, "Front Matter: Volume 10612," Proc. SPIE 10612, Thirteenth International Conference on Correlation Optics, 1061201 (18 January 2018); doi: 10.1117/12.2315805

Event: Thirteenth International Conference on Correlation Optics, 2017, Chernivtsi, Ukraine

PROCEEDINGS OF SPIE

Thirteenth International Conference on Correlation Optics

Oleg V. Angelsky
Editor

11–15 September 2017
Chernivtsi, Ukraine

Organized by

SPIE • OSA—The Optical Society • International Commission for Optics • EOS—European Optical Society • EPS—European Physical Society • The Ministry of Education and Science of Ukraine • Yuriy Fedkovych Chernivtsi National University (Ukraine) • Chernivtsi Regional State Administration, Institute of Postdiploma Pedagogical Education (Ukraine) • Rhythm Optoelectronics, Inc. (Ukraine)

Sponsored by

SPIE • OSA—The Optical Society • International Commission for Optics • EOS—European Optical Society • The Ministry of Education and Science of Ukraine • Chernivtsi Regional State Administration, Institute of Postdiploma Pedagogical Education (Ukraine) • Distribution Company "Roma" (Ukraine) • Private Clinic of Eye Microsurgery "Your Vision" (Ukraine) • Sumitomo Electric Bordnetze (Ukraine) • Rhythm Optoelectronics, Inc. (Ukraine) • Arton Company (Ukraine) • Demianovsky Trading Systems Assets' Management (Ukraine)

Volume 10612

Proceedings of SPIE 0277-786X, V. 10612

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Thirteenth International Conference on Correlation Optics, edited by
Oleg V. Angelsky, Proc. of SPIE Vol. 10612, 1061201 · © 2018 SPIE
CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2315805

Proc. of SPIE Vol. 10612 1061201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Thirteenth International Conference on Correlation Optics*, edited by Oleg V. Angelsky, Proceedings of SPIE Vol. 10612 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xiii	<i>Introduction</i>

INFORMATIVE CONTENT OF STATISTICAL OPTICAL FIELDS, INCLUDING SINGULAR OPTICS, PARTIAL COHERENCE AND POLARIZATION

10612 02	Recent progress on the unified theory of polarization and coherence for stochastic electromagnetic fields (Invited Paper) [10612-90]
10612 03	Laguerre-Gaussian beam transformations by the double-phase-ramp converter: singular skeleton formation and its sensitivity to small misalignments [10612-18]
10612 04	Optical vortex microscope with the simple phase object [10612-9]
10612 05	Experimental demonstration of the vertical spin existence in evanescent waves [10612-10]
10612 06	Interaction of waves under diffraction on coupling of two Bragg grating with close characteristics [10612-29]
10612 07	Non-trivial structure of optical momentum and optical forces inherent in evanescent waves [10612-12]
10612 08	Characteristics of a field formed by superposition of two plane waves with different frequencies and different polarization [10612-44]
10612 09	On important precursor of singular optics (tutorial) [10612-33]
10612 0A	Reconstruction accuracy of phase map optical field using different methods of singular optics [10612-80]
10612 0B	Optimal spiral phase modulation in Gerchberg-Saxton algorithm for wavefront reconstruction and correction [10612-71]
10612 0C	Phase problem in optics: new approaches and solutions [10612-81]
10612 0D	Features of the photometry of the superposition of coherent vector electromagnetic waves [10612-65]
10612 0E	Representation of solution for fully nonlocal diffusion equations with deviation time variable [10612-25]

10612 OF **Huygens-Fresnel principle and the spatial bandwidth of an optical system** [10612-54]

10612 OG **Functional structure of devices and apparatus** [10612-77]

OPTICAL CORRELATION DEVICES BASED ON DIFFRACTION OPTICAL ELEMENTS, OPTICAL SENSORS

10612 OH **Holographic interferometry imaging monitoring of photodynamic (PDT) reactions in gelatin biophantom** [10612-88]

10612 OI **A direct-view customer-oriented digital holographic camera** [10612-57]

10612 OJ **Features of Talbot effect on phase diffraction grating** [10612-52]

10612 OK **Heterojunction photodiode on cleaved SiC** [10612-48]

10612 OL **Limit characteristics of digital optoelectronic processor** [10612-1]

10612 OM **Review of digital holography reconstruction methods** [10612-5]

10612 ON **Internal optical bistability of quasi-two-dimensional semiconductor nanoheterostructures** [10612-87]

OPTICAL CORRELATION DIAGNOSTICS, INTERFEROMETRY AND MICROSCOPY OF ROUGH SURFACES AD RANDOM MEDIA

10612 OO **Correlation methods in optical metrology with state-of-the-art x-ray mirrors (Invited Paper)** [10612-86]

10612 OP **Optical properties of spin-coated SnS₂ thin films** [10612-17]

10612 OQ **Physical properties of the heterojunction MoO_x/n-CdTe as a function of the parameters of CdTe crystals** [10612-55]

10612 OR **Properties of the phonon spectra in the anisotropic wurtzite nanostructures** [10612-6]

10612 OS **Energy spectrum of electron-phonon complex states in three-level system of localized quasi-particles at low temperatures** [10612-8]

