Resilience of state-of-the-art 1300nm In(Ga)As/GaAs quantum-dot lasers to external optical feedback (Withdrawal Notice)

Soroush Sobhani, David Childs, Keizo Takemasa, Kenichi Nishi, Mitsuru Sugawara, et al.

Soroush A. Sobhani, David T. Childs, Keizo Takemasa, Kenichi Nishi, Mitsuru Sugawara, Richard A. Hogg, "Resilience of state-of-the-art 1300nm In (Ga)As/GaAs quantum-dot lasers to external optical feedback (Withdrawal Notice)," Proc. SPIE 10946, Metro and Data Center Optical Networks and Short-Reach Links II, 1094609 (1 February 2019); doi: 10.1117/12.2509931

SPIE.

Event: SPIE OPTO, 2019, San Francisco, California, United States

Resilience of state-of-the-art 1300nm In(Ga)As/GaAs quantum-dot lasers to external optical feedback (Withdrawal Notice)

[Soroush A. Sobhani](#), [David T. Childs](#), and [Richard A. Hogg](#)
Univ. of Glasgow (United Kingdom)

[Keizo Takemasa](#), [Kenichi Nishi](#), and [Mitsuru Sugawara](#)
QD Laser, Inc. (Japan)

Proc. SPIE 10946, 1094609 (2019)

Online Publication Date: 1 February 2019
Withdrawn from Publication: 15 March 2019

Conference Date: 2–7 February 2019
Conference Location: San Francisco, California, United States
Conference Title: Metro and Data Center Optical Networks and Short-Reach Links II
Conference Chairs: Atul K. Srivastava, Madeleine Glick and Youichi Akasaka
