Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Introduction

This SPIE proceedings volume summarizes research and development conducted by our community in the past year. The field of biomedical optoacoustic (photoacoustic) imaging continues to experience rapid growth, especially noticeable in the area of commercialization of clinical systems. The conference remains one of the largest at Photonics West. The quality of most presentations also remains outstanding, confirmed by the fact that many sessions had full-room audiences with standing room only for late arrivals.

The Best Paper Award for this conference was selected using a two-tiered process. In the first tier, directly after the 2017 conference, the organizing committee, composed of leading researchers from our community, selected three finalists (see Introduction to SPIE proceedings volume 10064). In the second tier, an award committee of independent experts formed by the sponsor of the award, Seno Medical Instruments, selected the best paper from the list of finalists by reviewing the corresponding SPIE proceedings. The \$3,000 cash award and certificate of accomplishment were presented at the closing ceremony on 31 January 2018. The winner of the Best Paper Award 2017 announced at the closing of our conference this year is:

Paper 10064-21: "Photoacoustic computed tomography of small-animal whole-body dynamics". Lei Li, Liren Zhu, Cheng Ma, Junjie Yao, Washington Univ. in St. Louis (United States); Jun Xia, Univ. at Buffalo (United States); Lidai Wang, City Univ. of Hong Kong (Hong Kong, China); Konstantin I. Maslov, Ruiying Zhang, Yang Li, Wanyi Chen, Junhui Shi, Lihong V. Wang, Washington Univ. in St. Louis (United States).

This year, the organizing committee nominated seven finalists for the Best Paper Award of 2018:

We would like to congratulate the Best Paper Award winner of 2017 and the finalists of 2018. We also thank all the contributors to this conference and the organizing committee for its hard work. The year of 2018 marks the 25th anniversary of pioneering papers published by SPIE in the field of Biomedical Optoacoustic Imaging. This milestone will be celebrated by a special session in the course of "Photons plus Ultrasound: Imaging and Sensing 2019."
