Volume 10599

Proceedings of SPIE 0277-786X, V. 10599

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Nondestructive Characterization and Monitoring of Advanced Materials, Aerospace, Civil Infrastructure, and Transportation XII, edited by Peter J. Shull, Andrew L. Gyekenyesi, Tzu-Yang Yu, H. Felix Wu, Proc. of SPIE Vol. 10599, 1059901 · © 2018 SPIE · CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2326422

Proc. of SPIE Vol. 10599 1059901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix	<i>Authors</i>
xi	<i>Conference Committee</i>

SESSION 1	SHM/NDE OF CIVIL STRUCTURES/INFRASTRUCTURE I
10599 04	Structural health monitoring and damage evaluation for steel confined reinforced concrete column using the acoustic emission technique [10599-2]
10599 06	Detecting alkali-silica reaction in thick concrete structures using linear array ultrasound [10599-4]
SESSION 2	SHM/NDE OF CIVIL STRUCTURES/INFRASTRUCTURE II
10599 07	Neutral axis determination of full size concrete structures using coda wave measurements [10599-5]
10599 08	Medium change based image estimation from application of inverse algorithms to coda wave measurements [10599-6]
10599 0A	Structural health monitoring using magnetic shape memory alloy cables in concrete [10599-8]
SESSION 3	SHM/NDE OF CIVIL STRUCTURES/INFRASTRUCTURE III
10599 0E	Piezoelectric micromachined acoustic emission sensors for early stage damage detection in structures [10599-13]
10599 0F	A compact ball screw based electromagnetic energy harvester for railroad application [10599-14]
10599 0G	Combining the 3D model generated from point clouds and thermography to identify the defects presented on the facades of a building [10599-15]
10599 0H	An energy-harvesting power supply for underwater bridge scour monitoring sensors [10599-16]
SESSION 4	AEROSPACE AND ADVANCED MATERIALS SHM/NDE I
10599 0I	The effect of nanoparticle enhanced sizing on the structural health monitoring sensitivity and mechanical properties of carbon fiber composites [10599-17]

- 10599 OJ **Carbon nanotube-embedded advanced aerospace composites for early-stage damage sensing** [10599-18]
- 10599 OK **Damage detection in composites using nonlinear ultrasonically modulated thermography** [10599-20]
- 10599 OL **Impact damage imaging in a curved composite panel with wavenumber index via Riesz transform** [10599-21]

SESSION 5 AEROSPACE AND ADVANCED MATERIALS SHM/NDE II

- 10599 OM **Nonlinear imaging (NIM) of barely visible impact damage (BVID) in composite panels using a semi and full air-coupled linear and nonlinear ultrasound technique** [10599-22]
- 10599 ON **Experimental technologies comparison for strain measurement of a composite main landing gear bay specimen** [10599-23]
- 10599 OP **Determination of depth and size of defects in carbon-fiber-reinforced plastic with different methods of pulse thermography** [10599-25]

SESSION 6 AEROSPACE AND ADVANCED MATERIALS SHM/NDE III

- 10599 OQ **Impact detection method for aeronautical composite structures based on neural network implementation** [10599-26]
- 10599 OS **Manufacturing of artificial sub-surface cracks to investigate non-linear features of electro-mechanical impedance measurements** [10599-28]
- 10599 OU **Characterization and optimization of spiral eddy current coils for in-situ crack detection** [10599-30]

SESSION 7 VISION-BASED SHM/NDE

- 10599 OY **A novel camera localization system for extending three-dimensional digital image correlation measurement** [10599-35]
- 10599 OZ **Experimental multiphysical characterization of an SMA driven, camber morphing owl wing section** [10599-36]
- 10599 IO **Reframing measurement for structural health monitoring: a full-field strategy for structural identification** [10599-37]

