Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Introduction

The Emerging Liquid Crystal Technologies (ELCT) conference of Photonics West started in 2005 and evolved from the previous Liquid Crystal Materials, Devices and Applications conference of SPIE. The ELCT conference is now firmly established as the key Liquid Crystal conference focused on emerging liquid crystal materials, devices and applications.

The 2018 Emerging Liquid Crystal Technologies XIII conference provides a platform for academic and industrial scientists and engineers to present high-impact scientific and technological research and illuminating discussions on recent advances in materials, devices, and applications. The topics of ELCT-XIII include Chiral and Nanostructured Materials and their Applications; Lasers and Diffractive Optical Elements; Polymer and Liquid Crystal Composites; Photosensitive Elastomers for Soft Robotics; Spatial Light Modulators and Optical Filters; Photoresponsive, Photopatterning and Photoalignment; 3D and AR/VR Displays; and Emerging Displays and Technologies. The conference features keynote, invited, and topical oral presentations as well as many outstanding poster papers. We hope you had stimulating and enjoyable experiences at Emerging Liquid Crystal Technologies XIII of Photonics West 2018 and look forward to seeing you in San Francisco, California in 2019!
