Event: Photonics Applications in Astronomy, Communications, Industry, and High-Energy Physics Experiments 2018, 2018, Wilga, Poland

PROCEEDINGS OF SPIE

Photonics Applications in Astronomy, Communications, Industry, and High-Energy Physics Experiments 2018

**Ryszard S. Romaniuk
Maciej Linczuk**
Editors

**3–10 June 2018
Wilga, Poland**

Organized by
Institute of Electronic Systems, Faculty of Electronics and Information Technologies,
Warsaw University of Technology (Poland)

Sponsored by
PSP—Photonics Society of Poland • Committee of Electronics and Telecommunications,
Polish Academy of Sciences • ARIES—Accelerator Research and Innovation for European
Science and Society (CERN, EU H2020) • PKOpto—Polish Committee of Optoelectronics of
SEP—The Association of Polish Electrical Engineers • EuroFusion Collaboration • EuroFusion
Poland

SPIE

Volume 10808

Part One of Three Parts

Proceedings of SPIE 0277-786X, V. 10808

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Photonics Applications in Astronomy, Communications, Industry, and High-Energy Physics Experiments 2018,
edited by Ryszard S. Romaniuk, Maciej Linczuk, Proc. of SPIE Vol. 10808, 1080801
© 2018 SPIE · CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2504983

Proc. of SPIE Vol. 10808 1080801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xxvii	<i>Introduction</i>

Part One

CONFERENCE OVERVIEW

10808 02	Photonics Applications and Web Engineering: WILGA 2018 (Invited Paper) [10808-1]
----------	---

PHOTONICS APPLICATIONS

10808 03	Channel modeling and characterization for VLC indoor transmission systems based on MMC ray tracing method (Invited Paper) [10808-4]
10808 04	On the modeling of lighting LED dynamic nonlinearity [10808-6]
10808 05	Fiber optic sensor for measuring currents with mains frequencies [10808-8]
10808 06	Facial expressions recognition by animated motion of Candide 3D model (Invited Paper) [10808-9]
10808 07	Personalization of Candide 3D model for human computer interfacing [10808-193]
10808 08	Application of optical fiber connections in low voltage distribution network management systems [10808-12]
10808 09	Deep alignment network: from MIMD to SIMD platform [10808-15]
10808 0A	Automatic detection of outlier data received in multi-parametric capillary sensors of diesel fuels fit for use [10808-19]
10808 0B	Overview of the measuring systems where a continuously altered light source plays a key role: Part I (Invited Paper) [10808-20]

10808 0C	Analysis of feasibility and capabilities of RTLS systems in tourism industry [10808-22]
10808 0D	Texturing method of the full pixel dynamic range [10808-30]
10808 0E	Numerical modeling of transmission in step index polymer optical fibers using matrix exponential method [10808-35]
10808 0F	Autonomic drone landing system based on LEDs pattern and visual markers recognition [10808-59]
10808 0G	Comprehensive analysis of the ability to monitor selected optical network parameters in the physical layer using convolutional neural networks [10808-64]
10808 0H	Mobile robot to create a room map [10808-67]
10808 0I	Stability evaluation of polarization pulling based on stimulated Raman scattering [10808-72]
10808 0J	Color correction by color mapping using color temperature constraints [10808-76]
10808 0K	The method of improving the dynamic range of jitter analyzers in optical-fiber transmission systems [10808-77]
10808 0L	Digital image transmission simulation using the PL-log-MAP turbo decoding algorithm [10808-78]
10808 0M	Absolute calibration of LIBS data [10808-83]
10808 0N	Degree of local depolarization of laser radiation fields sorted by multi-layer birefringence networks of protein crystals [10808-89]
10808 0O	Optical absorption of sandwich structure $(\text{Ag}_3\text{AsS}_3)_{0.6}(\text{As}_2\text{S}_3)_{0.4}$ thin film-gold nanoparticles prepared by pulse laser deposition [10808-95]
10808 0P	Optoelectronic neuron on c-negatron [10808-96]
10808 0Q	Image steganography for increasing security of OTP authentication [10808-114]
10808 0R	Development of the construction sketch of N-channel MOS-phototransistor with bilateral illumination of channel and operation card of its making [10808-120]
10808 0S	Interior lightning system sensors placement optimization [10808-127]
10808 0T	Quality control automation of electric cables using machine vision [10808-129]
10808 0U	Spectroscopic ellipsometry measurements and nanocharacterization of conductive graft copolymer thin films [10808-138]
10808 0V	Technology and characterization of HgCdTe photodiode with a strengthened passivation [10808-145]

10808 0W	The output signal of a digital optoelectronic processor [10808-149]
10808 0X	Realistic stereo visualization system architecture using ray tracing [10808-154]
10808 0Y	Optical method to determine the quantity of water in milk using the visible radiation range [10808-157]
10808 0Z	Multiparametric capillary sensor: stabilization of local heating [10808-166]
10808 10	Precision measurement of coordinates of power center of extended laser path images [10808-176]
10808 11	Colorimetric characterization of the tunable LED-based light source at the output of the homogenizing rod [10808-179]
10808 12	Functionally integrated sensors of thermal quantities based on optocoupler [10808-180]
10808 13	Multifractal spectra classification of flame luminosity waveforms [10808-190]
10808 14	Determining of combustion process state based on optical flow flame image sequences [10808-192]
10808 15	Averaged EMG signal models obtained in cyclic processes (Invited Paper) [10808-196]
10808 16	Design of an automated rice grain sorting system using a vision system [10808-198]
10808 17	Development of an automated quality control system of confectionery using a vision system [10808-200]
10808 18	Application of fiber Bragg gratings for stress analysis of high mobility vehicle frame [10808-205]
10808 19	Data transmission with 1.3um VCSEL [10808-208]
10808 1A	Tuning deep learning algorithms for face alignment and pose estimation [10808-211]
10808 1B	An intelligent system of neural networking recognition of multicolor spot images of laser beam profile [10808-215]
10808 1C	Analytical method for processing digital images of technical objects [10808-219]
10808 1D	Temperature-independent fiber Bragg grating strain sensor system [10808-221]
10808 1E	Automatization of workspace control based on ToF technology [10808-226]
10808 1F	Selected applications of Fourier transform in the diagnostics of the pulverized coal combustion process [10808-227]

