Volume 10774

Proceedings of SPIE 0277-786X, V. 10774

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Technologies for Telecommunications 2017, edited by Vladimir A. Andreev, Anton V. Bourdine,
Vladimir A. Burdin, Oleg G. Morozov, Albert H. Sultanov, Proc. of SPIE Vol. 10774, 1077401
© 2018 SPIE · CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2501589

Proc. of SPIE Vol. 10774 1077401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix	<i>Authors</i>
xi	<i>Conference Committee</i>
xv	<i>Introduction</i>

OPTICAL TELECOMMUNICATION TECHNOLOGIES AND SYSTEMS

10774 02	Improving efficiency of fiber optic communication systems with the use of lexicographic decoding of polar codes [10774-9]
10774 03	Fiber optic communication line with controlled redundancy based on transfaser from GaInAs crystal [10774-49]
10774 04	Analysis of synchronization error influence on optical receiver noise immunity [10774-72]
10774 05	Synthesis of the optimal algorithm for discrimination of the optical signals taking into account their dynamic range [10774-73]
10774 06	Elliptic Gaussian vortices with controlled orbital angular momentum for wireless information transmission [10774-2]
10774 07	Chirped optical signal application methods in fiber optic radio-photonic communications [10774-17]
10774 08	Method for analysis of real commercially available optical fibers with large core diameter [10774-26]
10774 09	Simulation of vortex laser beams superposition propagation through a random optical environment [10774-36]
10774 0A	Secure data transmission channel protected by special fiber optic link based on optical crypto-fibers [10774-39]
10774 0B	Simulation of simplex acousto-optical data transmission on fiber optic link [10774-51]
10774 0C	Investigation of a radio-photonic frequency doubler of radio signals [10774-86]
10774 0D	Reduction of modal noise in local area network [10774-31]
10774 0E	UWB RoF bench experimental testing with radio link based on phased antenna array [10774-50]

PASSIVE AND ACTIVE COMPONENTS OF OPTICAL TELECOMMUNICATIONS

10774 OF	Modeling the reflection of electromagnetic waves at diffraction gratings applied on a freeform surfaces [10774-8]
10774 OG	Color beam splitters and combiners [10774-19]
10774 OH	Large-screen multi-view 3D display [10774-20]
10774 OI	Revival effect in optical waveguides [10774-30]
10774 OJ	Investigation of vortex evanescent fields in the near zone of fiber taper and sub-wavelength diffractive axicon [10774-42]
10774 OK	Results of analysis of non-symmetrical graded-index multimode optical fibers by extended modified Gaussian approximation [10774-63]
10774 OL	Spectral characteristics of step index single mode optical fiber with Kerr nonlinearity [10774-77]
10774 OM	Z-scan technique to study gain properties and pump-induced processes in Ce:LiCAF UV active medium [10774-80]
10774 ON	Spectral characteristics of LP11 mode of step index optical fiber with Kerr nonlinearity [10774-81]
10774 OO	Modeling diffractive optics elements and devices [10774-82]
10774 OP	An approach to developing a Fabry-Perot filter by a single fabrication step for gas sensing applications [10774-10]
10774 OQ	Laser beam shaping with purposefully changing of spatial power distribution [10774-11]
10774 OR	The radio-photon method of forming directional radio emission in a wide frequency band [10774-15]
10774 OS	The simulation of equivalent currents exciting a stochastic aperture radiator [10774-21]
10774 OT	Comparative modeling of focusing of femtosecond pulses [10774-27]
10774 OU	Analysis of dielectric circular cylinder light spot narrowing by whispering gallery modes and influence of material absorption [10774-28]
10774 OV	Experimental investigation of the birefringence of the parabolic gradient lens on the basis of the astigmatic transformation of the Bessel beam [10774-29]
10774 OW	Microwave photonic beamforming system with broadband chirped fiber Bragg grating [10774-34]
10774 OX	An analysis of propagation of Gauss-Hermite beams with embedded optical vortex in parabolic fiber [10774-35]

