Proc. of SPIE Vol. 10607 1060701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xi	<i>Introduction</i>

MULTISPECTRAL IMAGE ACQUISITION

10607 02	A fast color cast detection and correction method for large-field video-image in nature scene [10607-1]
10607 03	Plasmonic near-field focusing with nanotips structure [10607-3]
10607 04	Raman spectroscopy denoising based on smoothing filter combined with EEMD algorithm [10607-5]
10607 05	Liquid-crystal microlenses with patterned ring-electrode arrays for multiple-mode two-dimensional imaging [10607-6]
10607 06	Low reflection and field localization over surface plasmon device with subwavelength patterned aluminum film [10607-7]
10607 07	Simulation of polarization-dependent film with subwavelength nano-hole array [10607-8]
10607 08	Simulating and discussion on surface plasmon typical optical properties of patterned periodic metallic nanostructures [10607-9]
10607 09	Design and fabrication of electronically controlled liquid crystal microlens arrays with non-uniform coil electrode arrays [10607-10]
10607 0A	Liquid-crystal microlens array with swing and adjusting focus and constructed by dual patterned ITO-electrodes [10607-11]
10607 0B	Nano-focusing effect simulation of metal film with subwavelength pattern structures [10607-12]
10607 0C	A high-transmission liquid-crystal Fabry-Perot infrared filter for electrically tunable spectral imaging detection [10607-13]
10607 0D	Three-dimensional imaging through turbid media based on polarization-difference liquid-crystal microlens array [10607-14]
10607 0E	Analysis of periodically patterned metallic nanostructures for infrared absorber [10607-15]
10607 0F	Flexible electronic control system based on FPGA for liquid-crystal microlens [10607-16]

10607 OG **Fisheye image rectification using spherical and digital distortion models** [10607-20]

MULTISPECTRAL IMAGE PROCESSING AND ANALYSIS

- 10607 OH **A blind deconvolution method based on L1/L2 regularization prior in the gradient space** [10607-101]
- 10607 OI **Subsidence monitoring and prediction of high-speed railway in Beijing with multitemporal TerraSAR-X data** [10607-102]
- 10607 OJ **Mapping soil total nitrogen of cultivated land at county scale by using hyperspectral image** [10607-104]
- 10607 OK **Infrared and visible images fusion based on visual saliency map and NSCT** [10607-105]
- 10607 OL **A PROSAIL-based spectral unmixing algorithm for solving vegetation spectral variability problem** [10607-106]
- 10607 OM **Panchromatic cooperative hyperspectral adaptive wide band deletion repair method** [10607-107]
- 10607 ON **Water vapor retrieval from near-IR measurements of polarized scanning atmospheric corrector** [10607-108]
- 10607 OO **Fusion of shallow and deep features for classification of high-resolution remote sensing images** [10607-111]
- 10607 OP **Exact extraction method for road rutting laser lines** [10607-113]
- 10607 OQ **Fast rail corrugation detection based on texture filtering** [10607-115]
- 10607 OR **The research on the temperature measurement technology of aluminum atomic emission spectroscopy** [10607-116]
- 10607 OS **A method of extracting impervious surface based on rule algorithm** [10607-117]
- 10607 OT **An enhanced narrow-band imaging method for the microvessel detection** [10607-118]
- 10607 OU **Remote sensing reflectance simulation of coastal optical complex water in the East China Sea** [10607-119]
- 10607 OV **Lossless compression of large aperture static imaging spectrometer based on CCSDS-123** [10607-125]
- 10607 OW **Feature extraction based on extended multi-attribute profiles and sparse autoencoder for remote sensing image classification** [10607-126]
- 10607 OX **Nighttime images fusion based on Laplacian pyramid** [10607-129]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

Welcome to the proceedings from the 10th International Symposium on Multispectral Image Processing and Pattern Recognition (MIPPR 2017), held 28-29 October 2017 in Xiangyang, China.

MIPPR focuses mainly on latest research in multispectral image processing and pattern recognition. The symposium has a broad charter. Multispectral is interpreted not just multiple-wavelength in a narrow sense but also multi-sensor, multi-modal, and multimedia. It covers many disciplines such as sensing, image processing, computer vision, pattern recognition and involves the development of efficient processing algorithms and their optimization and implementation. The wide range of applications considered in this symposium include automatic target recognition, autonomous navigation, medical image processing, remote sensing, geographic information systems and many others.

The symposium provides a forum for scientists, professors, engineers and graduate students from universities, industries and government laboratories to meet and exchange ideas and discuss theories, techniques, algorithms and applications in multispectral image processing and pattern recognition. As expected, there were ample discussions both inside and outside the lecture halls helping to make MIPPR 2017 an exciting meeting.

In response to the call for papers, we received 231 submissions. Based on the reviews provided by an excellent program committee we accepted 193 papers covering many aspects of multispectral image processing and pattern recognition. To ensure a high-quality conference, all abstracts and proceedings of SPIE papers are reviewed by peers for technical merit and English expression. The conference proceedings from MIPPR 2017 consist of five volumes which will be included on the SPIE Digital Library:

- *MIPPR 2017: Multispectral Image Acquisition, Processing, and Analysis* (SPIE Volume 10607)
- *MIPPR 2017: Automatic Target Recognition and Navigation* (SPIE Volume 10608)
- *MIPPR 2017: Pattern Recognition and Computer Vision* (SPIE Volume 10609)
- *MIPPR 2017: Parallel Processing of Images and Optimization Techniques; and Medical Imaging* (SPIE Volume 10610)
- *MIPPR 2017: Remote Sensing Image Processing, Geographic Information Systems, and Other Applications* (SPIE Volume 10611).

The realization of a conference depends upon the hard work of many dedicated people. We would like to thank all the members of the organizing committee who

put together this symposium for the benefit of all the researchers. They are responsible for making this conference a success. We hope the papers and the research results presented at this conference will inspire new research in all the areas related to multispectral image processing and pattern recognition.

Bir Bhanu
