Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

Dear colleagues,

It was a great pleasure for the Romanian Society for Laser in Dentistry (SRLS) to organize the 7th SRLS International Conference for Laser In Medicine/First Congress of Laser in Dentistry.

The conference integrates many important topics and new developments in this high-end field of laser & biotechnologies in dentistry, thus offering participants the opportunity to enlarge their basic knowledge gathered after experiencing the prior editions.

One of the major goals of this conference is to establish new scientific and professional relationships and to exchange the latest results of scientific research and clinical applications of laser therapy. Moreover, this conference aims to attract both well-known researchers, practitioners as well as PhD students, young doctors and final year undergraduate students. The exhibitions presented a wide range of laser devices used in dentistry and oral surgery but also the latest equipment and instruments used in modern-day medicine. The congress also included hands-on, workshops, lectures by prestigious personalities from all around the world, and scientific papers and posters which represented great opportunities for updating knowledge.

The conference took place in Timisoara, the largest city of western Romania, a city full of charm, settled on the northern bank of the Bega River, having a distinct architectural character and a vibrant cultural life. Frequently referred to as "Little Vienna," Timisoara is home to year-round musical and theatrical performances, art galleries, museums and a buzzing nightlife. A progressive, cosmopolitan place, Timisoara was the first city in Europe and second in the world after New York, to use electricity to illuminate its public streets.