- 10808 1G **Evaluation of the possibility of using fractal analysis to study the flame in the co-firing process** [10808-233]
- 10808 1H **Modeling the intensity of scattered light and fog using graphics processing units** [10808-252]

COMPUTATIONAL INTELLIGENCE

- 10808 1I **Some extensions of the Cayley-Hamilton theorem and their applications (Invited Paper)** [10808-2]
- 10808 1J **Integrated visitor support system for tourism industry based on IoT technologies** [10808-5]
- 10808 1K **Application of a statically configured FPGA in the digital control system of the NQR radio spectrometer** [10808-13]
- 10808 1L **Implementation of an expert system based on fuzzy logic to support stock market decisions** [10808-23]
- 10808 1M **Computer implementation of a chosen version of strong belief logic** [10808-24]
- 10808 1N **Methods and techniques for evaluating effectiveness of information technology implementation into business processes** [10808-25]
- 10808 1O **Analysis of parallel computational models for clustering** [10808-31]
- 10808 1P **Correlating software metrics with software defects** [10808-33]
- 10808 1Q **Tracing project development in Scrum model** [10808-38]
- 10808 1R **Anomaly detection in discussion forum posts using global vectors** [10808-40]
- 10808 1S **Differences that make a difference: comparing implementations of selected optimization algorithms in R language** [10808-46]
- 10808 1T **Analysis the conformable fractional derivative and Caputo definitions in the action of an electric circuit containing a supercapacitor** [10808-49]
- 10808 1U **Probabilistic in power engineering** [10808-53]
- 10808 1V **Symmetric block encoder based on reversible circuits** [10808-60]
- 10808 1W **Novel algorithm for symmetric encryption** [10808-61]
- 10808 1X **Instruction trace analysis and enhanced debugging in embedded systems** [10808-68]

- 10808 1Y **Methods and means of processing discrete information in networks with a high level of noise** [10808-79]
- 10808 1Z **Genetic ANFIS for scheduling in telecommunication networks** [10808-80]
- 10808 20 **Implementation complexity analysis of the turbo decoding algorithms on digital signal processor** [10808-81]
- 10808 21 **Neural network modelling by rank configurations** [10808-93]
- 10808 22 **Analysis of computational processes of pyramidal and parallel-hierarchical processing of information** [10808-94]
- 10808 23 **SilentPaths: IoT in the application for moving in silence in urban areas** [10808-100]
- 10808 24 **Model for the analysis and optimization of the efficiency and survivability of an enterprise based on optimal aggregation methodology** [10808-103]

Part Two

- 10808 25 **Software-defined anti-DDoS: Is it the next step?** [10808-107]
- 10808 26 **A new piecewise linear modification to log-map turbo decoding algorithm: comparative analysis, numerical estimations, and simulation** [10808-109]
- 10808 27 **Common CNVs detection by artificial intelligence methods** [10808-116]
- 10808 28 **Automated generation of the design solution of the assembly in instrument engineering** [10808-128]
- 10808 29 **Principles of fast count in modified Fibonacci numerical system** [10808-130]
- 10808 2A **Heuristic hyperparameter optimization for multilayer perceptron with one hidden layer** [10808-131]
- 10808 2B **On the modeling of wave processes in unbounded domains by problem with two-point conditions in time** [10808-132]
- 10808 2C **Method of evaluating the level of confidence based on metrological risks for determining the coverage factor in the concept of uncertainty** [10808-133]
- 10808 2D **Dependability issues of parallel programming in measurement systems** [10808-134]
- 10808 2E **A new approach to assessing the dynamic uncertainty of measuring devices** [10808-135]
- 10808 2F **Solution of travelling salesman problem applied to Wireless Sensor Networks (WSN) through the MST and B&B methods** [10808-136]

10808 2G	Compromising an IoT device based on Harvard architecture microcontroller [10808-137]
10808 2H	Partially homomorphic encryption algorithm based on elliptic curves [10808-139]
10808 2I	Comparison of deep neural network fooling methods on the accuracy of classification [10808-141]
10808 2J	The influence of the characteristics of the measuring instrument on the reliability of decision making in the assessment of conformity [10808-143]
10808 2K	Analysis of the possibilities of using IPSec on a Linux system for wireless networks [10808-151]
10808 2L	Computer theorem proving in some extended logic [10808-152]
10808 2M	Newton binomial in the generalized Cauchy problem as exemplified by electrical systems [10808-153]
10808 2N	Exploiting random perturbations to defend against adversarial attacks [10808-158]
10808 2O	Parallel-hierarchical network as the model of neurocomputing [10808-170]
10808 2P	Indirect measurements of the parameters of inhomogeneous natural media by a multispectral method using fuzzy logic [10808-184]
10808 2Q	The method of multi-criteria ranking of monitoring stations for water discharge in rivers for determining priorities of their location [10808-188]
10808 2R	Estimation of the impact of quality of service parameters on multimedia transmissions [10808-191]
10808 2S	Parametric approximation of electrical circuit responses [10808-194]
10808 2T	Multi-domain model for simulating smart IoT-based theme parks [10808-199]
10808 2U	Multimodal social media video classification with deep neural networks [10808-210]
10808 2V	The automated speaker recognition system of critical use [10808-213]
10808 2W	Concurrent frequent itemsets mining in a shared prefix tree using the Apriori algorithm [10808-216]
10808 2X	Methods of stochastic diagnostic type observers [10808-217]
10808 2Y	Offsetting and blending with perturbation functions [10808-218]
10808 2Z	New method for information hiding in open social networks [10808-258]

