Front Matter: Volume 10776

, "Front Matter: Volume 10776," Proc. SPIE 10776, Remote Sensing of the Atmosphere, Clouds, and Precipitation VII, 1077601 (27 November 2018); doi: 10.1117/12.2520628

Event: SPIE Asia-Pacific Remote Sensing, 2018, Honolulu, Hawaii, United States

PROCEEDINGS OF SPIE

Remote Sensing of the Atmosphere, Clouds, and Precipitation VII

**Eastwood Im
Song Yang**
Editors

**24–26 September 2018
Honolulu, Hawaii, United States**

Sponsored by
SPIE

Cosponsored by
NASA—National Aeronautics and Space Administration (United States)
RADI—Institute of Remote Sensing and Digital Earth, Chinese Academy of Sciences (China)
State Key Laboratory of Remote Sensing Science, Chinese Academy of Sciences (China)
Ministry of Earth Sciences (India)

Cooperating Organizations
University of Hawai'i at Mānoa (United States)
JAXA—Japan Aerospace Exploration Agency (Japan)
NICT—National Institute of Information and Communications Technology (Japan)
ISRO—Indian Space Research Organization (India)
ESSO—Earth System Science Organization (India)

SPIE

Volume 10776

Proceedings of SPIE 0277-786X, V. 10776

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Remote Sensing of the Atmosphere, Clouds, and Precipitation VII, edited by Eastwood Im,
Song Yang, Proc. of SPIE Vol. 10776, 1077601 · © 2018 SPIE
CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2520628

Proc. of SPIE Vol. 10776 1077601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing of the Atmosphere, Clouds, and Precipitation VII*, edited by Eastwood Im, Song Yang, Proceedings of SPIE Vol. 10776 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>

REMOTE SENSING OF CLOUDS AND PRECIPITATION

10776 02	Current status of the Dual-frequency precipitation Radar on the Global Precipitation Measurement core spacecraft and scan pattern change test operations results (Invited Paper) [10776-1]
----------	--

REMOTE SENSING OF AEROSOLS AND DUST

10776 07	Synergistic use of next-generation geostationary and polar orbit satellites for investigating aerosols, clouds, and radiation [10776-6]
----------	--

EMERGING TECHNOLOGIES FOR ATMOSPHERIC REMOTE SENSING I

10776 0D	Compact Midwave Imaging System (CMIS) for retrieval of cloud motion vectors and cloud geometric heights [10776-12]
10776 0E	Benefits of a quadrature Mach Zehnder interferometer as demonstrated in the Optical Autocovariance Wind and Lidar (OAWL) wind and aerosol measurements [10776-13]

REMOTE SENSING OF CYCLONES AND SEVERE STORMS

10776 0G	Observing fast mesoscale atmospheric processes with a geostationary microwave sounder [10776-16]
----------	--

EMERGING TECHNOLOGIES FOR ATMOSPHERIC REMOTE SENSING II

- 10776 0I **Atmospheric remote sensing with convoys of miniature radars (Invited Paper)** [10776-21]
- 10776 0J **All-weather microwave atmospheric sensing using CubeSats and constellations (Invited Paper)**
[10776-22]

ALGORITHM AND VALIDATION OF AEROSOLS, CLOUDS, CONVECTION, AND PRECIPITATION

- 10776 0Q **Possible improvement of the GPM's Dual-frequency Precipitation Radar (DPR) algorithm (Invited Paper)** [10776-29]
- 10776 0R **The EarthCARE Cloud Profiling Radar (CPR) doppler measurements in deep convection: challenges, post-processing, and science applications** [10776-30]
- 10776 0T **Evaluation of the validation of TRMM data over the region of Qilianshan mountains in Northwest China** [10776-32]

REMOTE SENSING OF EXTREME WEATHER AND EVENTS

- 10776 0W **Summer ozone variation derived from FY3/TOU satellite data and impacts of East Asian summer monsoon** [10776-42]
- 10776 0X **Climate change and its impact on drought in Eastern Gansu rainfed agricultural area in Northwest China in the last thirty years** [10776-37]

REMOTE SENSING OF ATMOSPHERIC CHEMISTRY AND GREENHOUSE GASES

- 10776 0Z **Clouds effect on the atmospheric total column carbon dioxide retrieval by space orbiting Argus 1000 micro-spectrometer: introductory study** [10776-39]

REGIONAL STUDIES OF AEROSOLS, CLOUDS, CONVECTION, AND PRECIPITATION

- 10776 1I **Study on vertical visibility during haze in Shanghai based on the spaceborne lidar** [10776-45]

POSTER SESSION

- 10776 14 **Impact study on the accuracy of Global Satellite Mapping of Precipitation (GSMaP) caused by future small precipitation radar constellation [10776-49]**
- 10776 15 **Impacts of the Kuroshio intrusion entering the Luzon Strait on the local atmosphere by satellite observations [10776-50]**
- 10776 16 **Discrimination and retrieval of aerosol types using multi-channels including near-UV and polarization by GCOM-C/SGLI [10776-52]**
- 10776 17 **The fact and causes of warm-dry and warm-wet change since 1971 in HEXI corridor area of Gansu Province, China [10776-54]**
- 10776 19 **Application of dust and PM_{2.5} detection methods using MODIS data to the Asian dust events which aggravated respiratory symptoms in Western Japan in May 2011 [10776-57]**
- 10776 1A **Application of atmospheric low-frequency oscillation on meteorological drought forecast in Eastern part of the Northwest China [10776-58]**

