Volume 10395

Proceedings of SPIE 0277-786X, V. 10395

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optics and Photonics for Information Processing XI, edited by Khan M. Iftakharuddin, Abdul A. S. Awwal, Mireya García Vázquez, Andrés Márquez, Víctor Díaz-Ramírez, Proc. of SPIE Vol. 10395, 1039501 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2293186

Proc. of SPIE Vol. 10395 1039501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 OPTICAL SYSTEMS CHARACTERIZATION

10395 03	Adaptation of spatial resolution for high resolution imaging system [10395-1]
10395 04	Ronchigrams of parabolic concave mirrors by inverse ray-tracing [10395-2]
10395 05	Radiometric calibration of digital cameras using neural networks [10395-3]
10395 06	An optimized knife-edge method for on-orbit MTF estimation of optical sensors using powell parameter fitting [10395-4]

SESSION 2 SPATIAL LIGHT MODULATION AND HOLOGRAPHY

10395 08	Complex wavefront modulation and holographic display using single spatial light modulator [10395-6]
10395 09	SF-FDTD analysis of a predictive physical model for parallel aligned liquid crystal devices [10395-7]
10395 0A	Particle field diagnose using angular multiplexing volume holography [10395-8]

SESSION 3 OPTICAL APPLICATIONS IN SENSING AND COMMUNICATIONS

10395 0C	On the use of video projectors for three-dimensional scanning [10395-10]
10395 0D	Light output enhancement for a plastic scintillator using nanofibers [10395-11]

SESSION 4 IMAGE RESTORATION AND COMPUTATION

10395 0H	Restoration of degraded images using stereo vision [10395-15]
10395 0I	Modeling apparent color for visual evaluation of camouflage fabrics [10395-16]
10395 0J	Restoration of motion blurred images [10395-17]

10395 OK **Computational reduction of the image sets required in conventional phase shifting methods applied to digital photoelasticity** [10395-18]

10395 OL **Template-matched filtering for automatic object segmentation in real-life scenes** [10395-19]

SESSION 5 ALGORITHMS AND AUTOMATION

10395 OM **Unassisted reduction and segmentation of large hyperspectral image datasets** [10395-20]

10395 ON **Visual environment recognition for robot path planning using template matched filters** [10395-21]

10395 OO **Optical beam classification using deep learning: a comparison with rule- and feature-based classification** [10395-58]

10395 OQ **Road mark recognition using HOG-SVM and correlation** [10395-24]

SESSION 6 ALGORITHMS AND ENCRYPTION

10395 OR **Cognitive approaches for patterns analysis and security applications** [10395-25]

10395 OU **Performance evaluation of the multiple-image optical compression and encryption method by increasing the number of target images** [10395-28]

10395 OV **A low-light-level video recursive filtering technology based on the three-dimensional coefficients** [10395-29]

SESSION 7 ALGORITHMS AND SYSTEMS

10395 OX **Adaptive noise filtering of sinusoidal signals with unknown nonlinear phase** [10395-31]

10395 OZ **Experimental demonstration of OFDM/OQAM transmission with DFT-based channel estimation for visible laser light communications** [10395-33]

POSTER SESSION

10395 12 **An improved silhouette for human pose estimation** [10395-22]

10395 14 **Influence of analyzed signals fiber-optic transmission system on spread function of the diffraction grating spectral device** [10395-37]

10395 15 **Acousto-optic modulator as an element of signal processing systems of radio and optical range** [10395-38]

10395 16 **An edge detection method with boundary reserved based on non-subsampled contourlet transform for remote sensing imagery** [10395-39]

- 10395 1D **Diffractive lenses in biocompatible photopolymers using LCoS** [10395-47]
- 10395 1E **Laser radiation scattering by the cement in the process of setting and hardening** [10395-48]
- 10395 1H **Aerosol detection using lidar-based atmospheric profiling** [10395-52]
- 10395 1I **Phase demodulation for digital fringe projection profilometry: a review** [10395-53]
- 10395 1J **Polarimetric and diffractive evaluation of 3.74 micron pixel-size LCoS in the telecommunications C-band** [10395-54]
- 10395 1M **Classification of cognitive systems dedicated to data sharing** [10395-57]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