BIOMEDICAL APPLICATIONS

- 10808 30 **Flexible humidity sensors impedance modeling** [10808-7]
- 10808 31 **Wireless optogenetic modules for mice** [10808-10]
- 10808 32 **Thermal and mechanical properties of bioactive glass fibers for nanocomposites** [10808-17]
- 10808 33 **Effect of biodegradation on spectroscopic properties of Sm³⁺ doped 45S5 bioglass** [10808-18]
- 10808 34 **Comparison of bioinformatics programs for analysis of single nucleotide variants** [10808-39]
- 10808 35 **The construction of genomic libraries in BAC and its practical application and bioinformatic usage** [10808-42]
- 10808 36 **Application of bioinformatics techniques for protein interaction analysis** [10808-43]
- 10808 37 **MAVLink-based communication for air pollution measurement system** [10808-45]
- 10808 38 **Low power wearable device for elderly people monitoring** [10808-52]
- 10808 39 **Audio style transfer in non-native speech recognition** [10808-74]
- 10808 3A **Scaffolding algorithm using second- and third-generation reads** [10808-82]
- 10808 3B **An approach to determination of the criteria of harmony of biological objects** [10808-108]
- 10808 3C **De Novo DNA assembler for third generation sequencers' reads based on BLASR algorithm** [10808-111]
- 10808 3D **De Novo genome assembly for third generation sequencing data** [10808-112]
- 10808 3E **Fetal phonocardiography signal processing from abdominal records by non-adaptive methods** [10808-118]
- 10808 3F **Quantum effects of electric potential hysteresis in biological macro objects** [10808-122]
- 10808 3G **Means for measuring relative humidity of municipal solid wastes based on the microcontroller Arduino UNO R3** [10808-125]
- 10808 3H **Information model for the evaluation of the efficiency of osteoplasty performing in case of amputations on below knee** [10808-126]
- 10808 3I **Vital signs monitoring using fuzzy logic rules** [10808-140]

10808 3J	Galvanic skin response probe for emotion interpretation in real condition [10808-142]
10808 3K	Multispectral measurement of parameters of particles in heterogeneous biological media [10808-144]
10808 3L	Development of the methodology for the management of the electromobile system and the family house system [10808-146]
10808 3M	Determination of sanitary sewer pipe use in day by audio recording analysis [10808-174]
10808 3N	The using of thermal imaging technique to evaluate the temperature field of hand [10808-175]
10808 3O	Development of automated cage for optogenetic experiments with electromagnetic positioning system [10808-181]
10808 3P	Justification of the electromagnetic impulse method destruction of insect pests in gardens [10808-203]
10808 3Q	Analysis of vertebrae segmentation methods in computed tomography images [10808-207]
10808 3R	Common configurations and challenges in screen-printed enzymatic electrochemical biosensors [10808-231]
10808 3S	Sensors with potential application in artificial skin structure: review [10808-235]
10808 3T	iGAP: Interactive Genomic Analysis Platform [10808-239]

ASTRONOMY, PLASMA, AND HIGH ENERGY PHYSICS

10808 3U	Quasar parallel parametrization [10808-36]
10808 3V	High voltage generator module for high energy physics experiments [10808-51]
10808 3W	The methodology of development of real-time and high-throughput heterogeneous devices for plasma confinement fusion diagnostics [10808-56]
10808 3X	CRI board for CBM experiment: preliminary studies [10808-57]
10808 3Y	VHDL-based parameterized clock manager simulator for FPGA [10808-65]
10808 3Z	Matlab-based modeling of GEM diagnostic data sequencer [10808-66]
10808 40	Prospects for improving top-quark mass measurement precision at future e+e- colliders [10808-69]

10808 41	Data distribution and dispatching software for processing measurement data acquired with SXR GEM-based system [10808-86]
10808 42	Advanced real-time data quality monitoring model for tokamak plasma diagnostics [10808-101]
10808 43	Diagnostic system for video concentration device [10808-123]
10808 44	Hardware JTAG debugger module with ethernet interface for MicroTCA architecture [10808-214]
10808 45	Driver module for quantum computer experiments: Kasli [10808-223]
10808 46	Geant4-based simulations of the x-ray luminescence background in the rotating drum spectrometer/SOLPEX [10808-225]
10808 47	MCORD: MPD cosmic ray detector for NICA [10808-229]
10808 48	Investigation of cosmic ray and solar energetic particle background of STIX using GEANT4 simulation [10808-230]
10808 49	Readout of a prototype CBM-STs silicon sensor module with STs-XYTERv2 ASIC [10808-236]
10808 4A	Study of plasma-wall interactions using pulsed lasers (Invited Paper) [10808-238]
10808 4B	Polish involvement in experimental campaigns at European tokamaks in context of plasma impurity studies (Invited Paper) [10808-240]
10808 4C	Implementation of heapsort in programmable logic with high-level synthesis [10808-245]
10808 4D	Widely parameterizable high-level synthesis [10808-246]
10808 4E	Charge cluster identification for multidimensional GEM detector structures [10808-247]
10808 4F	GEM-based plasma radiation diagnostics development: design aspects affecting its performance [10808-248]

