Proc. of SPIE Vol. 10746 1074601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 UNCONVENTIONAL AND LIGHT FIELD OPTICS

10746 02	Switchable virtual, augmented, and mixed reality system through optical cloaking (Invited Paper) [10746-1]
10746 04	Light-field capture and display systems: limitations, challenges, and potentials (Invited Paper) [10746-3]
10746 06	The potential synergies of visual scene reconstruction and medical image reconstruction [10746-26]

SESSION 2 MULTI- AND HYPERSPECTRAL APPLICATIONS

10746 08	Broadband optical sensing/detection technology for missile systems [10746-8]

SESSION 3 NOVEL OPTICAL SYSTEMS AND METHODS I

10746 0B	A novel application of photogrammetry to ground convergence monitoring in underground excavations (Invited Paper) [10746-11]
10746 0E	Further development of an imaging inspection system for layered surfaces [10746-14]

SESSION 4 NOVEL OPTICAL SYSTEMS AND METHODS II

10746 0F	Relaxing alignment tolerance in single-mode fiber connections using 3D nanoprinted beam expanders [10746-15]
10746 0G	Statistical variation of color uniformity for solid-state illumination systems (Invited Paper) [10746-16]

- 10746 OH   **Standard specifications vs metrology of LED illumination systems (Invited Paper)** [10746-17]
- 10746 OI   **Optical system design for characterization of photo-response non-uniformity (PRNU) of CMOS image sensors** [10746-18]
- 10746 OJ   **A comparison of encoding methods for automated design of optical architectures** [10746-19]

POSTER SESSION

- 10746 OM   **Optical designs of non standard objectives for use in biological microscope** [10746-22]
- 10746 OO   **Cat eye effect weaken based on achromatic prism and phase corrector** [10746-24]
- 10746 OP   **Effects of aperture size on the performance of CMOS image sensor with pixel aperture for depth extraction** [10746-25]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

José Sasián, College of Optical Sciences, The University of Arizona
(United States)

Conference Chairs

Cornelius F. Hahlweg, bbw Hochschule (Germany)
Joseph R. Mulley, Melles Griot (United States)

Conference Program Committee

Francois Callewaert, Northwestern University (United States)
Joseph S. Choi, Raytheon Space and Airborne Systems
(United States)
Arthur J. Davis, ORAFOL Americas, Inc. (United States)
Stephan Fahr, JENOPTIK Optical Systems GmbH (Germany)
Peter I. Goldstein, Philips Color Kinetics (United States)
G. Groot Gregory, Synopsys, Inc. (United States)
Eric Herman, Zygo Corporation (United States)
R. John Koshel, College of Optical Sciences, The University of Arizona
(United States)
Sara Madaan, The University of Southern California (United States)
Bharathwaj Appan Narasimhan, Limbak 4PI S.L. (Spain)
Craig Olson, L-3 Sonoma EO (United States)
José Sasián, College of Optical Sciences, The University of Arizona
(United States)
R. Hamilton Shepard III, Waymo, LLC (United States)
Haiyin Sun, ChemImage Corporation (United States)
Udo Zölzer, Helmut-Schmidt University (Germany), University of the
Federal Armed Forces Hamburg (Germany)

Session Chairs

- 1 Unconventional and Light Field Optics
R. Hamilton Shepard III, Waymo, LLC (United States)
- 2 Multi- and Hyperspectral Applications
Craig Olson, L-3 Sonoma EO (United States)

- 3 Novel Optical Systems and Methods I
Stephan Fahr, JENOPTIK Optical Systems GmbH (Germany)
- 4 Novel Optical Systems and Methods II
G. Groot Gregory, Synopsys, Inc. (United States)

Introduction

The twenty-first annual conference for Novel Optical Systems Design and Optimization was held in San Diego, California, this year. We had a full one-day program. The four technical sessions were dedicated to Unconventional and Light Field Optics; Multi- and Hyperspectral Applications; and, as a double, to Novel Optical Systems and Methods, the latter covering several metrology and inspection systems. In addition, there was a poster session.

The session on Unconventional and Light Field Optics started with two invited papers from the VR world, chaired by R. Hamilton Shepard. Craig Olsen was responsible for Multi- and Hyperspectral Applications, which included highlights with spectral catalogue data, as they are highly appreciated among researchers. Stephan Fahr chaired the first "Novel" session, which brought up two mining-related topics: photogrammetry of underground excavations and inspection of mining products. Groot Gregory finished with the second "Novel" session, one highlight being optical designs represented and altered by "genetic expression programming" methods.

Our conference had several invited papers, some of which complemented each other in a surprising, or intended, way.

Our thanks go to all the speakers and authors who made this conference a coherent and interesting event. We are very grateful to those who helped make this conference a success, especially SPIE staff, the program committee, and of course, the interested audience, sparing no effort to keep the discussion going.

The SPIE staff ensured that everything ran smoothly before, during, and after the meeting.

The program committee provided excellent assistance to ensure the quality of the content while also presiding over a number of the sessions. Thanks to them for keeping our conference running smoothly and on time. Also, thanks to everyone else on our program committee for helping review the abstracts and paper submissions: Francois Callewaert, Joseph Choi, Arthur Davis, Peter Goldstein, Eric Herman, John Koshel, Sara Madaan, Bharathwaj Narasimhan, José Sasián, Hayin Sun and Udo Zölzer.

Next year, we will return for our twenty-second conference. The chairs will be Cornelius Hahlweg and Joseph Mulley. We look forward to seeing you in 2019!

Cornelius F. Hahlweg
Joseph R. Mulley
