SPIE

Volume 11091
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510628755

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

POSTER SESSION

Laser pulse waveform control of Dirac fermions in graphene [11091-44]

Controlling quantum interference using metamaterials [11091-46]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Halina Rubinsztein-Dunlop, The University of Queensland (Australia)
Mark L. Brongersma, Geballe Laboratory for Advanced Materials (GLAM), Stanford University (United States)

Symposium Co-chairs

Reuven Gordon, The University of Victoria (Canada)
Natalia M. Litchinitser, Duke University (United States)

Conference Chairs

Cesare Soci, Nanyang Technological University (Singapore)
Matthew T. Sheldon, Texas A&M University (United States)
Mario Agio, Universität Siegen (Germany)

Conference Program Committee

Igor Aharonovich, University of Technology, Sydney (Australia)
Vikas Anant, Photon Spot, Inc. (United States)
Iñigo Artundo, VLC Photonics (Spain)
Jennifer A. Dionne, Stanford University (United States)
Andrei Faraon, Caltech (United States)
Mohammad Hafezi, Joint Quantum Institute (United States)
Zubin Jacob, Purdue University (United States)
Christian Kurtsiefer, National University of Singapore (Singapore)
Mark Lawrence, Stanford University (United States)
Peter Lodahl, Niels Bohr Institute (Denmark)
Marko Loncar, Harvard John A. Paulson School of Engineering and Applied Sciences (United States)
Chao-Yang Lu, University of Science and Technology of China (China)
Patrick Maletinsky, University Basel (Switzerland) and Qnami (Switzerland)
Maiken H. Mikkelsen, Duke University (United States)
Prineha Narang, Harvard University (United States)
Kae Nemoto, National Institute of Informatics (Japan)
Jeremy L. O’Brien, University of Bristol (United Kingdom)
Teri W. Odom, Northwestern University (United States)
Jian-Wei Pan, University of Science and Technology of China (China)
Pascale Senellart, Laboratoire de Photonique et de Nanostructures (France)
Andrew J. Shields, Toshiba Research Europe Ltd. (United Kingdom)
Kartik Srinivasan, National Institute of Standards and Technology (United States)
Daniel L. Stick, Sandia National Laboratories (United States)
Mark Tame, Stellenbosch University (South Africa)
Wolfgang Tittel, University of Calgary (Canada)
Ewold Verhagen, AMOLF (Netherlands)
Ulrike Woggon, Technische Universität Berlin (Germany)

Session Chairs

1 Quantum Materials I: Color Centers
   Joel D. Cox, University of Southern Denmark (Denmark)

2 Quantum Materials II: 2D Materials
   Nicole Fabbri, LENS - Laboratorio Europeo di Spettroscopie Non-Lineari (Italy)

3 Quantum Materials III: Quantum Dots
   Matthew T. Sheldon, Texas A&M University (United States)

4 Quantum Devices I: Sensors and Memories
   Diego-Martin Cano, Max-Planck-Institut für die Physik des Lichts (Germany)

5 Quantum Devices II: Single Photon Detectors
   Martijn Wubs, Technical University of Denmark (Denmark)

6 Quantum Devices III: Optomechanical Devices
   Jianbo Gao, Clemson University (United States)

7 Quantum Systems I: Quantum Computing and Quantum Information
   Victor Brar, University of Wisconsin-Madison (United States)

8 Quantum Systems II: Quantum Repeaters and Quantum Networks
   Serdar Kocaman, Middle East Technical University (Turkey)

9 Quantum Systems III: Integrated Quantum Systems
   Mark Lawrence, Stanford University (United States)
