Proc. of SPIE Vol. 11125 1112501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

OPTICAL DATA STORAGE

11125 05	Analog recording technologies available to optical disc systems [11125-4]
11125 06	Three-dimensional simulation on near-field light generated by semiconductor ring resonator with metal nano-antenna for heat-assisted magnetic recording [11125-5]

HOLOGRAPHY, MEASUREMENT, AND FABRICATION

11125 09	Adaptive optics correction using coherently illuminated diffractive objects [11125-8]
----------	--

NEW CONCEPTS AND IMAGING

11125 0B	Lyteloo data “storage in motion” (Invited Paper) [11125-11]
11125 0C	Head up display with laser scanning unit (Invited Paper) [11125-12]

ADVANCED SENSING

11125 0F	Lensless 3D sensing technology with Fresnel zone aperture based light-field imaging (Invited Paper) [11125-15]
11125 0G	Design considerations for an auto Lidar (Invited Paper) [11125-16]
11125 0J	A variety of range compensating lens designs for active optical systems [11125-24]

POSTER SESSION

11125 0N	Novel method to improve stroke of electrostatically actuated MEMS micromirror [11125-23]
----------	---

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

Ruyan Guo, The University of Texas at San Antonio (United States)

Conference Chairs

Ryuichi Katayama, Fukuoka Institute of Technology (Japan)

Yuzuru Takashima, James C. Wyant College of Optical Sciences, The University of Arizona (United States)

Conference Program Committee

Pierre-Alexandre J. Blanche, James C. Wyant College of Optical Sciences, The University of Arizona (United States)

Min Gu, RMIT University (Australia)

Thomas D. Milster, James C. Wyant College of Optical Sciences, The University of Arizona (United States)

Kimihiro Saito, Kindai University Technical College (Japan)

Luping Shi, Tsinghua University (China)

Xiaodi Tan, Fujian Normal University (China)

Din Ping Tsai, Research Center for Applied Sciences - Academia Sinica (Taiwan)

Kazuyoshi Yamazaki, Hitachi, Ltd. (Japan)

Session Chairs

- 1 Optical Data Storage
Ryuichi Katayama, Fukuoka Institute of Technology (Japan)
- 2 Holography, Measurement, and Fabrication
Yuzuru Takashima, James C. Wyant College of Optical Sciences, The University of Arizona (United States)
- 3 New Concepts and Imaging
Kimihiro Saito, Kindai University Technical College (Japan)
- 4 Advanced Sensing
Kazuyoshi Yamazaki, Hitachi, Ltd. (Japan)

Introduction

This proceedings volume is a collection of papers based on the invited and contributed presentations at the ODS 2019: Industrial Optical Devices and Systems conference held on 11-12 August 2019 at the San Diego Convention Center as part of the SPIE Optics + Photonics 2019.

The ODS conference had been held as a stand-alone conference since 1973 to 2012 and has been held as part of larger conferences since 2013. This was the sixth time ODS was held as part of SPIE Optics + Photonics. Formerly, the main topic of this conference was Optical Data Storage. However, in 2018, the scope of the conference was extended to include Industrial Optical Devices and Systems and to discuss the possibility of applications of optical technologies to emerging industrial domains such as intelligent cars, IoT, big data, healthcare, security, etc. In 2019, the new scope has been highlighted and brought to the forefront.

ODS 2019 was a successful conference. A total of 18 papers (7 invited papers, 9 contributed oral papers, and 2 contributed poster papers) were presented. In the morning oral sessions, there were nice presentations about new developments in technologies for future optical data storage systems such as nano-photonics, holography, etc. Moreover, in the afternoon oral sessions, there were interesting presentations about optical technologies for intelligent cars such as LiDARs, head-up displays, etc. We would like to emphasize that the conference was well attended especially in the afternoon oral sessions as it was in 2018.

We are very happy that a total of nine papers are included in this proceedings volume. They represent important and interesting achievements in the current field of optical data storage and industrial optical devices and systems. We hope that the readers find this proceedings volume stimulating and exciting, as well as helpful for their future research and development.

We look forward to having ODS 2020 as part of the SPIE Optics + Photonics 2020. To keep the ODS active, we will continue to encourage contributions about the new scope.

Finally, we would like to express our sincere gratitude to the committee members, session chairs, and all of the presenters and attendees of ODS 2019 as well as the SPIE staff for their contributions.

**Ryuichi Katayama
Yuzuru Takashima**