Part Three

MATERIAL ENGINEERING

10808 4G	Effect of alkali content on spectroscopic properties of Er/Ag co-doped antimony-germanate glasses [10808-16]
10808 4H	A new preparation method of rutile-anatase TiO₂ coatings for photocatalytic application [10808-28]
10808 4I	Carbon nanotube fibers doped with iron via Fenton reaction [10808-34]

10808 4J	Graphene nano-flakes and carbon nanotube-based sensors via screen printing technology for acetone gases detection [10808-37]
10808 4K	CuO nanowires sensor of gases [10808-47]
10808 4L	High-speed camera application in the analysis of the chip flow direction [10808-48]
10808 4M	Correlation of cutting forces measurements and high-speed camera registration in the analysis of the chip breaking process [10808-50]
10808 4N	Rapid prototyping in printed electronics [10808-54]
10808 4O	Measurement of wear level of Qubitron II grinding wheels with using 3D vision system [10808-55]
10808 4P	Application of the Monte Carlo method for the optimization of surface roughness during precise turning of NiTi shape memory alloy [10808-58]
10808 4Q	Modeling of dielectric to metal conduction transition in nanocomposites by using high voltage discharge [10808-62]
10808 4R	Determination of nanocapillaries radii statistical distribution in electrotechnical pressboard [10808-63]
10808 4S	Modeling of the materials superplasticity based on damage summation theory [10808-70]
10808 4T	Selection of optimal path of strain rate change in the process of multistage hot deformation under the condition of the equal duration of stages [10808-71]
10808 4U	Temperature distribution in the machining zone during precise turning of NiTi alloy [10808-73]
10808 4V	Aerosol jet printing head for printed microscale electronics [10808-75]
10808 4W	Optical studies of nanocrystalline and amorphous TiO₂ thin films deposited by HiTUS technique [10808-84]
10808 4X	CuO nanowires film for sensors [10808-90]
10808 4Y	Dynamic and mathematical models of the hydraulic-pulse device for deformation strengthening of materials [10808-91]
10808 4Z	Inkjet-printed structures for paper-based packages [10808-98]
10808 50	Automatic system for modeling of working processes in pressure generators of hydraulic vibrating and vibro-impact machines [10808-102]
10808 51	Simulation of burr formation during machining: case study [10808-105]

10808 52	Technology of field effect transistor with DLC layer in gate area [10808-106]
10808 53	The impact of education in 3D product design and printing to primary and high school students [10808-110]
10808 54	Computer aided design and 3D printing for STEAM education: a technical reference guide for teachers (Invited Paper) [10808-256]
10808 55	Function-based interactive editing of decoration and material properties [10808-113]
10808 56	Electrically conductive acrylonitrile butadiene styrene(ABS)/copper composite filament for fused deposition modeling [10808-115]
10808 57	Design and technology of titanium comb capacitor [10808-119]
10808 58	Correction of dynamic characteristics of temperature measuring devices [10808-121]
10808 59	Modeling and simulation of nichrome microheater on polycarbonate substrate [10808-124]
10808 5A	Quality control system of well-bonded coupling fitting onto high pressure gas-main pipelines [10808-148]
10808 5B	The influence of temperature on the AC conductivity of a composite pressboard-synthetic ester-water nanoparticles [10808-160]
10808 5C	Distortion of geometric elements in the transition from the imaginary to the real coordinate system of technological equipment [10808-172]
10808 5D	Temperature transducer based on metal-pyroelectric-semiconductor structure with negative differential resistance [10808-173]
10808 5E	Statement and solution of new problems of deformability theory [10808-183]
10808 5F	New ultrasound approaches to measuring material parameters [10808-185]
10808 5G	The active surface of the sensor at a contact to the technological object [10808-187]
10808 5H	Analysis of the detection of welded joints [10808-189]
10808 5I	Determination and analysis of friction coefficient during turning a cylindrical workpiece made of stainless steel [10808-195]
10808 5J	Current state of tools and methods of control of deformations and mechanical stresses of complex technical systems [10808-201]
10808 5K	AC dielectric properties of SiO₂ thin layers implanted with In and Sb ions [10808-204]
10808 5L	Analysis of the material model to simulation of the machining process [10808-206]

- 10808 5M **Hoping conductance in nanocomposites $(\text{FeCoZr})_x(\text{SiO}_2)_{(100-x)}$ produced in mixed Ar and O₂ atmosphere** [10808-209]
- 10808 5N **Design and technology of copper comb capacitors** [10808-232]
- 10808 5O **Cheap quartz crystal microbalance humidity sensors based on Nafion as sensing component** [10808-237]

