Event: Radioelectronics Systems Conference, 2017, Jachranka, Poland

PROCEEDINGS OF SPIE

2017 Radioelectronic Systems Conference

Adam Kawalec
Andrzej Witczak
Editors

14–16 November 2017
Jachranka, Poland

Organized by
Military University of Technology (Poland)
PIT-RADWAR S.A. (Poland)
The Armament Policy Department of the Ministry of National Defence (Poland)
Military Institute of Armament Technology (Poland)

Sponsored by
Electronics and Telecommunications Committee of the Polish Academy of Sciences
Polish National Committee of International Union of Radio Science
Polish Space Agency

Published by
SPIE

Volume 10715

Proceedings of SPIE 0277-786X, V. 10715

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

2017 Radioelectronic Systems Conference, edited by Adam Kawalec, Andrzej Witczak, Proc. of SPIE
Vol. 10715, 1071501 · © 2018 SPIE · CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2500424

Proc. of SPIE Vol. 10715 1071501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

OPENING SESSION

10715 02	Interception and combat of cruise missiles by Grom MANPADS [10715-4]
----------	---

PLENARY SESSION

10715 03	Phase difference positioning in asynchronous system [10715-14]
----------	---

ANTENNAS

10715 04	Analysis of conical corrugated horn antenna operating with high power pulses [10715-7]
10715 05	Circular antenna array based on small cavity-backed slot antennas for wireless battlefield sensor applications [10715-16]
10715 06	Numerical and experimental assessment of Vlasov antenna performance for high power microwave applications [10715-17]

BIOMEDICAL ELECTRONICS

10715 07	Immunity of medical electrical equipment to radiated RF disturbances [10715-18]
10715 08	Spectral analysis of major heart tones [10715-9]

MICROWAVES AND OPTOELECTRONICS TECHNOLOGIES

10715 09	Parasitic modes in oven magnetron [10715-5]
10715 0A	Noise analysis in numerical modeling of crossed fields microwave tubes [10715-13]

RADIOLOCATION IN APPLICATIONS

- 10715 0B **Evaluation of jamming efficiency for the protection of a single ground object** [10715-2]
- 10715 0C **A method to improve the range resolution in stepped frequency continuous wave radar** [10715-3]
- 10715 0D **Acoustic direction finding using multi-dimensional Fourier transform** [10715-10]
- 10715 0E **Ground penetrating radar data processing using Akaike information criterion** [10715-25]

SIGNAL AND DATA PROCESSING IN RADIOELECTRONICS SYSTEMS

- 10715 0F **Fusion of identification information from ELINT-ESM sensors** [10715-1]
- 10715 0G **The concept of the radar environment simulator software** [10715-22]
- 10715 0H **Optimization of the efficiency of search operations in the relational database of radio electronic systems** [10715-20]
- 10715 0I **Matched filter module as an application of modern FPGA in radar systems** [10715-26]
- 10715 0J **Application of CUDA computing technology for digital antenna beam forming** [10715-24]

TELEDETECTION

- 10715 0K **High-speed object detection methods** [10715-8]
- 10715 0L **Azimuth estimator for a rotating array radar with wide beam** [10715-23]

TRANSMIT AND RECEIVE MODULES

- 10715 0M **Ammonothermal GaN substrates for microwave electronics and energoelectronics** [10715-28]
- 10715 0N **GaN HEMT power amplifier for radar waveforms** [10715-27]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Conference Chairs

Adam Kawalec, Military University of Technology (Poland)
Krzysztof Kulpa, Warsaw University of Technology (Poland)
Robert Szelenbaum, PIT-RADWAR S.A. (Poland)
Andrzej Witczak, Military University of Technology (Poland)

