Proceedings of SPIE 0277-786X, V. 10618

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

2017 International Conference on Optical Instruments and Technology: Advanced Optical Sensors and Applications,
edited by Xuping Zhang, Hai Xiao, Francisco Javier Arregui, Proc. of SPIE Vol. 10618,
1061801 · © 2018 SPIE · CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2316723

Proc. of SPIE Vol. 10618 1061801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xv	<i>Conference Organizers</i>

SESSION 1

10618 02	Distributed dynamic stress sensor based on white light interferometer (Invited Paper) [10618-66]
10618 03	Measurement of multiple vibration points by using POTDR [10618-16]
10618 04	An event recognition method for fiber distributed acoustic sensing systems based on the combination of MFCC and CNN [10618-6]
10618 05	Application of the probe pulse with ergodic SOPs in detecting multi-vibrations using POTDR [10618-87]
10618 06	Characterization of dynamic strain induced by drilling carbon fiber reinforced polymers using optical frequency-domain reflectometry [10618-59]
10618 07	Double-sideband heterogeneous pulse modulation method for distributed acoustic sensing [10618-117]

SESSION 2

10618 08	Dynamic population gratings in Er-doped optical fiber for mechanical vibrations detection [10618-81]
10618 09	A high sensitivity fiber Bragg grating seismic system and oil exploration test [10618-91]
10618 0A	Research on fiber optic impact load localization based on honeycomb layout and fractal filtering principle [10618-80]
10618 0B	Research on fiber optic magnetic field sensor based on LPG and FBG composite structure [10618-86]

SESSION 3

- 10618 0C **Radiation resilient fiber Bragg grating sensors for sensing applications in nuclear reactor cores (Invited Paper)** [10618-132]
- 10618 0D **Environmental parameters monitoring using a single mode-bare core multimode-single mode optical fiber sensor** [10618-32]
- 10618 0E **System design and verification of high-speed camera system under extreme cryogenic and vacuum environment** [10618-12]
- 10618 0F **Precise sample preconcentration based on plasmon-assisted optical manipulation for a bead-based Raman biosensor** [10618-118]
- 10618 0G **CO detection method by liquid filmed hollow core fiber sensor** [10618-109]
- 10618 0H **Quantum cascade laser spectroscopic sensor for breath gas analysis** [10618-27]

SESSION 4

- 10618 0I **Study on the characteristics of microfluidic oscillator based on a new type of normally closed valve structure** [10618-70]
- 10618 0J **An MEMS optical fiber pressure sensor fabricated by Au-Au thermal-compression bonding** [10618-28]
- 10618 0K **Color filter designing for the detector of the space optical-remote-sensing camera** [10618-88]
- 10618 0L **High sensitivity strain sensor based on cascaded cladding mode resonant double-clad fiber and simple mode fiber** [10618-89]
- 10618 0M **Real-time vibration monitoring system of thin-walled structures' health status based on the self-mixing effect** [10618-74]

POSTER SESSION

- 10618 0N **A simple demodulation algorithm for optical SPR sensor based on all-phase low-pass filters** [10618-1]
- 10618 0O **Parylene-C diaphragm-based fiber-optic Fabry-Perot acoustic sensor for trace gas detection** [10618-5]
- 10618 0P **A method for improving the measurement accuracy of lateral shearing interferometry** [10618-9]
- 10618 0Q **Features research for pipeline leakage based on p-OTDR sensing system** [10618-14]

- 10618 OR **Research on fiber laser sensor based on multimode interference effect with no-core fiber**
[10618-17]
- 10618 OS **Monitoring and warning system of slope based on distributed fiber optic sensor technology**
[10618-20]
- 10618 OT **A 16-channel multi-longitudinal mode fiber laser sensor array system based on**
wavelength/frequency division multiplexing [10618-79]
- 10618 OU **Impact and vibration monitoring method of composite flexible structures based on FBG**
sensor network [10618-84]
- 10618 OV **Study on vibration performance and damaging detection of composite materials based on**
FBG [10618-119]
- 10618 OW **An intelligent system for simultaneous measurement of oil temperature and level in**
transformer conservator using fiber grating sensor [10618-131]
- 10618 OX **Tunable Fano resonance and its application in refractive index sensor** [10618-133]
- 10618 OY **A novel and miniaturized FPI accelerometer based on a spherical air cavity at fiber end**
[10618-135]
- 10618 OZ **Sensing with slow light in an active fiber Bragg grating** [10618-142]
- 10618 IO **Simultaneous strain and cryogenic temperature measurement by using an improved**
EFPI/FBG fiber sensor [10618-143]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Symposium Committee

General Chairs

Tianchu Li, National Institute of Metrology (China)
H. Phillip Stahl, NASA Marshall Space Flight Center (United States)

Conference Co-Chairs

Songlin Zhuang, Shanghai University of Science and Technology (China)
Liwei Zhou, Beijing Institute of Technology (China)
Shenghua Ye, Tianjin University (China)
Yimo Zhang, Tianjin University (China)
Zheng You, Tsinghua University (China)
Guangjun Zhang, Southeast University (China)

