Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

Dear colleagues,

We'd like to express our appreciation to all of the authors, co-authors, presenters, conference committee members, workshop organizers, and attendees of the Ground-Based and Airborne Telescopes VII conference at the 2018 SPIE Astronomical Telescopes and Instrumentation Symposium. We further extend a sincere thank you to the SPIE coordination staff for their dedicated efforts in bringing this event, including over 200 oral, poster, and workshop presentations, to fruition.

Special features of this year's conference included two collaborative sessions with the Modeling, Systems Engineering, and Project Management for Astronomy VII conference on Modeling as a Driver of Observatory Design, plenary presentations by major observatories in early operations, commissioning, and development including Gravitational Wave Observatories, and two special workshops on topics of Shutter Mechanisms and Optical Coatings.

We look forward to seeing everyone again in Yokohama, Japan in 2020, and hearing about the amazing accomplishments to come.