- 10774 0Y **Multiple frequencies analysis in tasks of FBG based instantaneous frequency measurements** [10774-43]
- 10774 0Z **Subwavelength focusing of azimuthally polarized optical vortex** [10774-47]
- 10774 10 **The simple analytical formula for estimating a coupling of modes at the joint of optical fibers** [10774-57]
- 10774 11 **Experimental study of optical characteristics of a satellite-based Offner hyperspectrometer** [10774-58]
- 10774 12 **Probabilistic model for optical fiber transmission coefficient under mechanical influences** [10774-71]
- 10774 13 **Laser and holographical testing possibilities for segments location and alignment processes of hyper high-aperture and extremely light optical telescope multiple mirrors** [10774-87]
- 10774 14 **Two-frequency radiation forming for sub-terahertz carriers generation in optical range** [10774-89]
- 10774 15 **Optical fiber as a linear one-dimensional system with frequency dispersion** [10774-91]
- 10774 16 **Experimental research of fusion splicer software settings impact on micro-lensed optical fiber configuration and geometry parameters** [10774-46]

ONE-DIMENSION AND MULTI-DIMENSION OPTICAL SIGNALS DATA PROCESSING

- 10774 17 **Contours detection in the images using energy characteristics of wavelet transform** [10774-6]
- 10774 18 **Processing multidimensional optical video surveillance signals for triangulation scanner linearization algorithm** [10774-7]
- 10774 19 **Development of a processing method of digital maps and satellite images for solving problems of emergencies** [10774-13]
- 10774 1A **Processing of video signal using the pre-correction method to improve image quality in coaxial cable** [10774-56]
- 10774 1B **Algorithm for searching and locating an object of interest in the image** [10774-48]
- 10774 1C **Blind identification of multidimensional signals and its application in MIMO communication systems** [10774-52]
- 10774 1D **Data processing method based on computed tomography shots segmentation** [10774-64]

OPTICAL NETWORKS MAINTENANCE, CONTROL AND RESTORATION

- 10774 1E **Fiber optic to radio-photonic equipment constructive principle for pipeline multiple defect monitor** [10774-18]
- 10774 1F **Control of optical cables condition installed using roadside technology** [10774-40]
- 10774 1G **Fiber Bragg grating length as sensing parameter: new way for fibre optic wear sensors** [10774-54]
- 10774 1H **Research of Haar wavelet threshold sensitivity for detection non-reflective events on fragments of OTDR traces** [10774-62]
- 10774 1I **Results of experimental research of connector ferrule end-face contamination impact on degradation of fiber optic connection parameters** [10774-75]
- 10774 1J **Microwave photonic polyharmonic probing for fiber optical telecommunication structures and measuring systems sensors monitoring** [10774-41]
- 10774 1K **Research of the local communication combined cable on resistance to mechanical stress** [10774-67]

POWER TECHNOLOGIES FOR INFOCOMMUNICATIONS

- 10774 1L **Analysis of energy consumption in the TDM-PON** [10774-83]

PROBLEMS OF TRAINING ON OPTICAL TELECOMMUNICATION SCIENCE TOPICS

- 10774 1M **Results and analysis of survey conducted among professional fiber optic technicians and engineers concerned with skills in fiber optic link testing and measurement** [10774-78]
- 10774 1N **Modern psychological and pedagogical technologies as a method of motivation development in specialists training for the field of optical and fiber optic communication systems** [10774-85]

ADVANCED TECHNOLOGIES FOR OPTICAL TELECOMMUNICATIONS

- 10774 1O **Results of differential mode delay map measurements performed for multimode optical fibers with strong and weak diameter variation** [10774-61]
- 10774 1P **Impact of mode coupling effects on few-mode optical fiber communication line performance** [10774-70]
- 10774 1Q **Frequency coding quantum key distribution channel based on serial photons amplitude modulation and phase commutation** [10774-90]
- 10774 1R **All-optical interface objectives for heterogeneous segments and suggested synchronization circuit** [10774-16]

- 10774 1S **Application of whispering gallery modes (WGM) in optical communications** [10774-22]
- 10774 1T **Justification and analysis of OAM-carrying electromagnetic fields spinor propagation equation for dispersive media** [10774-59]
- 10774 1U **Nonlinear impairments in mode division multiplexed systems** [10774-66]
- 10774 1V **Superefficient long-lived multiresonator quantum memory** [10774-79]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

This volume contains a selection of reports presented at the 15th International Conference on Optical Technologies for Telecommunications. The conference was held 20–23 November 2017 at Kazan National Research Technical University, Kazan, Russian Federation.

The conference covered a wide range of problems concerned with optical technologies in telecommunications. We have no doubt that the proceedings of the conference will be helpful for both scientists and specialists working in the fields of telecommunication technologies.