10612 OT **Laser controllable generation and manipulation of micro-bubbles in water** [10612-31]

10612 OU **Application of dynamic light scattering for studying the evolution of micro- and nano-droplets** [10612-84]

10612 OV **Prospects of In/CdTe X- and γ-ray detectors with MoO Ohmic contacts** [10612-60]

10612 OW **Temperature dependence of parameters of the ¹¹⁵In NQR spectrum in InSe crystal compound** [10612-2]

- 10612 0X **About the feasibilities of controlling the properties of thermoelectric energy converters using optical radiation** [10612-13]
- 10612 0Y **The research of some polygraphic paper samples's polarization characteristics** [10612-37]
- 10612 0Z **Coherent light absorbing by concrete during its hardening** [10612-14]
- 10612 10 **Influence of technological conditions on optical and structural properties of molybdenum oxide thin films** [10612-40]
- 10612 11 **Analytical modeling of polarization transformation of laser radiation of various spectral ranges by birefringent structures** [10612-63]
- 10612 12 **Optical properties of thin films cadmium chalcogenide obtained by the RF magnetron sputtering** [10612-27]
- 10612 13 **To the size distribution of the CdSe quantum dots** [10612-28]
- 10612 14 **Investigation of the transmission matrix of an isotropic scattering medium outside the zone of the probing light beam** [10612-75]
- 10612 15 **Structure and optical properties of thin films CZTS obtained by the RF magnetron sputtering** [10612-45]
- 10612 16 **Light focusing through a multiple scattering medium: ab initio computer simulation** [10612-50]
- 10612 17 **Cement hardening investigation by method of piezoelectric photoacoustics** [10612-56]
- 10612 18 **The influence of selenium on the optical properties of thin films KZTS** [10612-51]
- 10612 19 **Dependence of optical absorption spectra of the flat double nanoheterostructures $\text{Al}_x\text{Ga}_{1-x}\text{N}/\text{GaN}/\text{Al}_x\text{Ga}_{1-x}\text{N}$ from their thickness and concentration** [10612-85]
- 10612 1A **Optical constants and polarimetric properties of AlN thin films** [10612-79]

NEW APPLICATIONS OF CORRELATION OPTICS IN BIOLOGY AND MEDICINE

- 10612 1B **Applications of polarization speckle in skin cancer detection and monitoring (Invited Paper)** [10612-82]
- 10612 1C **Light scattering method to measure red blood cell aggregation during incubation (Invited Paper)** [10612-83]
- 10612 1D **New possibilities of complex "Thermodyn" application for contactless remote diagnostics in medical practice** [10612-30]
- 10612 1E **Spectropolarimetry in the differential diagnosis of benign and malignant ovarian tumors** [10612-19]

10612 1F	Jones-matrix tomography of biological tissues phase anisotropy in the diagnosis of uterus wall prolapse [10612-72]
10612 1G	Polarization-interference Jones-matrix mapping of biological crystal networks [10612-74]
10612 1H	Stokes-correlometry of polarization-inhomogeneous objects [10612-76]
10612 1I	Differential 3D Mueller-matrix mapping of optically anisotropic depolarizing biological layers [10612-66]
10612 1J	Wavelet analysis of birefringence images of myocardium tissue [10612-67]
10612 1K	Multiscale polarization diagnostics of birefringent networks in problems of necrotic changes diagnostics [10612-68]
10612 1L	Complex polarimetric and spectral techniques in diagnostics of blood plasma of patients with ovarian cancer as a preliminary stage molecular genetic screening [10612-20]
10612 1M	Polarization spectrometry diagnostic of cervical pathological states of endometriosis [10612-21]
10612 1N	Mueller matrix mapping of biological polycrystalline layers using reference wave [10612-35]
10612 1O	3D Mueller-matrix mapping of biological optically anisotropic networks [10612-36]
10612 1P	Method and system of Jones-matrix mapping of blood plasma films with “fuzzy” analysis in differentiation of breast pathology changes [10612-38]
10612 1Q	Statistical analysis of polarization interference images of biological fluids polycrystalline films in the tasks of optical anisotropy weak changes differentiation [10612-78]
10612 1R	Anizotropy characteristics of the left ventricle false chordae tendineae as one of varieties of myoendocardial formations of the human heart [10612-22]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Session Chairs

Plenary Session 1

Oleg V. Angelsky, Yuriy Fedkovych Chernivtsi National University (Ukraine)
Tomasz Szoplik, University of Warsaw (Poland)

Plenary Session 2

Yeshaiahu Fainman, University of California (United States)
Konstantin Bliokh, Center for Emergent Matter Science, RIKEN (Japan)

- 1 Informative content of statistical optical fields, including singular optics, partial coherence and polarization
David Sampson, University of Western Australia (Australia)
Alexander Bekshaev, Odessa I.I. Mechnikov National University (Ukraine)
- 2 Optical correlation devices based on diffraction optical elements, optical sensors
Albert Ferrando, Universitat de València (Spain)
Radu Malureanu, Danmarks Tekniske Universitet (Denmark)
- 3 Optical correlation diagnostics, interferometry and microscopy of rough surfaces and random media
Miguel A. Alonso, The Institute of Optics, University of Rochester (United States)
Valeriy Yashchuk, Lawrence Berkeley National Laboratory (United States)
- 4 New applications of correlation optics in biology and medicine
Olexander Ushenko, Yuriy Fedkovych Chernivtsi National University (Ukraine)
Igor Meglinski, University of Oulu (Finland)

Introduction

The Thirteenth International Conference on Correlation Optics continues the series of conferences with the same title held biannually at Chernivtsi National University (Ukraine) since 1993. More than 120 participants from 21 countries attended the conference, and more than 140 talks were presented. This volume includes oral and poster contributions on the following topics:

- Informative content of statistical optical fields, including singular optics, partial coherence and polarization
- Optical correlation devices based on diffraction optical elements, optical sensors
- Optical correlation diagnostics, interferometry and microscopy of rough surfaces and random media; Advanced materials, nanomaterials and devices for optics and optoelectronics
- New applications of correlation optics in biology and medicine

I am grateful to all participants of the conference, as well as to the members of the International Program Committee whose work provided high scientific value and organization of the conference.

Oleg V. Angelsky