Khan M. Iffekharuddin, Old Dominion University (United States)

Conference Chairs

Khan M. Iffekharuddin, Old Dominion University (United States)

Abdul A. S. Awwal, Lawrence Livermore National Laboratory
(United States)

Mireya García Vázquez, Centro de Investigación y Desarrollo de
Tecnología Digital (Mexico)

Conference Co-chairs

Andrés Márquez, Universidad de Alicante (Spain)

Víctor H. Díaz-Ramírez, Centro de Investigación y Desarrollo de
Tecnología Digital (Mexico)

Conference Program Committee

George Barbastathis, Massachusetts Institute of Technology
(United States)

Juan Campos, Universidad Autònoma de Barcelona (Spain)

Liangcai Cao, Tsinghua University (China)

Xinbin Cheng, Tongji University (China)

Laurence G. Hassebrook, University of Kentucky (United States)

Kazuyoshi Itoh, Osaka University (Japan)

Rigoberto Juarez-Salazar, Centro de Investigación y Desarrollo de
Tecnología Digital (Mexico)

Mohammad Ataul Karim, University of Massachusetts Dartmouth
(United States)

Byoungcho Lee, Seoul National University (Korea, Republic of)

Abhijit Mahalanobis, Lockheed Martin Missiles and Fire Control
(United States)

Mohammad A. Matin, University of Denver (United States)

Osamu Matoba, Kobe University (Japan)

Alastair D. McAulay, Lehigh University (United States)

Nasser M. Nasrabadi, U.S. Army Research Laboratory (United States)

Mark A. Neifeld, The University of Arizona (United States)

Takanori Nomura, Wakayama University (Japan)

Marek R. Ogiela, AGH University of Science and Technology (Poland)

Ting-Chung Poon, Virginia Polytechnic Institute and State University
(United States)

Philippe Réfrégier, Institut Fresnel (France)

Joseph Rosen, Ben-Gurion University of the Negev (Israel)

John T. Sheridan, University College Dublin (Ireland)

Jun Tanida, Osaka University (Japan)

Cardinal Warde, Massachusetts Institute of Technology
(United States)

Eriko Watanabe, The University of Electro-Communications (Japan)

Toyohiko Yatagai, Utsunomiya University (Japan)

María J. Yzuel, Universidad Autònoma de Barcelona (Spain)

Session Chairs

- 1 Optical Systems Characterization
 Andrés Márquez, Universidad de Alicante (Spain)
- 2 Spatial Light Modulation and Holography
 Abdul A. S. Awwal, Lawrence Livermore National Laboratory

 Andrés Márquez, Universidad de Alicante (Spain)
- 6 Algorithms and Encryption
 Mireya Saraí García Vázquez, Centro de Investigación y Desarrollo
 de Tecnología Digital (Mexico)
- 7 Algorithms and Systems
 Víctor H. Díaz-Ramírez, Centro de Investigación y Desarrollo de
 Tecnología Digital (Mexico)

Introduction

It has been once again exciting to organize the conference of Optics and Photonics for Information Processing. In this eleventh edition for the conference we had the opportunity to meet new colleagues showcasing their latest results. It was also encouraging to find groups who have attended the conference in previous years and came back to present recent progress in their research.

About 40 oral and poster presentations are organized in multiple sessions such as Optical Systems Characterization, Spatial Light Modulation and Holography, Optical Applications in Sensing and Communications, Image Restoration and Computation, Algorithms and Automation, Algorithms and Encryption, Algorithms and Systems. During the full two days of the conference both senior researchers and graduate students from across the globe exchanged ideas creating a very lively atmosphere.

Our objective has been to bring together people from the optical information processing community covering a broad range of aspects from devices, systems and algorithms, and its application to solve novel problems that society is facing. We sincerely thank authors, the audience, and SPIE staff for making this a successful conference. Next year's twelfth edition will take place 19–23 August 2018 in San Diego. We look forward to seeing you and your latest results.