ADVANCED APPLICATIONS

- 10808 5P **Optimization of the selection of partition points in the MV network** [10808-3]
- 10808 5Q **Voltage control methods in LV networks with dispersed generation** [10808-11]
- 10808 5R **The impact of power transformer in a low-voltage network on voltage profiles with a large generation of microsources** [10808-21]
- 10808 5S **Non-invasive method of car wheel rim examination** [10808-26]
- 10808 5T **The ultrasonic converter mathematical model of flow rate of flowing environment** [10808-27]
- 10808 5U **Monoimmittance priority encoder** [10808-29]
- 10808 5V **Experimental testing of the law of conservation and transformation of energy** [10808-32]
- 10808 5W **Evaluating energy consumption in wireless sensor networks** [10808-41]
- 10808 5X **Unmanned aerial vehicle as a measurement tool in engineering and environmental protection** [10808-44]
- 10808 5Y **Transient state features selection method in the non-intrusive load monitoring** [10808-85]
- 10808 5Z **Multifrequency phase method for measuring the radial velocity of targets** [10808-88]
- 10808 60 **Automatic system for modeling vibro-impact unloading bulk cargo on vehicles** [10808-97]
- 10808 61 **Determining of the optimal parameters for a mechatronic hydraulic drive** [10808-99]
- 10808 62 **Study of the dynamic stability of the conveyor belt adaptive drive** [10808-104]
- 10808 63 **A hybrid system for an on-site automatic vehicle counting and classification** [10808-150]
- 10808 64 **Method of reducing the uniform of the daily graph of electrical load electric grids with renewable sources of energy** [10808-155]

10808 65	Transmission loss allocation for a bilateral contract in deregulated electricity market [10808-156]
10808 66	Phase noncontact method and procedure for measurement of axial displacement of electric machine's rotor [10808-161]
10808 67	MEMS inertial sensors measurement errors [10808-162]
10808 68	Improving the method of compensation of output signal temperature drift in optical methane concentration measurer [10808-163]
10808 69	Experimental investigations of the amplitude-frequency meter of the velocity flowing environment [10808-164]
10808 6A	Two parameter active measuring probe for objects setting detection on CNC machines workspace [10808-167]
10808 6B	Fuel cell lab data flows optimization [10808-168]
10808 6C	The physical model of motor vehicle destruction under shock loading for analysis of road traffic accident [10808-169]
10808 6D	Vibration-based diagnostics of existing defects in hydraulic units [10808-171]
10808 6E	Spice simulation of nodes of the impedance type signal converters [10808-178]
10808 6F	The simulation of spice models of functional signal sources for impedance converters [10808-182]
10808 6G	Multi-layers high directivity couplers (Invited Paper) [10808-197]
10808 6H	Resistance-temperature detector based on the RL-diode generator of deterministic-chaotic oscillations [10808-202]
10808 6I	Inverted pendulum model Linear-Quadratic Regulator (LQR) [10808-212]
10808 6J	The functioning of distributed energy sources in the aspects of using cogeneration technology [10808-220]
10808 6K	Distributed cogeneration technology in the aspects of costs and power regulation [10808-222]
10808 6L	The economic aspect of the use of distributed generation and renewable sources in the combined process of energy production [10808-224]
10808 6M	The perspective of optimizing the use of combined heat and power in distributed power industry [10808-228]
10808 6N	UAV node design for communication cluster [10808-249]

- 10808 6O **Adaptive production control system based on optimal aggregation methods** [10808-92]
- 10808 6P **Microelectronic frequency transducers of magnetic field with Hall elements** [10808-177]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Maciej Linczuk, Warsaw University of Technology (Poland)

Introduction

The **SPIE-IEEE-PSP WILGA** symposium [wilga.ise.pw.edu.pl], is a multi-conference event, a kind of international Forum of Young Science in Photonics, Advanced Electronics and Internet Engineering. It is organized twice a year under the eminent patronage of two big international engineering institutions, SPIE [www.spie.org] and IEEE [www.ieee.org] and their Polish Counterparts: PSP—Photonics Society of Poland [www.photonics.pl], successor of the Polish Chapter of SPIE [www.spie.pl] and IEEE Poland Section [www.ieee.pl], with participation of IEEE R8 [ewh.ieee.org/reg/8/sac/cms]. The patrons of the symposium are: PAS—Polish Academy of Science (The Committee on Electronics and Telecommunication) [keit.pan.pl], Association of Polish Electrical Engineers (SEP) [www.sep.com.pl], Polish Committee of Optoelectronics SEP [pkopto.ise.pw.edu.pl], Warsaw University of Technology [www.pw.edu.pl], Faculty of Electronics and Information Technology [www.elka.pw.edu.pl], Institute of Electronic Systems [www.ise.pw.edu.pl].

WILGA Organizers: The Symposium is organized by a group of devoted young people—photonics, mechatronics and electronics researchers—gathered in the PERG/ELHEP Research Group of the Institute of Electronic Systems at the Faculty of Electronics and Information Technology of WUT. Most of these young researchers are active members of PSP, SEP, SPIE, OSA, and IEEE. The symposium is diligently run by young researchers for young fellow researchers and the main aim is to have a lot of fun and to learn a lot.

WILGA Publications: The WILGA Symposium publishes its papers in the following proceedings series, technical and peer-reviewed journals: Proceedings of SPIE, since 2002; IEEE eXplore, Internet publication data base; Photonics Letters of Poland, since 2009; Elektronika, SEP Journal, since 1998; IJET—International Journal of Electronics and Telecommunications, PAS [ijet.pl].

WILGA Proceedings of SPIE: There has been a long tradition of WILGA publishing its works in the Proceedings of SPIE. This volume is the 17th published with WILGA papers. All of the WILGA-SPIE volumes contain over 1,500 papers. All WILGA symposia have published more than 2,500 papers with over 5,000 participants. This is an extraordinary achievement for a modest symposium oriented solely on young researchers. No one event of similar character could compare to this achievement. This success was only possible due to big involvement of young researchers in their work. The following WILGA Proc. SPIE were published: Wilga 2002 – Proc. SPIE 5125; Wilga 2003 – Proc. SPIE 5484; Wilga 2004 – Proc. SPIE 5775; Wilga 2005 bis – Proc. SPIE 5948; Wilga 2005 – Proc. SPIE 6159; Wilga 2006 – Proc. SPIE 6347; Wilga 2007 – Proc. SPIE 6937; Wilga 2008 – Proc. SPIE 7124; Wilga 2009 – Proc. SPIE 7502; Wilga 2010 – Proc. SPIE 7745; WILGA 2011 – Proc. SPIE 8008; WILGA 2012 – Proc.

