Proc. of SPIE Vol. 10608 1060801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

AUTOMATIC TARGET RECOGNITION AND NAVIGATION

10608 02	The improvement of VIBE foreground detection algorithm [10608-2]
10608 03	An improved KCF tracking algorithm based on multi-feature and multi-scale [10608-3]
10608 04	Infrared maritime target detection using a probabilistic single Gaussian model of sea clutter in Fourier domain [10608-5]
10608 05	Low-resolution ship detection from high-altitude aerial images [10608-6]
10608 06	High-precision relative position and attitude measurement for on-orbit maintenance of spacecraft [10608-9]
10608 07	An advanced analysis method of initial orbit determination with too short arc data [10608-10]
10608 08	Gaussian mixture models-based ship target recognition algorithm in remote sensing infrared images [10608-11]
10608 09	Dim target detection method based on salient graph fusion [10608-15]
10608 0A	Joint image restoration and location in visual navigation system [10608-18]
10608 0B	Target tracking system based on preliminary and precise two-stage compound cameras [10608-20]
10608 0C	Robust object tacking based on self-adaptive search area [10608-21]
10608 0D	Saliency detection algorithm based on LSC-RC [10608-22]
10608 0E	Discussion among different methods of updating model filter in object tracking [10608-23]
10608 0F	A street rubbish detection algorithm based on Sift and RCNN [10608-24]
10608 0G	Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]
10608 0H	A new method of small target detection based on neural network [10608-28]

10608 0I	A novel line segment detection algorithm based on graph search [10608-30]
10608 0J	Infrared images target detection based on background modeling in the discrete cosine domain [10608-33]
10608 0K	Monocular visual odometry-based 3D-2D motion estimation [10608-36]
10608 0L	Segmentation of oil spills in SAR images by using discriminant cuts [10608-39]
10608 0M	A novel visual-inertial monocular SLAM [10608-41]
10608 0N	Infrared vehicle recognition using unsupervised feature learning based on K-feature [10608-42]
10608 0O	A threshold auto-adjustment algorithm of feature points extraction based on grid [10608-43]
10608 0P	Real-time object detection and semantic segmentation for autonomous driving [10608-44]
10608 0Q	An improved feature extraction algorithm based on KAZE for multi-spectral image [10608-46]
10608 0R	Improved CORF model of simple cell combined with non-classical receptive field and its application on edge detection [10608-47]
10608 0S	Parallax adjustment algorithm based on Susan-Zernike moments [10608-48]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

Welcome to the proceedings from the 10th International Symposium on Multispectral Image Processing and Pattern Recognition (MIPPR 2017), held 28-29 October 2017 in Xiangyang, China.

MIPPR focuses mainly on latest research in multispectral image processing and pattern recognition. The symposium has a broad charter. Multispectral is interpreted not just multiple-wavelength in a narrow sense but also multi-sensor, multi-modal, and multimedia. It covers many disciplines such as sensing, image processing, computer vision, pattern recognition and involves the development of efficient processing algorithms and their optimization and implementation. The wide range of applications considered in this symposium include automatic target recognition, autonomous navigation, medical image processing, remote sensing, geographic information systems and many others.

The symposium provides a forum for scientists, professors, engineers and graduate students from universities, industries and government laboratories to meet and exchange ideas and discuss theories, techniques, algorithms and applications in multispectral image processing and pattern recognition. As expected, there were ample discussions both inside and outside the lecture halls helping to make MIPPR 2017 an exciting meeting.

In response to the call for papers, we received 231 submissions. Based on the reviews provided by an excellent program committee we accepted 193 papers covering many aspects of multispectral image processing and pattern recognition. To ensure a high-quality conference, all abstracts and proceedings of SPIE papers are reviewed by peers for technical merit and English expression. The conference proceedings from MIPPR 2017 consist of five volumes which will be included on the SPIE Digital Library:

- *MIPPR 2017: Multispectral Image Acquisition, Processing, and Analysis* (SPIE Volume 10607)
- *MIPPR 2017: Automatic Target Recognition and Navigation* (SPIE Volume 10608)
- *MIPPR 2017: Pattern Recognition and Computer Vision* (SPIE Volume 10609)
- *MIPPR 2017: Parallel Processing of Images and Optimization Techniques; and Medical Imaging* (SPIE Volume 10610)
- *MIPPR 2017: Remote Sensing Image Processing, Geographic Information Systems, and Other Applications* (SPIE Volume 10611).

The realization of a conference depends upon the hard work of many dedicated people. We would like to thank all the members of the organizing committee who

put together this symposium for the benefit of all the researchers. They are responsible for making this conference a success. We hope the papers and the research results presented at this conference will inspire new research in all the areas related to multispectral image processing and pattern recognition.

Bir Bhanu