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Symposium Committees

Symposium Chair

Upendra Singh, NASA Langley Research Center (United States)

Symposium Co-chairs

Toshiyoshi Kimura, Japan Aerospace Exploration Agency
(Japan)

K. J. Ramesh, Ministry of Earth Sciences (India)

Jiancheng Shi, Institute of Remote Sensing and Digital Earth
(China)

Honorary Symposium Chairs

Huadong Guo, Institute of Remote Sensing and Digital Earth
(China)

Stephen Jurczyk, National Aeronautics and Space Administration
(United States)

A. S. Kiran Kumar, Indian Space Research Organisation (India)

Jean-Yves Le Gall, Centre National d'Études Spatiales (France)

Robert M. Lightfoot, Jr., National Aeronautics and Space
Administration (United States)

Madhavan N. Rajeevan, Ministry of Earth Sciences (India)

Alain Ratier, EUMETSAT (Germany)

Hiroshi Yamakawa, Japan Aerospace Exploration Agency
(Japan)

Symposium International Organizing Committee

Michael H. Freilich, *Chair*, National Aeronautics and Space
Administration (United States)

Jack A. Kaye, National Aeronautics and Space Administration
(United States)

Barry L. Lefer, National Aeronautics and Space Administration
(United States)

Clayton P. Turner, NASA Langley Research Center (United States)

Pamela Millar, NASA Goddard Space Flight Center
(United States)

David F. Young, NASA Langley Research Center (United States)

Tapsan Misra, Indian Space Research Organisation
(India)

Kazuo Tachi, Japan Aerospace Exploration Agency (Japan)

Katsuhiro Nakagawa, National Institute of Information and
Communications Technology (Japan)
Haruhisa Shimoda, Tokai University (Japan)
Kohei Mizutani, National Institute of Information and
Communications Technology (Japan)
Wonkook Kim, Korea Institute of Ocean Science and Technology
(Republic of Korea)
YoungJe Park, Korea Institute of Ocean Science and Technology
(Republic of Korea)
Jhoon Kim, Yonsei University (Republic of Korea)
Xianqiang He, Second Institute of Oceanography, State Oceanic
Administration (China)
Shunling Liang, Beijing Normal University (China)

Conference Committee

Conference Chairs

Eastwood Im, Jet Propulsion Laboratory (United States)
Song Yang, U.S. Naval Research Laboratory (United States)

Conference Program Committee

Kinji Furukawa, Japan Aerospace Exploration Agency (Japan)
Parminder Ghuman, NASA Goddard Space Flight Center
(United States)
Ziad S. Haddad, Jet Propulsion Laboratory (United States)
Kyung-Soo Han, Pukyong National University (Korea, Republic of)
Jianping Huang, Lanzhou University (China)
Toshio Iguchi, National Institute of Information and Communications
Technology (Japan)
Chandra Mohan Kishtawal, Indian Space Research Organization
(India)
Pavlos Kollias, Stony Brook University (United States)
Raj Kumar, Indian Space Research Organisation (India)
Chian-Yi Liu, National Central University (Taiwan)
Byung-Ju Sohn, Seoul National University (Korea, Republic of)
Graeme L. Stephens, Jet Propulsion Laboratory (United States)
Pao-Kuan Wang, Academia Sinica (Taiwan)
Peng Zhang, National Satellite Meteorological Center (China)

Session Chairs

- 1 Remote Sensing of Clouds and Precipitation
Song Yang, U.S. Naval Research Laboratory (United States)
- 2 Remote Sensing of Aerosols and Dust
Parminder Ghuman, NASA Goddard Space Flight Center
(United States)
- 3 Emerging Technologies for Atmospheric Remote Sensing I
Eastwood Im, Jet Propulsion Laboratory (United States)
Kinji Furukawa, Japan Aerospace Exploration Agency (Japan)
- 4 Remote Sensing of Cyclones and Severe Storms
Toshio Iguchi, National Institute of Information and Communications
Technology (Japan)
William J. Blackwell, MIT Lincoln Laboratory (United States)

- 5 Emerging Technologies for Atmospheric Remote Sensing II
Parminder Ghuman, NASA Goddard Space Flight Center
(United States)
Pao-Kuan Wang, Academia Sinica (Taiwan)
- 6 Modeling and Impact Studies of Atmospheric Observations
Pavlos Kollias, Stony Brook University (United States)
Yuzhi Liu, Lanzhou University (China)
- 7 Algorithm and Validation of Aerosols, Clouds, Convection, and
Precipitation
Ziad S. Haddad, Jet Propulsion Laboratory (United States)
Yuzhi Liu, Lanzhou University (China)
- 8 Remote Sensing of Extreme Weather and Events
Parminder Ghuman, NASA Goddard Space Flight Center
(United States)
Pao-Kuan Wang, Academia Sinica (Taiwan)
- 9 Remote Sensing of Atmospheric Chemistry and Greenhouse Gases
Pavlos Kollias, Stony Brook University (United States)
- 10 Regional Studies of Aerosols, Clouds, Convection, and Precipitation
Pavlos Kollias, Stony Brook University (United States)