Scientific Committee

Witold Czarnecki, Military University of Technology (Poland)
Andrzej Dobrowolski, Military University of Technology (Poland)
Łukasz Dziuda, Military Institute of Aviation Medicine (Poland)
Jerzy Łopatka, Military University of Technology (Poland)
Paweł Kabacik, Wrocław University of Technology (Poland)
Piotr Kaniewski, Military University of Technology (Poland)
Ryszard J. Katulski, Gdańsk University of Technology (Poland)
Mieczysław Lepionka, Polish Space Agency (Poland)
Zygmunt Mierczyk, Military University of Technology (Poland)
Jerzy Miłoś, PIT-RADWAR S.A. (Poland)
Jacek Misiurewicz, Warsaw University of Technology (Poland)
Józef Modelski, Warsaw University of Technology (Poland)
Marek Nałęcz, Warsaw University of Technology (Poland)
Mateusz Pasternak, Military University of Technology (Poland)
Edward Sędek, PIT-RADWAR S.A. (Poland)
Piotr Slobodzian, Wrocław University of Technology (Poland)
Bogusław Smólski, Military University of Technology (Poland)
Cezary Specht, Gdynia Maritime University (Poland)
Waldemar Susek, Military University of Technology (Poland)
Bronisław Stec, Military University of Technology (Poland)
Wojciech Wojtasiak, Warsaw University of Technology (Poland)
Ewelina Zawadzka-Bartczak, Military Institute of Aviation Medicine (Poland)

Session Chairs

Plenary Session I

Andrzej Dobrowolski, Military University of Technology (Poland)
Adam Kawalec, Military University of Technology (Poland)

Microwave and Optoelectronic Technologies I

Waldemar Susek, Military University of Technology (Poland)

T/R Modules

Wojciech Wojtasiak, Warsaw University of Technology (Poland)

Microwave and Optoelectronic Technologies II

Bronisław Stec, Military University of Technology (Poland)

Waldemar Susek, Military University of Technology (Poland)

Antennas

Piotr Slobodzian, Wrocław University of Technology (Poland)

Signal and Data Processing in Radioelectronic Systems I

Krzysztof Kulpa, Warsaw University of Technology (Poland)

Jerzy Łopatka, Military University of Technology (Poland)

Unmanned Aerial Vehicles: Construction, Use, Detection, and Combating I

Andrzej Witczak, Military University of Technology (Poland)

Plenary Session II

Bogusław Smólski, Military University of Technology (Poland)

Unmanned Aerial Vehicles: Construction, Use, Detection, and Combating II

Witold Czarnecki, Military University of Technology (Poland)

Biomedical Electronics

Zygmunt Mierczyk, Military University of Technology (Poland)

Łukasz Dziuda, Military Institute of Aviation Medicine (Poland)

Company Session

Andrzej Witczak, Military University of Technology (Poland)

Signal and Data Processing in Radioelectronic Systems II

Ryszard J. Katulski, Gdańsk University of Technology (Poland)

Łukasz Dziuda, Military Institute of Aviation Medicine (Poland)

Radar Applications I

Jerzy Miłoś, PIT-RADWAR S.A. (Poland)

Mateusz Pasternak, Military University of Technology (Poland)

Remote Sensing

Adam Kawalec, Military University of Technology (Poland)

Krzysztof Kulpa, Warsaw University of Technology (Poland)

Radar Applications II

Mateusz Pasternak, Military University of Technology (Poland)

Introduction

The annual Radioelectronic Systems Conference supports a detailed discussion of the most important technical issues in the field of radioelectronic systems. It is also a review of the country's work and direction in radioelectronic technologies.

A rapid development of new signal processing algorithms and methods have emerged, along with new technologies that allow us to introduce advanced technical solutions into radioelectronic systems.

A mutual exchange of experience between national scientific centres, research and development units, and the national electronics industry should result in cooperation that is a key factor for successful development of radioelectronic systems.

Every year, the conference expands its topics spectrum according to the expectations of the community.

This year, the scope of the conference included:

- Acoustics and Acoustoelectronics
- Antennas and Microwaves
- Use of Unmanned Aerial Vehicles and Defence against Unauthorized Use
- Biomedical Electronics
- Optoelectronics
- Signal and Data Processing in Radioelectronic Devices and Systems
- Radar Systems
- Navigation Systems
- Radioelectronics in Space Applications
- Special Devices and Systems.

The conference is organized under the auspices of the Ministry of National Defence, which emphasizes the fact that the scope of the conference covers the priorities of the Polish Armed Forces.

We hope that the 2017 Radioelectronic Systems Conference was the basis for in-depth discussion among participants and a great opportunity to exchange knowledge and experience.