Technical Program Chair

Guofan Jin, Tsinghua University (China)

Technical Program Co-Chairs

Jinxue Wang, SPIE
Tiegen Liu, Tianjin University (China)

Local Organizing Committee Chair

Youhua Wu, China Instrument and Control Society (China)

Local Organizing Committee Co-Chairs

Guoqiang Ni, Beijing Institute of Technology (China)
Daoyin Yu, Tianjin University (China)

General Secretary

Tong Zhang, China Instrument and Control Society (China)

Administrative Vice General Secretary

Yu-nan Sun, Beijing Institute of Technology (China)

Vice General Secretaries

Qun Hao, Beijing Institute of Technology (China)
Yuejin Zhao, Beijing Institute of Technology (China)
Cunlin Zhang, Capital Normal University (China)
Liquan Dong, Beijing Institute of Technology (China)

Local Organizing Committee

Hongda Chen, Institute of Semiconductors, Chinese Academy of Sciences (China)

Xuping Zhang, Nanjing University (China)

Shangzhong Jin, China Jiliang University (China)

Libo Yuan, Harbin Engineering University (China)

Yumei Wen, Chongqing University (China)

Tian Lan, Beijing Institute of Technology (China)

Cuiling Li, Beijing Institute of Technology (China)

Conference Committee

Conference Chairs

Xuping Zhang, Nanjing University (China)
Hai Xiao, Clemson University (United States)
Francisco Javier Arregui, Universidad Pública de Navarra (Spain)

Program Committee

Xiaoyi Bao, University of Ottawa (Canada)
Luc Thévenaz, École Polytechnique Fédérale de Lausanne (Switzerland)
Anbo Wang, Virginia Polytechnic Institute and State University (United States)
Xudong Fan, University of Missouri (United States)
Ming Han, University of Nebraska-Lincoln (United States)
Yunjiang Rao, University of Electronic Science and Technology of China (China)
Weimin Chen, Chongqing University (China)
Jie Huang, Missouri University of Science and Technology (United States)
Kin Seng Chiang, City University of Hong Kong (Hong Kong, China)
Ying Huang, North Dakota State University (United States)
Wei Jin, Hong Kong Polytechnic University (Hong Kong, China)
Libo Yuan, Harbin Engineering University (China)
Zhe Chen, Jinan University (China)
Gang-Ding Peng, University of New South Wales (Australia)
Claire Gu, University of California, Santa Cruz (United States)
Lin Zhang, Aston University (United Kingdom)
Rongsheng Chen, University of Birmingham (United Kingdom)
Shibin Jiang, NP Photonics, Inc. (United States)
Tao Wei, University of Rhode Island (United States)
Weihong Bi, Yanshan University (China)
Tingyun Wang, Shanghai University (China)
Tiegen Liu, Tianjin University (China)
Fajie Duan, Tianjin University (China)
Xinyong Dong, China Jiliang University (China)
Ningmu Zou, Cornell University (United States)

Session Chairs

- 1 Distributed Optical Sensors
Xuping Zhang, Nanjing University (China)
Chao Wang, University of Kent (United Kingdom)
- 2 Grating-based Optical Sensor
Chao Wang, University of Kent (United Kingdom)
Fufei Pang, Shanghai University (China)
- 3 Chemical, Environmental and Biomedical Optical Fiber
Ningmu Zou, Cornell University (United States)
Hongxia Zhang, Tianjin University (China)
- 4 Passive and Active Components for Optical Sensors
Kevin Chen, University of Pittsburgh (United States)
Yi Zou, Shanghai Technology University (China)

Introduction

With distinct advantages such as high precision, fast response, immunity to electromagnetic interference and remote operation capability, optical sensors have traditionally been viewed as a high-end solution to many scientific and engineering problems that demand great performance. Fortunately, over the past decades, the rapid advancements in optical communications have brought to the market low cost semiconductor lasers, photo detectors, optical fibers, and integrated optical components, which pave the way for optical sensors to enter our daily lives and land on factory floors. Optical sensors are now being used for measurement of various physical, chemical and biological parameters, providing great solutions for a wide variety of sensing needs that are difficult to handle by other types of sensors. As new optical sensing devices, configurations and systems are being proposed, developed, tested and deployed at an unprecedented pace, scientists, researchers and engineers around the world gathered in Beijing, China to present their latest research work in the Advanced Optical Sensors and Applications Conference, as a part of the OIT 2017 Symposium. The 41 papers accepted and presented (oral and poster) at the conference covered many research fields including micro-structured fiber sensors, physical and mechanical sensors, interferometric and polarimetric sensors, distributed and quasi-distributed optical sensors, and other optical sensors. During the conference, we shared the latest accomplishments, sparked ideas, envisioned next-generation technologies, challenged ourselves, and cherished friendships. The chairs of the OIT 2017 Advanced Optical Sensors and Applications Conference would like to thank our committee members, reviewers, authors and participants for their contributions and support that made the conference a great success. We are also grateful to the staff of SPIE for their support in publishing the volume in the Proceedings of SPIE.