SPIE 8454, WILGA 2013 – Proc. SPIE 8903, WILGA 2014 – Proc. SPIE 9290; WILGA 2015 – Proc. SPIE 9662; WILGA 2016 – Proc. SPIE 10031; WILGA 2017 – Proc. SPIE 10445.

WILGA ways and topics: The official language of the Symposium is English. Peer reviewed papers are published in a renowned, worldwide recognized series, Proceedings of SPIE. The Symposium is designed mainly for young researchers who just finished their Ph.D. degree, but also Ph.D., M.Sc., and B.Sc. students (from physics, photonics, electronics, electrical engineering and mechatronics, as well as material research) and their tutors/mentors. WILGA has a number of main topical tracks. Historically, the first one was Photonics and Web Engineering. Generally, WILGA embraces advanced photonic, mechatronic and electronic systems, in the following aspects: theory, modeling, algorithms, simulations, emulations, design, hardware, software, hardware-software interaction and integration, measurements, testing, commissioning and exploitation. WILGA also addresses new research tendencies like 3D photonics and electronics design, micro and nano-systems, material engineering including meta-materials. Topical sessions are organized by leading experts. Sessions usually begin with current tutorials and are filled with contributed papers by Ph.D. students and young researchers. One of the most important session tracks in WILGA are photonics applications and systems for superconductive accelerator (and free electron laser) technology and high energy physics experiments. We invite warmly students, young researchers and their tutors to participate in WILGA.

WILGA offspring: The WILGA Symposium gave birth to a few topical meetings and conferences which then struck out on their own. These include students and young researcher regional meetings (Opole, Wrocław, Kielce, Białystok, Lublin, Toruń, Kraków and others), of SPIE student chapters, IEEE student branches, OSA student chapters, but also stand-alone conferences. Some of these meetings are still held periodically with Wilga, while some of them gained complete independence. WILGA is very proud of this sort of parenthood, since the very good idea of WILGA is proliferating elsewhere. One of such meetings is, now fully nondependent, SPS—Signal Processing Symposium which started at Wilga in 2003. Another meeting which originated from Wilga is Photoacoustics which started as a nondependent session.

WILGA 1998–2001: Early Wilga Symposia usually gathered around 100 young researchers each. The proceedings were published in Elektronika Journal of SEP, and on CD discs. Some of the reports from these meetings are available on Wilga webpage [wilga.ise.pw.edu.pl].

WILGA 2002: This was the tenth WILGA Symposium. This was the first time the proceedings were published SPIE (Proc. SPIE vol. 5125). Fifty-five papers were published under the following topical sessions: Optical Fibers, Links, and Networks I: Fundamentals of Optical Networking; Optical Fibers, Links, and Networks II: Technologies, Measurements, and Components; Electronic and Photonic Systems for High-Energy Physics (HEP) Experiments I: Subsystem Design; Electronic and

Photonic Systems for High-Energy Physics Experiments (HEP) II: Numerical Calculations and Technical Solutions; Optical Fibers, Waveguides, and Communication Channel Theory; Optical Fiber Sensors and Optoelectronics: Industrial Applications; Lighting Technology; Materials Science and Optoelectronic Technologies; Photonics for Astronomy; Biomedical Applications of Electronics and Photonics; Software for Optical Networks and the Internet; Digital Holography, and 3D Object Measurements, and Recognition. WILGA 2002 was reported in the IEEE Region 8 News, August 2002 edition.

WILGA 2003: The number of participants exceeded 200 persons for the first time. Proc. SPIE vol. 5484 was published containing 95 papers. The topical sessions were: Optical Communications, Optical Computing, and Control Theory; Tesla: Superconducting Linac and Free Electron X-Ray Laser; Advanced Electronic and Photonic Systems for the BAC/ZEUS Detector at the Hera Accelerator; Advanced Electronic and Photonic Systems for the CMS Detector at the LHC Accelerator; Advanced Electronic and Photonic Systems for Astronomy; Materials Science and Materials for Optoelectronics; Optical Fibers; Optical Fiber Lasers; Advanced Optoelectronic and Optical Fiber Sensors; Diffraction, Holography, Interferometry, and Image Processing; Optoelectronic Components: Photodiodes and LEDs; Optical Fiber Lighting Technology; Optical Broadband Internet Technologies and Techniques; and DSP and Radar Imaging. Wilga 2003 was reported in IEEE Region 8 News, November 2003 issue.