SESSION 8 SHM/NDE ADDITIVE MANUFACTURING	
10599 13	Demonstration of array eddy current technology for real-time monitoring of laser powder bed fusion additive manufacturing process [10599-40]
SESSION 9 RADAR SHM/NDE	
10599 15	Characterization of steel rebar spacing using synthetic aperture radar imaging [10599-42]
10599 16	Characterization of the range effect in synthetic aperture radar images of concrete specimens for width estimation [10599-43]
10599 17	Electromagnetic characterization of white spruce at different moisture contents using synthetic aperture radar imaging [10599-44]
10599 18	An image denoising method for SAR images with low-sampling measurements [10599-45]
10599 19	Extracting and identifying concrete structural defects in GPR images [10599-46]
10599 1A	Study of GPR signal propagation and imaging of multilayer rebar mesh structure [10599-47]
10599 1B	Strain sensing rosettes using passive patch antennas [10599-68]
SESSION 10A GUIDED WAVE SHM/NDE	
10599 1C	Piezoresistive strain sensing of carbon nanotubes-based composite skin for aeronautical adaptive structures [10599-19]
10599 1E	Fatigue disbonding analysis of wide composite panels by means of Lamb waves [10599-49]
10599 1G	Standing surface acoustic wave technology applied for micro-particle concentration in oil [10599-51]
10599 1H	Numerical simulation of guided wave propagation in reinforced concrete structures with debond damage [10599-52]
SESSION 10B SHM/NDE SENSOR MODELING	
10599 1J	Durability assessment of soft elastomeric capacitor skin for SHM of wind turbine blades [10599-12]
10599 1K	Damage detection and isolation via autocorrelation: a step toward passive sensing [10599-54]
10599 1L	Assessment of dye penetrant crack detectability in external corners using similarity analysis [10599-55]

- 10599 1M **Eddy current crack detection capability assessment approach using crack specimens with differing electrical conductivity** [10599-56]
- 10599 1N **Finite element simulation of photoacoustic fiber optic sensors for surface rust detection on a steel rod** [10599-57]
- 10599 1Q **Comparison of two optimization algorithms for fuzzy finite element model updating for damage detection in a wind turbine blade** [10599-60]
- 10599 1R **International Roughness Index (IRI) measurement using Hilbert-Huang transform** [10599-61]
- 10599 1S **Tomography reconstruction methods for damage diagnosis of wood structure in construction field** [10599-62]

SESSION 11 INDUSTRIAL-PROCESS CONTROL NDE/NDT I

- 10599 1T **Monitoring and evaluation of wire mesh forming life** [10599-63]
- 10599 1U **Pulsed infrared thermography for assessment of ultrasonic welds** [10599-64]
- 10599 1V **Real-time nondestructive monitoring of the gas tungsten arc welding (GTAW) process by combined airborne acoustic emission and non-contact ultrasonics** [10599-65]

SESSION 12 INDUSTRIAL/PROCESS CONTROL NDE/NDT II

- 10599 1Y **Guided wave crack detection and size estimation in stiffened structures** [10599-91]

POSTER SESSION

- 10599 1Z **The effect of erosion on the fatigue limit of metallic materials for aerospace applications** [10599-69]
- 10599 21 **Impact of measurement uncertainty from experimental load distribution factors on bridge load rating** [10599-71]
- 10599 22 **Study of aluminum content in a welding metal by thermoelectric measurements** [10599-72]
- 10599 24 **Characterization of technical surfaces by structure function analysis** [10599-74]
- 10599 25 **Towards the miniaturization of monolithic folded pendulums: a new approach to the implementation of small and light sensors for ground, space, and marine applications** [10599-75]
- 10599 26 **Completely automated modal analysis procedure based on the combination of different operational model analysis methods** [10599-76]
- 10599 28 **Research on horizontal displacement monitoring method of deep foundation pit based on laser projecting sensing technology** [10599-78]

- 10599 29 **Audio-based bolt-loosening detection technique of bolt joint [10599-79]**
- 10599 2A **A study of using smartphone to detect and identify construction workers' near-miss falls based on ANN [10599-80]**
- 10599 2D **Methodologies for calibration testing of non-destructive monitoring techniques [10599-83]**
- 10599 2F **Piezoelectric wafer active sensors under gamma radiation exposure toward applications for structural health monitoring of nuclear dry cask storage systems [10599-85]**
- 10599 2G **Evaluation method for corrosion level of rebar in RC with electrical impedance measurement [10599-86]**
- 10599 2I **Real-time flutter boundary prediction based on time series models [10599-88]**
- 10599 2J **Real-time flutter boundary prediction using peak-hold method [10599-89]**
- 10599 2K **The effect of reinforcing bars to flaw detection in RC structure using group velocity profile generated by surface wave [10599-90]**

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.
