Event: SPIE Remote Sensing, 2018, Berlin, Germany

PROCEEDINGS OF SPIE

Lidar Technologies, Techniques, and Measurements for Atmospheric Remote Sensing XIV

Upendra N. Singh
Georgios D. Tzeremes
Editors

11–12 September 2018
Berlin, Germany

Sponsored by
SPIE

Cooperating Organisations
European Optical Society
European Association of Remote Sensing Companies (Belgium)
CENSIS—Innovation Centre for Sensor and Imaging Systems (United Kingdom)
ISPRS—International Society for Photogrammetry and Remote Sensing
EARSeL—European Association of Remote Sensing Laboratories (Germany)
Remote Sensing & Photogrammetry Society (United Kingdom)

Published by
SPIE

Volume 10791

Proceedings of SPIE 0277-786X, V. 10791

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Lidar Technologies, Techniques, and Measurements for Atmospheric Remote Sensing XIV
edited by Upendra N. Singh, Georgios D. Tzeremes, Proc. of SPIE Vol. 10791, 1079101
© 2018 SPIE · CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2519479

Proc. of SPIE Vol. 10791 1079101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Authors
vii	Conference Committee

SESSION 1 GREENHOUSE GAS MEASUREMENTS

10791 03	All-fibered coherent-differential absorption lidar at 1.645 μm for simultaneous methane and wind-speed measurements [10791-2]
10791 04	Development of the marine Raman lidar system [10791-3]
10791 05	Experimental estimation of the efficiency of trace gas sounding in the mid-IR by the OPO lidar system [10791-4]

SESSION 2 PLANETARY AND EARTH LIDAR OBSERVATIONS

10791 06	Development of a Mars lidar (MARLI) for measuring wind and aerosol profiles from orbit (Invited Paper) [10791-5]
10791 07	A continuously tunable NIR laser and its applications in material classification [10791-6]
10791 09	Lidar system for measurement of vertical profiles of ozone in the upper troposphere-stratosphere [10791-8]
10791 0A	On optimization of optical parameters of biaxial monostatic CW lidar for atmospheric sensing in the daytime [10791-9]

SESSION 3 AEROSOLS AND RAMAN LIDARS

10791 0B	A novel lidar system for CH₄ and VOC's detection of fugitive emissions and environmental monitoring (Invited Paper) [10791-10]
10791 0C	Distribution estimation of radioactivity concentration by compact polarization lidar in Fukushima [10791-12]
10791 0D	Sensitivity of micro-lidar with SiPM to sky backgrounds [10791-13]
10791 0E	A pressure-tuned field-widened Michelson interferometer system as the spectroscopic filter of high-spectral-resolution lidar [10791-14]

POSTER SESSION

- 10791 0G **Lidar sensing atmosphere by gigawatt femtosecond laser pulses in the continent-ocean transition zone** [10791-16]
- 10791 0I **Simulation of the remote atmospheric sounding by OPO lidar system in the near- and mid-IR** [10791-18]
- 10791 0J **Low-level signal processing technique for the wind lidar** [10791-19]
- 10791 0K **Generating condition of non-diffractive beam under annular beam propagation in random media (Best Student Paper Award)** [10791-20]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Christopher M. U. Neale, University of Nebraska-Lincoln (United States)
and Daugherty Water for Food Institute (United States)

Symposium Co-chair

Karsten Schulz, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung (Germany)

Conference Chairs

Upendra N. Singh, NASA Langley Research Center (United States)
Georgios D. Tzeremes, European Space Agency (Netherlands)

Conference Co-chair

Kevin B. Strawbridge, Environment and Climate Change Canada
(Canada)

Conference Programme Committee

Arnoud Apituley, Rijksinstituut voor Volksgezondheid en Milieu
(Netherlands)
Lucas Alados-Arboledas, Universidad de Granada (Spain)
Andreas Behrendt, Universität Hohenheim (Germany)
Andreas Fix, Deutsches Zentrum für Luft- und Raumfahrt e.V.
(Germany)
Fabien Gibert, Ecole Polytechnique Fédérale de Lausanne (France)
Philippe L. Keckhut, LATMOS (France)
Panayotis Kokkalis, Kuwait University (Kuwait)
Eduardo Landulfo, Instituto de Pesquisas Energéticas e Nucleares
(Brazil)
Pamela S. Millar, NASA Goddard Space Flight Center (United States)
Kohei Mizutani, National Institute of Information and Communications
Technology (Japan)
Fred Moshary, The City College of New York (United States)
Doina Nicoleta Nicolae, National Institute of Research and
Development for Optoelectronics (Romania)
Tamer F. Refaat, NASA Langley Research Center (United States)
Valentin B. Simeonov, Ecole Polytechnique Fédérale de Lausanne
(Switzerland)
Manoj K. Srivastava, Benares Hindu University (India)

Iwona S. Stachlewska, University of Warsaw (Poland)
Ulla Wandinger, Leibniz Institut für Troposphärenforschung (Germany)
Tobias Wehr, European Space Research and Technology Center
(Netherlands)

Session Chairs

- 1 Greenhouse Gas Measurements
Kevin B. Strawbridge, Environment and Climate Change Canada
(Canada)
Daniel Cremons, NASA Goddard Space Flight Center (United States)
- 2 Planetary and Earth Lidar Observations
Eduardo Landulfo, Instituto de Pesquisas Energéticas e Nucleares
(Brazil)
Oleg A. Romanovskii, V.E. Zuev Institute of Atmospheric Optics
(Russian Federation)
- 3 Aerosols and Raman Lidars
Tatsuo Shiina, Chiba University (Japan)
Toshihiro Somekawa, Institute for Laser Technology (Japan)