WILGA 2004: The number of participants was close to 300. An official agreement of cooperation was signed during Wilga 2004 between the Polish Chapters of SPIE and IEEE. Ninety-two papers were published in SPIE vol. 5775. The sessions were: RF Control System for Tesla and European Superconducting X-ray Free Electron Lasers; Radiation Hardening of Photonics and Electronics for Accelerator/Detector Technologies; Electronic and Photonic Systems for Accelerator/Detector Technology and Astronomy; Optical Communications; Fiber Bragg Gratings and Photonic Crystal Structures; Optoelectronic Materials and Technologies; Digital Holography, Interferometry, and Image Processing; Flame Photometry and Combustion Process Control; FPGA and VHDL; Calculation and Measurement Techniques in Optoelectronics and Electronics; Telemetric Networks for Municipal Systems; Optical and Broadband Internet Technologies and Techniques

WILGA 2005 and SPIE Poland 2005 Congress on Optics and Optoelectronics: The SPIE Poland meetings in 2005 were very special because then the Polish Chapter of SPIE (predecessor of Photonics Society of Poland) hosted together with SPIE and some other regional SPIE Chapters, the SPIE Warsaw Congress on Optics and Optoelectronics – SPIE COO Warsaw 2005. The WILGA 2005 Symposium was split to two parts: one was held in Wilga, and the second jointly with the COO'05 at Warsaw University of Technology. Two separate proceedings volumes were published, SPIE Proc. 5948 and 6159. SPIE COO Warsaw 2005 hosted nearly 800 participants. The two Wilga volumes gathered together over 250 papers.

WILGA 2006: The number of participants stabilized at around 300 persons. Proc. SPIE vol. 6347 was published containing 111 peer reviewed papers. Several sessions were organized devoted to trial defenses of Ph.D. and M.Sc. theses, mainly in photonics and electronics. The sessions included: Free electron laser instrumentation; HEP instrumentation and measurements; International linear Collider, Software and hardware aspects of photonics; Hardware and software co-design; Experiments in space research, astronomy, and astroparticle physics; Bragg gratings and nonlinear optical fibers; Capillary and ring core optical fibers; Materials for optical fiber technology; Photoacoustics; Optoelectronic equipment; Optical fiber sensors and lighting technology; Optical interconnections, packaging, soldering, and RFID technology; Biometrics; Biomedical applications of photonics and electronics; HF circuits; Simulation and control theory; Virtual laboratories and optical Internet technology; and Intelligent computing in optoelectronics.

WILGA 2007: This was the 20th WILGA Symposium. Proc. SPIE 6937 was published containing 152 papers. Nearly 250 presentations filled over 20 topical sessions. The aggregated participation was again around 300 persons. Wilga 2007 was again reported in the IEEE Region 8 News, December 2007 issue. The sessions were on topics such as: Apparatus for optical and gamma-ray astrophysical observations; Flash laser and European x-ray laser development; Superconductive accelerator technology for free electron laser and high energy photon physics; Photoacoustics and ultrashort pulse technology; Optical fiber technology and measurements; Optical fiber applications; Nanomaterials and material research for photonics and electronics; Optical and quantum cryptography; Medical x-ray accelerators and biomedical applications; Warmer program sensory networks for water management/preservation and environment protection; Image processing; Passive and active radar imaging; Signal processing; Radar technology, Optical and radiofrequency technology; Optical measurements; and Algorithms for data processing.

WILGA 2008: WILGA 2008 gathered over 200 participants and the proceedings volume (SPIE vol. 7124) contained 35 papers. The introduction to this volume contains a report on the establishment of the Polish Photonics Society, which evolved from the local SPIE Chapter in Poland. PSP immediately opened its publishing body which is Photonics Letters of Poland. The sessions included: Photonic materials research; Liquid crystal and Bragg optical fibers; Photonic micro-components; Apparatus for optical and gamma ray astrophysical observations; Photonic equipment for high energy physics experiments and accelerator technology; Optimal learning systems for photonics and medicine; Warmer project: sensory networks for water management/preservation and environment protection; Broadband pulse technology; and Photonic broadband networks.

WILGA 2009: Proc. SPIE vol. 7502 was published containing 100 papers. There were around 200 presentations, and over 300 participants in two parts, optical and

radar. The sessions included: Image processing, Optical biometry; Optical astronomy and space technology; Radar technology; Navigation and target tracking; Signal filters and DSP; Signal modulation, transmission and detection; Laser materials, optical fibers and optoelectronics; Sensors, remote sensing, and measuring networks; Genetics databases and biomedical applications.

WILGA 2010: Proc. SPIE vol. 7745 contained 73 papers. The symposium gathered around 300 participants in two parts, optical and radar. Over 200 presentations filled 25 topical sessions. The sessions included: Development of photonics and electronics in Europe and Poland; Photonics applications in astronomy and space technology; Optoelectronics and optical fiber technology; Photonics and IT applications in biology and medicine; Acoustic signal processing; Optoelectronics and electronic, image processing, material nanotechnology; Multiprocessor co-integration platforms. The volume features a series of program articles on development of electronics and telecommunications in Poland.

WILGA 2011: Proc. SPIE vol. 8008 contained 71 papers. There were over 250 participants and over 200 presentations. Wilga 2011 featured SPIE-PSP award for the best student paper presentation. The sessions included: Development of photonics and electronics in Europe and Poland; knowledge representation; Advanced photonics and electronics systems: hardware aspects; Advanced photonics and electronics systems: software aspects; Applications of photonics in astronomy; Communications technologies; Multimedia technologies; Advanced biomedical systems; Radar technologies; Materials for photonics and optoelectronics, optical fibers.

WILGA XXXth Jubilee Symposium: WILGA 2012, January Edition was held on 26-29 January 2012 at WUT's FE&IT. The WILGA 2012 May edition was held on 28 May–2 June 2012 in a resort owned by Warsaw University of Technology. Over 300 presentations were given during both editions of Wilga, covering a broad area of photonics applications and web engineering. Nearly 350 persons participated. Proc. SPIE 8454 contained 85 papers. The sessions were: Photonics overview for XXX Wilga Symposium, Pi-of-the-sky: a network of astronomical telescopes; Satellite and space technology; High energy physics experiments; Communications and multimedia technology; Optoelectronic technologies, components, devices and systems; Materials and technologies; Components and systems modelling; Biomedical and DNA computing; Airborne applications of computational intelligence; Artificial intelligence, cryptography, software and ontological ICT systems.

