Volume 11036

Proceedings of SPIE 0277-786X, V. 11036

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Relativistic Plasma Waves and Particle Beams as Coherent and Incoherent Radiation Sources III, edited by
Dino A. Jaroszynski, MinSup Hur, Proc. of SPIE Vol. 11036, 1103601 · © 2019 SPIE
CCC code: 0277-786X/19/\$18 · doi: 10.1117/12.2535692

Proc. of SPIE Vol. 11036 1103601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Relativistic Plasma Waves and Particle Beams as Coherent and Incoherent Radiation Sources III*, edited by Dino A. Jaroszynski, MinSup Hur, Proceedings of SPIE Vol. 11036 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

PLASMA-BASED AMPLIFIERS AND OPTICS

11036 02	Plasma optics for intense laser amplification (Invited Paper) [11036-1]
11036 06	Streaming instabilities in converging geometry [11036-5]

BETATRON AND ION CHANNEL SOURCES

11036 0D	Scaling LWFA-based betatron emission to the 1PW level (Invited Paper) [11036-12]
11036 0F	Generation of electron high energy beams with a ring-like structure by a dual stage laser wakefield accelerator [11036-14]

X-RAY APPLICATIONS

11036 0I	Towards direct-laser-production of relativistic surface harmonics (Invited Paper) [11036-17]
11036 0J	Commissioning of a laser-plasma x-ray micro-focus source for phase contrast imaging [11036-18]

TERAHERTZ SOURCES

11036 0M	Coherent terahertz radiation emitted by wide-angle electron beams from a laser-wakefield accelerator (Invited Paper) [11036-21]
11036 0N	Radiation emission from plasma oscillation [11036-22]

ELECTRON BUNCH AND X-RAY METHODS

- 11036 0O **Controlled generation of ultra-short electron bunches using density modulation (Invited Paper)**
[11036-23]
- 11036 0Q **Characterisation of a laser plasma accelerator x-ray source size using a Kirkpatrick-Baez microscope** [11036-25]
- 11036 0R **Plasma density shaping for attosecond electron bunch generation** [11036-26]
- 11036 0S **A simple method of producing a focused x-ray beam** [11036-27]

POSTER SESSION

- 11036 0T **Application programmes at the Scottish Centre for the Application of Plasma-based Accelerators (SCAPA)** [11036-28]
- 11036 0V **Coherent harmonic generation using off-resonance laser modulation based on a laser wakefield accelerator** [11036-30]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Bedřich Rus, ELI Beamlines (Czech Republic)
Chris B. Edwards, STFC Rutherford Appleton Laboratory
(United Kingdom)
Saša Bajt, Deutsches Elektronen-Synchrotron (Germany)
Ivo Rendina, Istituto per la Microelettronica e Microsistemi (Italy)
Mike Dunne, SLAC National Accelerator Laboratory (United States)

Honorary Symposium Chair

Erich Spitz, French Academy of Sciences, National Academy of
Technologies (France), Advisor to Thales (France)

Conference Chairs

Dino A. Jaroszynski, University of Strathclyde (United Kingdom)
MinSup Hur, Ulsan National Institute of Science and Technology
(Korea, Republic of)

Conference Programme Committee

Min Chen, Shanghai Jiao Tong University (China)
John P. Farmer, Heinrich-Heine-Universität Düsseldorf (Germany)
Nathaniel J. Fisch, Princeton University (United States)
Punit Kumar, University of Lucknow (India)
Antoine Rousse, Ecole Nationale Supérieure de Techniques
Avancées (France)
Luis O. Silva, Universidade Técnica de Lisboa (Portugal)
Roman Spesyvtsev, University of Strathclyde (United Kingdom)
Hyyong Suk, Gwangju Institute of Science and Technology
(Korea, Republic of)
Luca Volpe, Università degli Studi di Milano-Bicocca (Italy)
Stefan A. Weber, Institute of Physics of the CAS, v.v.i.
(Czech Republic)
Xue Yang, Capital Normal University, Beijing Advanced Innovation
Center for Imaging Technology (China)

Session Chairs

- 1 Plasma-based Amplifiers and Optics
MinSup Hur, Ulsan National Institute of Science and Technology
(Korea, Republic of)

- 2 High-field Physics
Dino A. Jaroszynski, University of Strathclyde (United Kingdom)
- 3 Betatron and Ion Channel Sources
Samuel R. Yoffe, University of Strathclyde (United Kingdom)
- 4 X-ray Applications
Mohammed Shahzad, University of Strathclyde (United Kingdom)
- 5 Terahertz Sources
David A. Burton, Lancaster University (United Kingdom)
- 6 Electron Bunch and X-ray Methods
Jean-Claude Kieffer, Institut National de la Recherche Scientifique (Canada)
