Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Introduction

This conference is a continuation of a series of regular meetings of the Czech, Polish, and Slovak optical communities which started in Rusava (Czech Republic) in 1972. After a short interruption between 1980 and 1990, the meetings have grown, and are known as the "Wave and Quantum Aspects of Contemporary Optics." For 40 years, this conference has been organized biannually by turns in Slovakia, Czech Republic, and Poland, and has become a place to exchange knowledge on the latest optical research, and to meet friends and coworkers, as well as young scientists.
