Proc. of SPIE Vol. 10655 1065501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY
SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 MEASUREMENTS AND APPLICATIONS

10655 02	Overview of polarimetric thermal imaging for biometrics (Invited Paper, Rising Researcher Paper) [10655-1]
10655 03	Short-wave infrared Mueller matrices and polarization parameters for in vivo skin surface reflectance [10655-2]
10655 04	Polarized single-scattering phase function determined for a common reflectance standard from bidirectional reflectance measurements [10655-3]
10655 05	Extinction ratio measurements on high purity linear polarizers [10655-4]
10655 06	Achromatic ferroelectric liquid crystal polarization rotator [10655-5]

SESSION 2 POLARIZATION SYSTEM DESIGN AND INSTRUMENTS I

10655 07	Polarization considerations in the multi-angle imager for aerosols (MAIA) [10655-7]
10655 08	Channeled polarimetry using spectrally resolved longitudinal spatial coherence interferometry [10655-8]
10655 0A	Acousto-optic tunable filter based spectropolarimeter for extraction of Stokes and Mueller matrices [10655-10]

SESSION 3 POLARIZATION SYSTEM DESIGN AND INSTRUMENTS II

10655 0C	Biologically inspired imaging sensors for multi-spectral and polarization imagery [10655-11]
10655 0D	Performance of a microgrid polarizer array employing a micro-optic registration element [10655-12]

10655 OE **Residual interpolation for 3-micropolarizer design of division of focal plane polarization image sensors** [10655-13]

SESSION 4 ACTIVE SENSING

10655 OG **Single-pulse Mueller matrix polarimeter for rapid scene characterization LADAR** [10655-15]

SESSION 5 ANALYSIS AND SIMULATION I

10655 OI **Channel-first design of modulated polarimeters** [10655-17]

10655 OJ **What are the fundamental limits of passive polarization imaging?** [10655-18]

SESSION 6 ATMOSPHERIC EFFECTS

10655 OL **All-sky polarization measurements of the total solar eclipse on 21 August 2017 (Invited Paper)**
[10655-21]

10655 OM **Study of natural down-welling sky light with imaging spectro-polarimeter** [10655-22]

10655 ON **Imaging through haze using multispectral polarization imaging method** [10655-23]

10655 OO **Cloud thermodynamic phase detection with a 3-channel shortwave infrared polarimeter**
[10655-24]

10655 OP **Acquisition sensor technologies for improved performance in adverse weather conditions**
[10655-25]

SESSION 7 ANALYSIS AND SIMULATION II

10655 OS **Overview of visualization strategies for polarimetric imaging data** [10655-29]

10655 OT **Monolithic intrinsic coincident polarimeter using organic photovoltaics** [10655-36]

POSTER SESSION

10655 OU **Anomaly detection of passive polarimetric LWIR augmented LADAR** [10655-30]

10655 OV **Compact LWIR polarimeter for cirrus ice properties** [10655-31]

- 10655 OX **A dual wave infrared imaging polarimeter** [10655-33]
- 10655 OY **Visible spectrum polarization characterization of *Equus zebra hartmannae* hide** [10655-34]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Robert Fiete, Harris Corporation (United States)

Symposium Co-chair

Jay Kumler, JENOPTIK Optical Systems, LLC (United States)

Conference Chairs

David B. Chenault, Polaris Sensor Technologies, Inc. (United States)

Dennis H. Goldstein, Polaris Sensor Technologies, Inc. (United States)

Conference Program Committee

Julia Craven, Sandia National Laboratories (United States)

Michael G. Gartley, Rochester Institute of Technology (United States)

Viktor Gruev, University of Illinois at Urbana-Champaign
(United States)

Kristan P. Gurton, U.S. Army Research Laboratory (United States)

Neelam Gupta, U.S. Army Research Laboratory (United States)

Charles Kim, Northrop Grumman Electronic Systems (United States)

Michael W. Kudenov, North Carolina State University (United States)
and College of Optical Sciences, The University of Arizona
(United States)

Joao M. Romano, U.S. Army Armament Research, Development and
Engineering Center (United States)

Joseph A. Shaw, Montana State University (United States)

J. Scott Tyo, UNSW Canberra (Australia)

Session Chairs

- 1 Measurements and Applications
David B. Chenault, Polaris Sensor Technologies, Inc. (United States)
- 2 Polarization System Design and Instruments I

- 6 Atmospheric Effects
Joseph A. Shaw, Montana State University (United States)
- 7 Analysis and Simulation II
Michael W. Kudenov, North Carolina State University (United States)

Introduction

A variety of current work in polarization research is contained within this volume, with an emphasis on defense and commercial sensing applications. The applications of polarimetry presented in this conference range from biometrics to navigation using polarization that originates in the sky. The field continues to mature through advances in instrumentation, modeling, and processing.

These proceedings are made up of papers from seven conference sessions. An invited paper on polarimetric thermal imaging for biometrics led the first session, Measurements and Applications. This was followed on the first day of the conference by sessions on Polarization System Design and Instruments, Active Sensing, and Analysis and Simulation. The second day started with a session on Atmospheric Effect followed by a second Analysis and Simulation session. A poster session included such wide-ranging topics as polarization characterization of zebras and description of a dual wave infrared imaging polarimeter.

This conference marks the twentieth year in a row that an SPIE polarization conference has been held. Polarization continues to be a subject of high interest in the optical community. Over the last fourteen years, the polarization conferences have alternated from the Optics + Photonics meeting in odd years, to the Defense, Security + Commercial Sensing meeting in even years. The nineteen prior conferences from 2017 through 1999 were documented in *Proceedings of SPIE*, Volumes 10407, 9853, 9613, 9099, 8873, 8364, 8160, 7672, 7461, 6972, 6682, 6240, 5888, 5432, 5158, 4819, 4481, 4133, and 3754. Previous conferences in this series included Polarization: Measurement, Analysis, and Remote Sensing held in San Diego, in 1997 (*Proceedings of SPIE*, Vol. 3121), and Polarization and Remote Sensing held in San Diego, in 1992 (*Proceedings of SPIE*, Vol. 1747). Conferences on polarization, without the specific emphasis and inclusion of the remote sensing application and entitled, Polarization Analysis and Measurement I and II (*Proceedings of SPIE*, Vols. 1746 and 2265), were held in San Diego, in 1992 and 1994. Earlier conferences include Polarimetry: Radar, Infrared, Visible, Ultraviolet, and X-Ray (*Proceedings of SPIE*, Vols. 1317, 1990), and Polarization Considerations in Optical Systems I and II (*Proceedings of SPIE*, Vol. 891, in 1988, and Vol. 1166, in 1989).

Our appreciation is given to our program committee members and session chairpersons for their efforts in making this conference a success, and to the contributing authors for the high quality of the papers in this volume.

David B. Chenault
Dennis H. Goldstein