WILGA 2013: Proc. SPIE 8903 was published and contained 100 papers. The working research sessions of 32nd WILGA 2013 were: general photonics, optical fiber technology, optical communications, optoelectronics, applications of optical fibers, integration of electronics, photonics and mechatronics, distributed measurement systems, LHC and CMS at CERN, JET and ITER photomasks, optics and optoelectronics for astronomy, fundamentals of FPGA-DSP systems, object

oriented design of hardware, terabit optical data links, software-hardware co-design, biomedical engineering, computational intelligence of advanced systems, development of photonics and electronics in Europe and Poland, radar technology, terahertz photonics, free electron lasers, E-XFEL and POLFEL lasers, EuCARD—European Coordination of Accelerator Research and Development, and TIARA, etc. A special session was devoted to a project EuCARD² (2013–2017), which is a continuation of EuCARD.

WILGA 2014: Proc. SPIE 9290 was published containing 125 papers. The Wilga 2014 Symposium was held during the last week of May 2014. The working research sessions of the 34th WILGA 2014 symposium were held traditionally as in previous years: general photonics, optical fiber technology, optical communications, optoelectronics, applications of optical fibers, integration of electronics, photonics and mechatronics, distributed measurement systems, LHC and CMS at CERN, JET and ITER tokomaks, optics and optoelectronics for astronomy, fundamentals of FPGA-DSP systems, object oriented design of hardware, terabit optical data links, software-hardware codesign, biomedical engineering, computational intelligence of advanced systems, development of photonics and electronics in Europe and Poland, radar technology, terahertz photonics, free electron lasers, E-XFEL and POLFEL lasers, EuCARD2 – Enhanced European Coordination of Accelerator Research and Development, TIARA, EuroFusion Project, etc.

WILGA 2015: Proc. SPIE 9662 was published containing 169 papers. The Symposium was held during the last whole week of May 2015, plus during two adjacent weekends. The working research Sessions of 36th WILGA were traditionally as in previous years: general photonics, optical fiber technology, optical communications, optoelectronics, applications of optical fibers, integration of electronics, photonics and mechatronics, distributed measurement systems, LHC and CMS at CERN, JET and ITER tokomaks, optics and optoelectronics for astronomy, fundamentals of FPGA-DSP systems, object oriented design of hardware, terabit optical data links, software-hardware co-design, biomedical engineering, computational intelligence of advanced systems, development of photonics and electronics in Europe and Poland, radar technology, terahertz photonics, free electron lasers, E-XFEL and POLFEL lasers, EuCARD2 – Enhanced European Coordination of Accelerator Research and Development, TIARA, EuroFusion Project, etc.

WILGA 2016: The 38th Edition of Wilga Symposium was held on 29 May–6 June. It gathered more than 350 participants from Poland and Europe. Over 250 papers were presented orally and around 50 posters. Proc. SPIE volume 10031 contains 194 papers. The 2013–2016 Wilga Symposia were under friendly research patronage of the EuCARD2 EC Program on accelerator technology. The following topical sessions were organized: material engineering, photonics, sensors and measurements, biomedical applications, research experiments, and high-performance computing.

XL SPIE – PSP WILGA 2017: Proc. SPIE 10445 contained 238 papers. WILGA 2017, the 40th Symposium Jubilee Edition, was held 28 May–5 June 2016, and gathered a record number of nearly 400 participants. Wilga 2017 and hopefully the next Wilga meetings will cooperate with the ARIES EC H2020 Project on Accelerator Research and Innovation for European Science and Society. Wilga 2017 saw in Warsaw two important SPIE Conferences on Remote Sensing, also on Security and Defense. The Symposium featured the following sessions: Photonics and Optoelectronics, Computational intelligence, Biomedical applications, Research Experiments, Material research, and Advanced applications.

WILGA 2018: Wilga 2018 took place 3–10 June and gathered over 300 participants. Wilga 2018 was attended by participants from Czech Republic, Germany, France, Ukraine, Belarus, and Kazakhstan. Traditionally the following topical sessions were organized: Photonics Applications, Photonics Technologies and Components, Instrumentation for High Energy Physics Experiments, Free Electron Lasers, Instrumentation for Tokamaks and Hot Plasma Fusion Experiments, Astronomy and Wide Sky observations, Biophotonics and Optogenetics, Photonics – Electronics – Mechatronics Co-integration, Hardware – Software Co-design, High Performance Computing and Artificial Intelligence, etc.

The Wilga Symposium tries also to address critical research and technical issues currently under discussion in Poland. Air pollution associated with coal-based energy generation and common usage of old types of inefficient furnaces is widely debated. A session was organized on distributed measurements of air pollution using mobile devices equipped in multi-parameter sensors. Different flame measurement techniques were compared. Poland, called a coal country, faces a difficult decision on the governmental level concerning the development of big scale nuclear power facilities. This decision must be addressed to avoid serious energy balance issues. A review paper was presented and a separate session on this subject was organized with participation of young researchers and nuclear energy infrastructure proponents and supporters.

WILGA 2019: The WILGA 2019 summer meeting on Photonics Applications will be held on 2– 9 June 2019. The organizers warmly invite interested young researchers and students in photonics and related fields to participate in this exceptional and very friendly research event oriented toward young researchers from Poland and all over Europe, and the world.
