronts in dispersive optical systems (Invited Paper) [10376-8]
10376 0A	A novel surface plasmon coupled tunable wavelength filter for hyperspectral imaging [10376-10]

SESSION 3	NOVEL SYSTEMS
------------------	----------------------

10376 0B	Thermally tunable III-V photonic crystals for coherent nonlinear optical circuits [10376-11]
10376 0C	Short range, >100Kbits/s, visible light communication protocol design for high-gamma smartphones [10376-12]
10376 0D	Experimental realisability of lens cloaks [10376-13]
10376 0E	Design and implementation of a large depth-of-field and large aperture optical system [10376-14]
10376 0F	Dip-and-bake low-cost high-performance lenses for smartphone-based microscopy [10376-15]

SESSION 4	BIOMEDICAL APPLICATIONS AND HUMAN FACTORS
10376 OG	Thin head-mounted display utilizing reflective optics design [10376-35]
10376 OH	Gait motion analysis using optical and inertial sensor fusion to design human kinetic energy harvesting systems (Invited Paper) [10376-16]
10376 OI	Design, manufacture, and evaluation of prototype telescope windows for use in low-vision aids [10376-17]
10376 OK	Method for synthesis of high-accuracy dynamic non-linear control systems [10376-31]
SESSION 5	VOLUMETRIC DISPLAYS AND 3D IMAGING
10376 OL	Glasses-free 2D/3D switchable display using an integrated single light-guide plate (LGP) with a trapezoidal light-extraction (TLE) film [10376-20]
SESSION 6	METROLOGY AND INSPECTION SYSTEMS
10376 ON	Development of quadruplet-camera system for pipe thread measurement [10376-22]
10376 OO	Robust shearography system for inspection of defects in composite material using diffractive optics [10376-23]
10376 OP	540nm, pulsed laser design for particle image velocimetry applications [10376-24]
10376 OQ	A confocal microscope with programmable aperture arrays by polymer-dispersed liquid crystal [10376-25]
	POSTER SESSION
10376 OR	Imaging application based on an electrically tunable polarization-independent liquid crystal microlens array [10376-26]
10376 OU	An optical chip aggregometer based on laser transmission to detect alterations in the aggregation of glycosylated RBC [10376-29]
10376 OW	Common-path holographic objective for conventional photographic camera [10376-32]
10376 OX	Computer tool for achromatic and aplanatic cemented doublet design and analysis [10376-33]
10376 OY	CMOS image sensor for extracting depth information using offset pixel aperture technique [10376-36]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

José Sasián, College of Optical Sciences, The University of Arizona
(United States)

Conference Chairs

Arthur J. Davis, ORAFOL Americas, Inc. (United States)
Cornelius F. Hahlweg, bbw Hochschule (Germany)
Joseph R. Mulley, Melles Griot (United States)

Conference Program Committee

Francois Callewaert, Northwestern University (United States)
Joseph S. Choi, Raytheon Space and Airborne Systems
(United States)
Yi Chin Fang, National Kaohsiung First University of Science and
Technology (Taiwan)
Peter I. Goldstein, Philips Color Kinetics (United States)
G. Groot Gregory, Synopsys, Inc. (United States)
Eric Herman, The Aerospace Corporation (United States)
R. John Koshel, College of Optical Sciences, The University of Arizona
(United States)
Scott A. Lerner, Carl Zeiss AG (Germany)
Bharathwaj Appan Narasimhan, CeDInt-UPM (Spain)
Craig Olson, L-3 Communications (United States)
José Sasián, College of Optical Sciences, The University of Arizona
(United States)
Hamilton Shepard III, Waymo (United States)
Haiyin Sun, ChemImage Corporation (United States)
Udo Zölzer, Helmut-Schmidt-Universität (Germany) and Universität der
Bundeswehr München (Germany)

Session Chairs

- 1 Exotic and Unconventional Optics and Systems
G. Groot Gregory, Synopsys, Inc. (United States)
- 2 Multi- and Hyperspectral Applications
Hamilton Shepard III, Waymo (United States)

- 3 Novel Systems
Francois Callewaert, Northwestern University (United States)
- 4 Biomedical Applications and Human Factors
Peter I. Goldstein, Philips Color Kinetics (United States)
- 5 Volumetric Displays and 3D Imaging
Joseph S. Choi, Raytheon Space and Airborne Systems
(United States)
- 6 Metrology and Inspection Systems
Joseph S. Choi, Raytheon Space and Airborne Systems
(United States)

Introduction

The twentieth annual conference for Novel Optical Systems Design and Optimization was held in San Diego, California this year.

Our technical sessions included tracks on: Exotic and Unconventional Optics and Systems; Multi- and Hyperspectral Applications; Novel Systems; Biomedical Applications and Human Factors; Volumetric Displays and 3D Imaging; and Metrology and Inspection Systems.

In addition, there was a poster session, an Optical Engineering Plenary Session and Technical Group Events.

The session on Exotic and Unconventional Optics and Systems had interesting presentations on curved sensor arrays and novel optical distance measurement.

Multi- and Hyperspectral Applications included wide spectral band and wavelength tunable technologies. In Novel Systems we saw novel optical circuits, lens cloak theory and new developments in aspheric microlens manufacturing. The Biomedical Applications and Human Factors session demonstrated wearable devices including energy harvesting from walking/running. In Volumetric Displays and 3D Imaging, developments in 2D/3D displays and microscopic 3D imaging were discussed. Finally, the Metrology and Inspection Systems session presented novel vision systems and a new confocal microscope design.

Our conference had three invited papers this year.

Our thanks to Christophe Gaschet for his very well received presentation on curved sensor technology. Thanks to David Parker for his presentation on aberrations of temporally modulated optical wavefronts. Also thanks to Oliver Kröning for a summary on the progress of human kinetic energy harvesting systems.

We are very grateful to those who helped make this conference a success, especially the authors, audience, SPIE staff, and program committee, which provided excellent assistance to ensure the quality of the content while also presiding over a number of the sessions.

Our Session Chairs were Francois Callewaert, Joseph Choi, Peter Goldstein, G. Groot Gregory and R. Hamilton Shepard. Thanks to them for keeping our conference running smoothly and on time.

Also thanks to everyone else on our Program Committee for helping review the Abstracts and Paper Submissions: Yi Chin Fang, Eric Herman, John Koshel, Scott

Lerner, Bharathwaj Narasimhan, Craig Olson, José Sasián, Haiyin Sun and Udo Zölzer.

Next year we will return for our twenty-first conference. The chairs will be Arthur Davis, Cornelius Hahlweg and Joseph Mulley. We look forward to seeing you in 2018!

Arthur J. Davis
Cornelius F. Hahlweg
Joseph R. Mulley
